APPENDICES.

APPENDIX A.—List showing the deduction to be made on account of packing and the valuation of all articles of trade adopted in registering traffic on trade routes during the year 1884-85	iii
Statement showing the average retail price of food-grains in the interior of Bengal during the year 1884, as compared with that of the three previous years	iv

APPENDIX B.—TRAFFIC CARRIED BY COUNTRY BOATS AND CARTS—

I.—Statement showing the number of boats and carts passing the several river, canal, and road registration stations in Bengal during 1884-85, as compared with the totals of the two previous years ...	v
II.—Statement showing the down and up-stream traffic passing the different toll-stations on the Nudda rivers registered during 1884-85, as compared with the figures of the two previous years ...	vi
IIA.—Statement showing the proportion of Calcutta traffic to the total trade carried along the Nudda rivers, registered during 1884-85, as compared with the figures of the two previous years ...	x
III.—Statement showing the total trade passing downwards and upwards along the Midnapore canal, and the proportion of Calcutta traffic to the total trade, registered during 1884-85, as compared with the figures of the two previous years ...	xii
IIIA.—Statement showing the total trade passing downwards and upwards along the Hidgellee canal, and the proportion of Calcutta traffic to the total trade, registered during 1884-85, as compared with the figures of the two previous years ...	xvi
IV.—Statement showing the traffic as well as the general course of the traffic carried along the Orissa canals during 1884-85, as compared with the figures of the two previous years ...	xviii
V.—Statement showing the total import trade of Calcutta passing along the Calcutta canals during 1884-85, as compared with the figures of the two previous years ...	xxii
VA.—Statement showing the total export trade of Calcutta passing along the Calcutta canals during 1884-85, as compared with the figures of the two previous years ...	xxiv

APPENDIX C.—RIVER-BORNE TRAFFIC CARRIED BY INLAND STEAMERS—

I.—Statement showing the downward and upward traffic carried by river steamers during 1884-85, as compared with the figures of the two previous years ...	xxvi
II.—Statement showing the traffic carried by steamers along the Brahmaputra river during 1884-85, as compared with the figures of the two previous years ...	xxviii
III.—Statement showing the traffic carried by steamers along the Megna river during 1884-85, as compared with the figures of the two previous years ...	xxxii
IV.—Statement showing the total trade carried downwards and upwards along the Brahmaputra and Megna rivers by the steamers belonging to the Eastern Bengal State Railway during 1884-85, as compared with the figures of the two previous years ...	xxxvi

APPENDIX D.—RAIL-BORNE TRAFFIC OF CALCUTTA—

I.—Statement showing the principal staples of traffic carried along the East Indian Railway and imported into Calcutta during 1884-85, as compared with the figures of the two previous years ...	xl
II.—Statement showing the principal staples of traffic carried along the East Indian Railway and exported from Calcutta during 1884-85, as compared with the figures of the two previous years ...	lviii
III.—Statement showing the principal staples of traffic carried along the Eastern Bengal State Railway and imported into Calcutta during 1884-85, as compared with the figures of the two previous years ...	lxviii
IV.—Statement showing the principal staples of traffic carried along the Eastern Bengal State Railway and exported from Calcutta during 1884-85, as compared with the figures of the two previous years ...	lxxvi

APPENDIX E.—INLAND TRADE OF CALCUTTA BY ALL ROUTES—

Statements relating to the trade in the principal staples, namely—

Cotton, raw	lxxx
Do. twist and yarn (European)	lxxxiii
Do. piece-goods	ditto	lxxxviii
Indigo	xov

Tobacco	cli

Statements relating to all staples of traffic—

Statement showing imports into Calcutta by internal routes during 1884-85, as compared with the figures of the two previous years
Statement showing exports from Calcutta by internal routes during 1884-85, as compared with the figures of the two previous years	clviii
Statement showing the quantities of all articles of trade imported into, and exported from, Calcutta by sea during 1884-85, as compared with the figures of the two previous years	clx
Statement showing the values of all articles of trade imported into, and exported from, Calcutta by sea during 1884-85, as compared with the figures of the two previous years	clxiv
Statement showing the import trade of Calcutta with the principal marts in Bengal during 1884-85, as compared with the figures of the two previous years	clxvi
Statement showing the export trade of Calcutta with the principal marts in Bengal during 1884-85, as compared with the figures of the two previous years	clxxii

APPENDIX F.—TRADE OF CHITTAGONG PORT—

I.—Statement showing the import trade of the Chittagong Port carried by country boats during 1884-85, as compared with the figures of the two previous years	clxxviii
II.—Statement showing the export trade of the Chittagong Port carried by country boats during 1894-85, as compared with the figures of the two previous years	clxxx
III.—Statement showing the trade of Chittagong with Naraingunge during 1884-85, as compared with the totals of the two previous years	clxxxii
Statements relating to the sea-borne trade of Chittagong during 1882-83, 1883-84, and 1884-85	clxxxiii

APPENDIX G.—SEA-BORNE TRADE OF ORISSA PORTS—

I.—Statement showing the import trade of Balasore carried by sea during 1884-85, as compared with the figures of the two previous years	clxxxvi
II.—Statement showing the import trade of Cuttack carried by sea during 1884-85, as compared with the figures of the two previous years	clxxxviii

	Page.
III.—Statement showing the import trade of Pooree carried by sea during 1884-85, as compared with the figures of the two previous years	clxxxviii
IV.—Statement showing the export trade of Balasore carried by sea during 1884-85, as compared with the figures of the two previous years	cxc
V.—Statement showing the export trade of Cuttack carried by sea during 1884-85, as compared with the figures of the two previous years	cxcii
VI.—Statement showing the export trade of Pooree carried by sea during 1884-85, as compared with the figures of the two previous years	cxcii

REPORT

ON THE

RIVER-BORNE TRAFFIC OF THE LOWER PROVINCES OF BENGAL

AND ON THE INLAND TRADE OF CALCUTTA,

AND ON THE TRADE OF CHITTAGONG AND THE ORISSA PORTS

FOR THE YEAR 1884-85.

CHAPTER I.

EXPLANATION OF THE SYSTEM OF REGISTRATION.

THIS Report deals with the trade registered on the rivers and canals of the Lower Provinces of Bengal, with the inland trade of Calcutta, and with the trade inland and sea-borne of Chittagong and the Orissa Ports.

Statistics relative to the rail-borne traffic of these Provinces in 1884-85 are, for the first time, under the orders of the Government of India, reviewed in a separate report.

That report besides giving an account of the rail-borne trade, internal and external, under the block system of registration, also gives the statistics of the total traffic carried by the State Railways in these Provinces. The present report takes no account of rail-borne traffic except in the chapter which deals with the trade of Calcutta.

2. During the year under report no change was made in the system under which the internal trade of the Province is registered on some of the rivers and canals, and the system of registration of the trade of Calcutta, Chittagong, and the Orissa Ports also remained the same as in former years.

3. The statistics which are furnished in chapters II to VIII of this report include—

Trade along the chief routes.

The boat traffic registered on the Nuddea rivers.

The boat and steamer traffic registered on the Brahmaputra and Megna rivers.

The boat traffic registered on the Midnapore and Hidgelee canals.

The boat traffic registered on the Orissa canals.

The boat traffic registered on the Calcutta canals.

4. The boat traffic on the Brahmaputra and Megna rivers which crosses from Bengal into Assam and *vice versa* is registered at Bhoyrub Bazar and Dhubri under arrangements made by the Assam administration; statistics of this traffic are for the first time incorporated in this report. Boat traffic on these rivers which does not cross from one province to another is not registered. The different companies concerned in the trade carried by inland steamers on the Brahmaputra and Megna rivers are the India General Steam Navigation Company, the Rivers Steam Navigation Company, and the Inland Flotilla Company. The acknowledgments of the Lieutenant-Governor are due to the agents of these companies for the courtesy with which they have always placed their books at the disposal of Government.

5. The inland trade of Calcutta, and the inland and sea-borne trade of Chittagong and of the Orissa ports is described separately in chapters IX to XI of this report.

Trade of large towns and commercial centres.

The entire inland traffic of Calcutta, imports as well as exports, carried by rail, by river steamer, by boat and by road is shewn in this report. Comparative figures relating to the sea-borne trade of Calcutta in all the articles enumerated in the returns of internal trade are also given, but the sea borne trade of Calcutta, coasting and foreign, is more fully dealt with in the Annual Report of the Sea-borne Trade and Navigation of the Bengal Presidency. In regard to the chief staples, the details furnished show how the imports into Calcutta by sea are distributed over the country, and from what parts of India the goods that were exported by sea came. The boat and road traffic of Calcutta is registered by means of a cordon of registering stations, 26 in number, placed on the Hooghly and on the canals and roads round Calcutta and the Suburbs. For Chittagong, the returns exhibit the sea-borne trade, foreign and coasting, as well as that carried by country boats, while for the Orissa ports the sea-borne trade only is registered.

6. The classified list of goods used last year for registering the traffic carried by country boats, inland steamers and by road has been in use in these Provinces since June 1876. For rail-borne trade a revised classified list was prescribed by the Government of India and was introduced in Bengal from the beginning of 1884-85. The latter list is confined to certain commodities in which the traffic is of real commercial importance.

Classification of commodities.

7. The principles adopted in the valuation of commodities for statistical purposes were explained in the Internal Trade Report for 1883-84, and have been noticed in

Valuation of commodities.

4 of chapter I of the Report on the Rail-borne Trade of these provinces for 1884-85. A list shewing the values which have been assigned to all articles of trade is appended to this report.

CHAPTER II.

GENERAL SUMMARY OF THE SEASONS AND RESULTS OF THE HARVESTS AND NOTICE OF PRICES.

The year 1884-85 was one of deficient rainfall and consequently of poor crops in all parts of the Lower Provinces, except the Eastern Districts and Orissa. The deficiency of the harvests caused an increase in the price of food-grains (except wheat) throughout these Provinces. The material gain to cultivators in districts which had good harvests from the high prices ruling was no doubt considerable, but a much larger number of persons must have been affected for the worse by the high prices.

General Summary of the season.

2. In Burdwan, Bankoora, and Beerbhoom the rainfall of the year was deficient in quantity and unevenly distributed over the district areas. A cessation of the rains in July prevented sowing and retarded transplantation, while the maturing crop suffered from insufficient rain in August and September. Thus in those parts where the rainfall was least plentiful a large area of land remained uncultivated, and the area actually tilled yielded a comparatively scanty return. Irrigation was freely resorted to, and a large tract of country is said to have been saved from failure by the Eden Canal in Burdwan. In Midnapore, Hooghly, and Howrah the crops were generally good.

Burdwan Division.

In the three northern districts of the division the partial failure of the rice crop following upon previous bad harvests pressed severely upon the resources of the lower classes. Day-labourers suffered from want of work, and the poorer cultivators found difficulty in obtaining advances to enable them to cultivate their fields; hence large numbers of both classes quitted their homes in search of work, leaving their families to be supported by Government relief or private charity. In Midnapore, Hooghly, and Howrah the condition of the agricultural and working classes was prosperous, and the high prices which prevailed enabled the cultivators to dispose of their surplus harvests to the best advantage.

3. The rainfall of the year was below the average of the preceding three years in Nuddea and Moorsshedabad and in parts of Jessore, but exceeded the average in the 24-Pergunnahs, in Khoolna, and in the greater part of Jessore. There was an average good rice crop throughout the 24-Pergunnahs district. The partial failure of the rice crop in the Nuddea district was compensated for to a great extent by good *rabi* and sugarcane. In Jessore the outturn of the year was not a very bad one, but it was considerably below the standard of an average year. In the Khoolna district the outturn of the rice crop was above the average. In Moorsshedabad the winter rice crop is said to have been greatly affected by the early cessation of the rains, and the outturn was much below the average. It was specially bad in the Kandi sub-division owing to scanty rainfall in the transplanting season. The outturn of the winter crops was generally good in all the sub-divisions except Kandi, where it was very poor.

Presidency Division.

In the 24-Pergunnahs district the rice crop was in some parts below the average, but the deficiency of yield was made up by a rise in price. In Nuddea the people of Chocadanga and Meherpore, on account of deficiency of the rice harvests, were not very prosperous. In Moorsshedabad the condition of the people was far from good: the landless class in this district suffered severely from high prices, and the landholding class have been impoverished by

successive years of short crops. In Jessore also the people were not well off, though there was nothing like distress in any part of the district, and in Khoolna, in spite of the good harvests of the year, the people are said to be poor because they are improvident.

4. In the Rajshahye Division the rainfall was considerably below the average in all districts, and the year is described as having been a bad or indifferent one for agriculture in the

Rajshahye Division.

greater part of the division. Only in Darjeeling, where the excellent distribution of the rainfall more than compensated for its shortness, were the crops generally good. The winter rice crop, which is by far the most important crop of the division, was below the average in every district except Darjeeling, ranging from 5 annas in Bogra to 10 annas in Dinagepore. The *aus* or *bhadoi* crop was an exceptionally good one (14 annas) in Bogra, an average one in Dinagepore and Rungpore, below the average in Pubna, and a little over half an average crop in the remaining districts. Jute, which is the next crop in importance in the division after rice, was a good crop only in Dinagepore and Bogra, and was below the average in other districts. Cold-weather crops, especially mustard, pulses, and the tobacco and sugarcane crops, were generally good.

5. In the Dacca Division the year under report was on the whole a good one from an agricultural point of view. The rains

Dacca Division.

began early and were plentiful in April, May, and June. The comparatively scanty showers in July and August were followed by good rain in September and October. The *aman*, *aus*, and *boro* rice crops, which are in the order named the most important food crops of the division, were generally average crops; jute, which is largely grown in Dacca, Furreedpore, and Mymensingh, was a very good crop, but fetched low prices. Sugarcane was a good crop in Furreedpore, and the cultivation of this crop was largely extended during the year in Backergunge. A storm in the Backergunge district in November did much damage to the crops and to cocoanut and betelnut trees. Rice was dear all over the division in the three northern districts on account of large exports to the west, and in Backergunge on account of damage done by the storm of November, and also, it is said, on account of "rumours of famine in Burdwan and Beerbhoom, which checked exportation and raised prices in anticipation of an increased demand."

6. The rainfall of the year was above the average in Chittagong, Noakhally and Tipperah, but below it in the Hill Tracts.

Chittagong Division.

The rice crop was generally a good average crop in the three plains districts, though it was damaged to some extent in Chittagong and Noakhally by a cyclone on the 1st November. In Noakhally considerable damage was also caused by the cyclone to the betelnut crop, which is, next to rice, the principal crop of the district. The cold-weather crops in Chittagong suffered from want of rain, but on the whole the year was decidedly a favourable one. Tea was only a fair crop in Chittagong and jute in Tipperah was a fair crop, but fetched low prices. In the Chittagong Hill Tracts the crops were poor for want of rain, and were also ravaged by rats after the harvests.

7. The year was, from an agricultural point of view, one of anxiety in at least three of the seven districts of this division.

Patna Division.

The rainfall was even more deficient than that of 1883-84, itself a year of deficient rain, in all districts except Chumparun, where the rain of September was excessive. The *bhadoi* crop is estimated to have been 12 annas in Sarun and Shahabad, 11 annas in Mozufferpore and Chumparun, 8 to 11 annas in Gya, 4 to 7 annas in Durbhunga, and 6 annas in Patna. The *aghani* crop was best in Chumparun, where it is estimated to have been 14 annas, and was worst in Patna and parts of Gya, where it is estimated at 4 annas and 2 to 10 annas respectively. In parts of the Behar and Nawada sub-divisions this crop was a total failure, a great part of the rice-growing area not even having been ploughed. In Durbhunga this crop is said to have been 6 to 8 annas, and in Shahabad, Mozufferpore, and Sarun 11, 10, and 8 annas, respectively. The *rabi* crop was on the whole the best crop of the year, varying from 14 annas in Chumparun and Sarun to 6 to 7 annas in Durbhunga. The poppy crop was a good one in Patna, Gya and Sarun, and

exceptionally good in Chumparun. In Mozufferpore this crop was much damaged by blight, and there was also a falling off of cultivation in the Hajepore Sub-Agency.

The prices of food-grains, which had been high during 1883-84, rose still higher in 1884-85, but fell from the middle of the latter year, and were much easier at the close than at the beginning of the year. Large importations of wheat from the Upper Provinces at a critical time had a beneficial effect on the market. The poorer classes in the division cannot afford to eat rice and wheat. They eat the cheaper grains—Indian-corn and millets. These grains too were dear during the year. The exceptionally high prices generally pressed hard on the people. The short outturn of crops in most of the districts, especially in parts of Patna, Gya and Durbhunga, straitened their resources, and it was necessary to open relief works to give employment to the labouring classes in places where the failure of crops was most complete. While, however, there was severe pinching in these parts, there was no actual famine. In Shahabad, Sarun and Chumparun it is said that the condition of the people was on the whole satisfactory during the year.

8. In the Bhagulpore Division the rainfall of the year was considerably below the average in all districts. In Monghyr the

Bhagulpore Division.

winter rice crop was hardly half an average crop, but the *bhadoi* and *rabi* crops were good. In Bhagulpore, rice was a poor crop, and the *rabi* suffered from the ravages of caterpillars, but the *bhadoi* crop was generally an excellent one. In Purneah the rainfall of the past year was nearly 22 inches below the average. In the sudder sub-division about 12 annas of the *aghani* rice crop was lost by the drought in September. The heavy floods of the Ganges in September and October also destroyed the *aghani* and the greater part of the *bhadoi* crops in about half of the Manihari thana. In Maldah the scantiness of the rainfall in September did much harm to the paddy on the high lands, while on the other hand there were two unseasonable and harmful inundations, which destroyed a great part of the *bhadoi* paddy and a large quantity of the *kalai*. The *rabi* crops suffered from insects in this district. *Aghani* rice suffered much in the Southal Pergunnahs, owing to scanty rainfall from June to September, which seriously retarded the transplanting operations. In many parts of the district a large area of the ordinary rice land remained fallow. *Rabi* was an average crop, and *bhadoi* an excellent crop in this district.

The material condition of the people of the division was not generally satisfactory during the year on account of the partial failure of crops which followed bad harvests of previous years, with consequent high prices. Landless labourers were pinched, but the fact that there was no free resort to such relief works as were opened indicates that actual want of the necessities of life was not felt to an excessive degree.

9. In Balasore the rainfall was ample, and was also happily distributed over the year. The harvest over the whole district was excellent, and the outturn is said to have been

Orissa Division.

better than any within the memory of the present generation. In the greater part of Pooree the season was a tolerably good one for agriculture, but some tracts suffered from drought, and the outturn of the harvests for the whole district was therefore something below the average. The harvest in the Cuttack district was generally good, but some tracts suffered from inundations.

The year was, on the whole, one of prosperity throughout the division. Although in some parts there was a comparatively short crop, the deficiency was in great part made up to the cultivator by a general rise of prices. Food-stocks were ample, and work was plentiful for those in need of it.

10. The year under review, like the preceding year, but in a more marked degree, was one of deficient rainfall in the division.

Chota Nagpore Division.

In the sudder sub-division of the Hazareebagh district the outturn of rice was much below the average. The *bhadoi* yielded a 16-anna crop in the Giridhi sub-division, but its outturn in the sudder sub-division was estimated at 12 annas only. The outturn of *rabi* was much below the average. In Lohardugga the crops were average ones, and in Singbhoom were above the average. In Manbhoom transplanting was delayed

for want of rain, and large areas were not planted at all. In pergunnah Bagda there was an extensive failure of the rice crop. The *bhadoi* crops, however, were good, and the rice crop on the low lands yielded well, and in many places abundantly. Indian-corn, millets and *mahua*, which are also important food crops in this division, yielded fairly.

On account of the partial failure of crops in two successive seasons the condition of the people in Hazareebagh, Manbhoom and Palamow was worse than in the previous year. In Singbhoom, on the other hand, the harvests were good, and the people were fairly well off.

11. The average wholesale prices ruling in Bengal during the past year for the principal agricultural staples are compared below with those of 1883-84—

Prices of agricultural staples.

				Average wholesale price per annual during the year—		Increase.	Decrease.
				1883-84.	1884-85.		
				Rs. A. P.	Rs. A. P.	Per cent.	Per cent.
Cotton, raw	15 0 2	13 12 0	8.33
Indigo	222 0 0	193 0 0	13.06
Jute, raw	3 12 0	3 4 0	13.33
Grain and pulse—							
1. Wheat	2 12 0	2 4 0	16.18
2. Gram	2 4 0	2 4 0
3. Pulses	2 4 0	2 4 0
4. Other spring crops	2 1 0	2 1 0
5. Rice, husked	2 8 0	2 12 0	10.00
6. Do., unhusked	1 12 0	2 0 0	14.29
7. Lower and bajra	2 0 0	2 0 0
8. Other rain crops	2 4 0	2 0 0	11.11
Lac—							
1. Dye	26 0 0	26 12 0	28.8
2. Shell	37 8 0	37 0 0
3. Stick *	36 0 0	45 0 0
4. Other kinds	20 8 0	20 8 0
Oilseeds—							
a. Linseed	4 4 0	3 12 0	11.75
b. Mustard seed	4 0 0	3 8 0	12.50
c. Til or jinjili	4 4 0	3 8 0	17.65
d. Castor	3 2 0	3 2 0
e. Poppy	3 4 0	4 8 0	6.41
f. Other kinds	2 12 0	2 12 0
Ghee	29 4 0	30 0 0	3.56
Sugar—							
1. Drained	13 12 0	13 0 0	5.45
2. Undrained	9 8 0	8 12 0	7.89
Tea, Indian	65 0 0	60 0 0	7.69
Tobacco	8 2 0	7 8 0	7.69

Partial failure of crops and the consequent scarcity account for the rise in the price of rice. The customs returns of foreign export of rice shew a similar rise in price, and a large falling off in quantity exported. The falling off in the price of wheat was caused by decreased exports due to low prices in the London market. The decline in the price of linseed, mustard seed, and til seed is attributed to a better outturn of the crops. The low price of indigo was due to the poor quality of the year's outturn and to want of demand for this article in foreign countries. The fall in the price of raw jute was the result of a large harvest and inferior quality of the crop, and to dull demand for the raw and manufactured article. The price of India tea last year was the lowest on record and was due to over production. In the price of stick lac shews a very large increase of 25 per cent. as compared with 1883-84. The rise is no doubt due to a certain extent to a poor outturn of the crop. No proper comparison can be made between the prices which ruled during the past two years, as those for 1884-85 relate to stick lac only, whereas those for the previous year included the price of "other kinds" than dye and shell-lac.

12. The average retail prices which ruled in Bengal during the year 1884 for all sorts of food-grains are compared below with those of the preceding three years :—

		QUANTITIES PER RUPEE IN SEERS OF 80 TOLAS.						
		Wheat.	Barley.	Rice.		Lesser millets.	Maize or Indian corn.	Gram.
				Best sort.	Common.			
BENGAL.		S. C.	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.

It will be observed that during the last year there was a general rise in these prices. The advance in the price of wheat was, however, merely nominal, amounting to only 0·40 per cent., as compared with that ruling in the three previous years. In the case of barley and Indian-corn the percentages of increase were 38·91 and 37·72, respectively; in the price of common rice the average rise amounted to 32·34 per cent., and in that of best rice to 29·55 per cent. The rise under common rice was most marked in the following districts :—

		QUANTITIES PER RUPEE IN SEERS OF 80 TOLAS.

24-Pergunnahs	17 13	15 0	2 13
Bogra	28 5	15 0	13 5

The price of lesser millets showed an increase of 31·24 per cent. as compared with the average price of the three previous years, and that of gram an increase of 14·11 per cent.

13. The valuation of cotton piece-goods and of the other articles named in paragraph 4 of chapter I of the report on the rail-borne trade of Bengal for 1884-85 appears to the Lieutenant-Governor to have been hitherto not altogether satisfactory, and notice of the valuation adopted for these articles will be deferred to be treated in the report for the current year. With regard to other prices (shewn in the valuation statement appended), it may be here noticed that the rise in the price of wines is probably due to smaller imports from Europe. The fall in the price of European woollen piece-goods is due to the importations from Europe having been larger during the past year than in the previous year.

CHAPTER III.

CHIEF WATER-BORNE TRADE.

TRAFFIC ON THE NUDDEA RIVERS.

THE total quantity and value of traffic carried downwards and upwards on the Nuddea rivers during the past three years, were as follows—

1	2	3	4	5	6	7	
TOLL STATIONS.	DOWN-STREAM.		UP-STREAM.		TOTAL.

* From November 1882 to March 1883.

2. The decrease in the gross weight of goods registered was 32 per cent. as compared with 1883-84, but when compared with 1882-83, the past year's figures show an increase of 4.60 per cent. As regards the down traffic, there was a decrease of 2,65,019 maunds as compared with the figures of 1883-84, and of 2,31,535 maunds as compared with those of 1882-83. The upward traffic, however, showed a steady increase, the quantity carried during the past year having been 2,33,146 maunds in advance of that of 1883-84, and 6,63,164 maunds in excess of that of 1882-83. The local reports show an improvement in the condition of the Bhagiruthee river, and navigation was carried on throughout the year. As regards the Jellinghee route the Collector of Tolls writes—

“The traffic on the Jellinghee river has been more unfavourable than the last year. Tolls realized have been Rs. 49,267, against Rs. 57,512 in the preceding year, showing a decrease of Rs. 8,245 due to the failure of rice crops in the northern districts.”

The condition of the Matabhanga river also was not satisfactory. The Collector of Tolls writes—

“The traffic on the whole, although not so good as in the previous year, must, I think, be considered satisfactory, seeing that the river throughout the year was in an unusually bad condition.”

8. In the down trade, the largest increase, as compared with 1883-84, was in mustard seed (4,47,691 maunds), timber (2,08,895 maunds), stone and marble (1,64,584 maunds), miscellaneous spring crops (82,853 maunds), and saline substances including saltpetre (47,449 maunds), while the articles which showed the largest decrease were gunnies (709,781 in number), raw jute (3,92,342 maunds), rice (3,50,572 maunds), wheat (3,51,344 maunds), tobacco (60,582 maunds), drained sugar (48,849 maunds), and linseed (37,123 maunds). In the up-stream traffic, gunny-bags showed a decrease of 182,493 in number, coal and

coke of 1,65,867 maunds, and salt of 78,973 maunds, while, on the other hand, paddy increased by 4,54,496 maunds, gunny cloth by 42,396 pieces, and rice by 41,493 maunds. The number of laden boats registered during the past three years, was as follows—

1	2	3	4	5	6	7	8	9	10
TOLL STATIONS.	Down trip.			Up trip.			Total.

* Manufactures of silk are shown according to value in rupees.

The Calcutta portion of the trade will be explained elsewhere in this report. The following remarks relate only to the fluctuations in such items of the local trade as are of importance.

5. *Jute, raw*.—There was a large decrease under raw jute, the total quantity registered having been 3,92,342 maunds below the trade of 1883-84, and 2,78,370 maunds below that of 1882-83. The decrease is chiefly observable in the quantities carried along the Matabhanga river, which was unnavigable before the time had arrived for traders to despatch jute by that route. The supply brought down to Calcutta was 9,75,704 maunds, and of the remaining 2,46,872 maunds, Bhuddressur received 2,40,484 maunds, and other places 6,388 maunds. The Bhuddressur imports were obtained chiefly from mart Doolalgunge (2,39,484 maunds) in Purneah. The quantity of raw jute carried downwards along the Nuddea rivers represented 7·48 per cent. of the total import traffic of Calcutta in this article.

6. *Gunnies*.—No hand-made gunny-bags were registered during the past year, but the total quantity of gunny cloth (locally called "chutty," each piece measuring 5 feet in length and 1½ feet in width) was 699,625 pieces, which, at the rate of 2 pieces per bag, would give 349,812 bags, thus showing a decrease of 709,781 bags, as compared with 1883-84, and of 1,098,453 bags, as compared with 1882-83. The number of bags despatched to Calcutta was 187,425, and to other places 162,387, of which 152,987 bags were carried to Bhuddressur chiefly from Doolalgunge in Purneah.

7. *Wheat*.—The weight of wheat registered was 8,07,537 maunds, against 11,58,881 maunds in 1883-84, and 9,38,203 maunds in 1882-83; the whole of the last year's traffic went to Calcutta with the exception of 12,694 maunds, which were distributed among the different marts in Moorshedabad (4,660 maunds), Burdwan (3,917 maunds), Nuddea (2,476 maunds), and Hooghly (1,641 maunds). Last year the total imports of wheat into Calcutta by all routes amounted to 46,97,139 maunds, 81·90 per cent. of which was carried by the East Indian Railway, while the Nuddea rivers route contributed 16·92 per cent. against 10 per cent. in the previous year.

8. *Gram and pulse*.—The quantity registered was 8,72,085 maunds, showing an increase of 12,444 maunds as compared with 1883-84, and of 91,801

maunds as compared with 1882-83. This supply was entirely consigned to Calcutta, with the exception of 34,630 maunds, of which Hooghly received 15,483 maunds, Nuddea 7,446 maunds, Burdwan 6,896 maunds, Moorshedabad 4,152 maunds, and other places 653 maunds. The quantity shipped for Calcutta by this route was 26·63 per cent. of the total imports by all routes, against 28·03 per cent. attracted to the East Indian Railway.

9. *Other spring crops.*—The result of the past year's registration under this head was an increase of 82,853 maunds on the trade of 1883-84, and a decrease of 55,443 maunds as compared with that of 1882-83. The quantity shipped for Calcutta amounted to 2,94,349 maunds, while only 2,868 maunds found their way to Hooghly, Nuddea, Moorshedabad, and Burdwan.

10. *Rice and paddy.*—The total quantities of rice and paddy registered during the past three years, were—

			1882-83. Mds.	1883-84. Mds.	1884-85. Mds.
Rice	7,43,286	6,35,661	2,55,089
Paddy	10,998	14,700	25,144
Total in rice, after converting paddy into rice, at the rate of 25 seers of rice to a maund of paddy			7,50,160	6,44,849	2,70,804

The decrease during the past year amounted to 58·00, and 63·90 per cent., as compared with the figures of the two previous years, respectively. The supply imported into Calcutta was 2,35,797 maunds, and the distribution of the remaining 35,007 maunds is shown in the following statement—

Names of importing marts.

Mart.		District.	Rice. Mds.	Paddy. Mds.	Total in rice. Mds.

Nuddea	261	908	825
Other places	659	124	737
Total			19,361	25,033	35,007

Last year the quantity of rice carried to Calcutta by this route was 2·15 per cent. of the total imports by all routes.

11. *Hides.*—Under this head there was an increase of 6,905 pieces, as compared with 1883-84, and of 5,930 pieces, as compared with 1882-83. This trade was with Calcutta only. The imports of hides into Calcutta by all routes during the past year aggregated 7,999,202 pieces, of which 5,376,032 pieces were consigned by the East Indian Railway, against 42,755 pieces carried along the Nuddea rivers. The rest followed other routes.

12. *Mats.*—The traffic in mats amounted in value to Rs. 15,980, against Rs. 6,208 in 1883-84, and Rs. 7,960 in 1882-83. No mats were sent to Calcutta during the past year; the entire supply was distributed as follows:—

Districts.					1884-85. Rs.
Nuddea	15,280
Hooghly	400
Burdwan	300
Total				...	15,980

13. *Ghee*.—The quantity registered was 33,828 maunds, against 29,572 maunds in 1883-84, and 44,304 in 1882-83. Almost the entire supply was sent to the Calcutta market with the exception of 1,205 maunds, of which 971 maunds were consigned to Moorshedabad, 213 maunds to Hooghly, and 21 maunds to other places.

14. *Saltpetre*.—The quantity registered was 25,334 maunds, which showed an increase of 14,224 maunds as compared with 1883-84, and of 13,668 maunds as compared with 1882-83. The whole was sent to Calcutta. The amount of saltpetre carried by this route forms but a small fraction of the total quantity imported into Calcutta by all routes.

15. *Other saline substances*.—Under miscellaneous saline substances there was an increase of 33,225 maunds on the returns of 1883-84, and of 17,604 maunds on those of 1882-83. This trade was almost entirely with Calcutta.

16. *Oil-seeds*.—The aggregate quantity of oilseeds registered during the past three years, is shown below—

	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
Linseed	9,43,246	10,47,938	10,10,815
Mustard seed	5,31,382	3,73,697	8,21,388
Other oilseeds	1,84,697	1,76,662	1,84,103
Total	16,59,325	15,98,297	20,16,306

Under linseed there was a falling off of 37,123 maunds as compared with the trade of 1883-84, but an increase of 67,569 maunds is observed when compared with that of 1882-83. In the case of mustard seed, the trade exhibited a very large increase, namely 4,47,691 maunds and 2,90,006 maunds, as compared with 1883-84 and 1882-83, respectively. Excluding the Calcutta portion of the trade, there remained 12,985 maunds of linseed, 74,241 maunds of mustard seed, and only 2,687 maunds of other oilseeds. In linseed the most important item was an import of 9,590 maunds into Bhuddussur, chiefly from Doolalgunge, which sent 8,340 maunds. The distribution of mustard seed is shown in the table below—

Importing districts.	Mds.	Sources of supply.	Mds.
Hooghly	50,965	Purneah	52,892
Moorshedabad	14,907	Maldah	8,594
Burdwan	3,967	Sarun	2,907
Nuddea	3,837	Moorshedabad	2,280
Other places	565	Goruckpore	2,166
		Other places	5,402
Total	74,241	Total	74,241

During the year under review the total quantities of linseed and mustard seed carried to Calcutta along the Nuddea rivers were 20·14 per cent., and 19·66 per cent., respectively of the total imports of these seeds by all routes, while the percentage brought by the East Indian Railway was 65·87 and 51·18, respectively.

17. *Silk, raw*.—The total quantity fell from 1,244 maunds in 1882-83 to 408 maunds in 1883-84, and 138 maunds in 1884-85. This traffic last year was entirely with Calcutta, with the exception of 23 maunds, 14 maunds of which relate to the local traffic of the Moorshedabad district, and 9 maunds were carried to Joyrampore in Moorshedabad from Bhola Hat in Maldah.

18. *Silk, manufactured*.—The total value of manufactured silk goods registered was Rs. 20,118, against Rs. 23,750 in 1883-84, and Rs. 23,550 in 1882-83. The largest portion of the year's supply was consigned to the Moorshedabad district, which imported Rs. 15,018 worth of goods, while Calcutta received goods to the value of only Rs. 5,100.

19. *Stone and marble*.—There was a revival in this trade during the past year, the total quantity registered having been 4,93,520 maunds, against 3,28,936 maunds in 1883-84, and 3,89,017 maunds in 1882-83. Almost the whole of the year's supply was sent to Calcutta.

20. *Sugar, drained*.—The quantity registered was only 17,977 maunds, against 66,826 maunds in 1883-84, and 96,754 maunds in 1882-83. The traffic

outside Calcutta amounted to 5,518 maunds, 4,408 maunds of which were sent to the Moorshedabad district, and 1,110 maunds to other places.

21. *Sugar, undrained*.—There was a slight decrease in this trade, the total quantity having been 50,671 maunds, against 54,668 maunds in 1883-84, and 52,135 maunds in 1882-83. The quantity sent to Calcutta was 34,273 maunds, the remainder (16,398 maunds) having been despatched to marts in Hooghly (6,979 maunds), Moorshedabad (4,192 maunds), Burdwan (3,400 maunds), and other districts (1,827 maunds).

22. *Tobacco*.—Under this head a decrease is shown of 60,582 maunds, as compared with 1883-84, and of 48,155 maunds, as compared with 1882-83. The quantity shipped for Calcutta during the year was 36,912 maunds, and the consignments to other places were 103,859 maunds as detailed below—

Importing marts.				Sources of supply.			
Marts.	Districts.		Mds.	Districts.			Mds.
Bhuddressur	Hooghly	...	76,767	Purneah	84,842
Jeagunge	Moorshedabad	...	7,802	Monghyr	10,607
Jungypore	Ditto	...	6,458	Durbhanga	3,484
Nadunghat	Burdwan	...	5,046	Mozufferpore	1,975
Other places	7,786	Nuddea	1,101
				Moorshedabad	944
				Other places	906
Total			1,03,859	Total			1,03,859

23. *Timber*.—The total trade amounted to 3,03,163 maunds, against 94,268 maunds in 1883-84, and 97,350 maunds in 1882-83. Last year Calcutta received 2,25,849 maunds and other districts 77,314 maunds. Out of the latter supply, Bolagore in Hooghly, imported 67,879 maunds chiefly from marts in Purneah (39,274 maunds) and Bhagulpore (25,145 maunds).

24. *Up-stream traffic*.—The traffic in the principal articles carried up-stream during the past three years, is exhibited in the following statement—

1	2	3	4	5	6	7	8	9	10
PRINCIPAL STAPLES.	UP STREAM TRAFFIC.						PROPORTION OF CALCUTTA TRAFFIC TO THE TOTAL TRADE

* Piece-goods are shown according to value in rupees, gunny-bags in number, and gunny-cloth in pieces.

25. *Coal and coke.*—The coal trade amounted to 3,74,831 maunds in 1882-83, 5,15,026 maunds in 1883-84, and 3,49,159 maunds in 1884-85. Out of the latter quantity, Calcutta exported 2,93,492 maunds, and other places 55,667 maunds. The different districts which imported this article largely during the year under review, were—

<i>Importing districts.</i>							
				Mds.			
Nuddea	93,851	Mymensingh	...	14,275
Rajshahye	74,341	Jessore	...	9,850

Burdwan	3,100	Total	...	50,525
Ghazipore	3,000			
Moorshedabad	1,525			
Other places	1,200			
Total	50,525			

27. *Gunnies.*—The total traffic in gunnies during the past three years was as follows:—

				1882-83.	1883-84.	1884-85.
Gunny-bags	No.	261,925	203,368	20,875
Gunny cloth	Pieces...	205,800	248,949	291,345

The heavy decline under gunny-bags was more than compensated for by the large increase under gunny cloth, of which 258,435 pieces were exported from Calcutta during the past year, against 220,170 pieces in 1883-84, and 190,475 pieces in 1882-83. The destinations of the exports during 1884-85, were as follows—

<i>Importing districts.</i>							
				Pieces.			
Durbhunga	83,900	Ghazipore	...	9,450
Monghyr	74,395	Goruckpore	...	8,540
Mozufferpore	35,000	Moorshedabad	...	7,425
Bhagulpore	25,195	Mirzapore	...	4,700
Purneah	13,545	Other places	...	8,100
Sarun	11,095	Total	...	291,345
Chumparun	10,000			

28. *Rice and paddy.*—There was a considerable increase under this head during the past year, as the following figures show—

				1882-83.	1883-84.	1884-85.
				Mds.	Mds.	Mds.
Rice	83,175	1,26,776	1,68,522
Paddy	1,08,626	2,64,026	7,18,522
Total in rice after converting rice into paddy at the rate of 25 seers of rice to a maund of paddy				1,88,566	2,91,792	6,17,345

Last year the supplies exported from Calcutta amounted to 78,392 maunds of rice, and 4,33,199 maunds of paddy, while the quantities carried from other districts were 89,877 maunds, and 2,85,323 maunds, respectively.

The sources of supply and the places of destination are shown in the following statement—

Importing districts.			Sources of supply.		
	Rice.	Paddy.		Rice.	Paddy.
	Mds.	Mds.		Mds.	Mds.
Nuddea ...	99,990	5,59,379	Calcutta ...	78,392	4,33,199

			Other marts ...	2,453	8,254
Total ...	1,68,269	7,18,522	Total ...	1,68,269	7,18,522

29. *Iron and its manufactures.*—The gross weight of iron and its manufactures carried during the past year was 97,030 maunds, showing an increase of 5,555 maunds on the returns of 1883-84, and a decrease of 12,623 maunds as compared with those of 1882-83. Out of the past year's supply, 93,109 maunds were exported from Calcutta, and 3,921 maunds from other places. The different districts which imported the largest quantities are shown in the following statement—

Principal importing districts.

	Mds.		Mds.
Fyzabad ...	15,914	Maldah ...	3,818
Patna ...	15,151	Ghazipore ...	3,675
Goruckpore ..	11,731	Bhagulpore ...	3,592

Purneah ...	8,296	Nuddea ...	2,114
Pubna ...	5,513	Other places	9,825
Sarun ...	5,090	Total	97,030

30. *Salt.*—The total quantity of salt carried up-stream aggregated 10,43,690 maunds, against 11,22,663 maunds in 1883-84, and 10,56,357 maunds in 1882-83. The details of this traffic will be found in the Calcutta section of this report.

CHAPTER IV.

TRADE ON THE MEGNA RIVER, TO AND FROM
CHITTAGONG.

THE following statement shows the registered trade of Chittagong carried by country boats *via* the river Megna during the past year, as compared with the preceding two years—

	1882-83.		1883-84.		1884-85.	
	Quantity. Mds.	Value. Rs.	Quantity. Mds.	Value. Rs.	Quantity. Mds.	Value. Rs.
Imports ...	22,48,632	48,30,174	16,16,458	42,17,319	12,91,148	55,10,384
Exports ..	2,56,543	3,75,812	2,68,117	2,64,110	3,85,727	3,71,631
Total ...	25,05,175	52,05,986	18,84,575	44,81,429	16,76,875	58,82,015

2. The result of the year's traffic was a falling off in imports of 3,25,310 maunds, or 20·12 per cent. as compared with 1883-84, and of 9,57,484 maunds, or 42·58 per cent. as compared with 1882-83, and an advance in the export trade of 1,17,610 maunds, and 1,29,184 maunds on the figures of the two previous years, respectively. The total value of the entire trade, however, showed an advance of Rs. 14,00,586, or 31·25 per cent. on the figures of the previous year. The increase is observable in the import traffic only, and was mainly due to a large accession to the traffic in vegetables, ghee, and spices, the combined total quantity of which rose by 87,688 maunds, while the value increased to the extent of Rs. 12,80,168.

3. The only items which materially affected the import traffic of the past year as compared with 1883-84 were rice and paddy the quantities of which carried declined, the former by 3,36,851 maunds, and the latter by 2,12,789 maunds, while on the other hand the staples which showed a marked increase were cocoanuts (2,897,620 in number), spices (43,045 maunds), vegetables (41,900 maunds) lime and limestone (27,200 maunds), mustard and rape seed (25,915 maunds), oils (18,903 maunds), tobacco (12,365 maunds), undrained sugar (8,735 maunds), iron (8,696 maunds), gram and pulse (7,519 maunds), wheat (6,300 maunds), and ghee (2,743 maunds). In the export trade, the largest increase occurred under bamboos (320,258 in number), salt (19,987 maunds), and raw cotton (3,191 maunds), and the largest decrease under timber (14,766 maunds).

4. The usual statement showing all the chief articles of trade imported into, and exported from, Chittagong by this route during the past three years, is subjoined—

1	2	3	4	5

CHAPTER V.

TRAFFIC ON THE MIDNAPORE AND HIDGELLEE CANALS.

The total quantity and value of goods carried along the Midnapore and Hidgellee canals during the past year, as compared with the trade of the two previous years, were as follows—

1	2	3	4	5	6	7
NAMES OF CANALS.	DOWN.		UP.		TOTAL.	
	Weight of goods registered by weight.	Value of all articles of trade.	Weight of goods registered by weight.	Value of all articles of trade.	Weight of goods registered by weight.	Value of all articles of trade.
	Mds.	Rs.	Mds.	Rs.	Mds.	Rs.
Midnapore { 1882-83	19,42,270	98,98,810	9,46,991	75,39,410	28,89,261	1,74,38,220
{ 1883-84	20,80,010	1,21,41,175	10,21,383	86,39,947	31,11,493	2,07,81,122
{ 1884-85	23,16,987	90,07,929	11,92,083	86,97,052	35,09,770	1,77,04,981
Hidgellee { 1882-83	2,25,681	15,76,136	11,02,302	19,17,797	13,27,983	34,92,933
{ 1883-84	3,28,740	19,20,035	16,74,214	39,58,081	20,02,954	58,78,11
{ 1884-85	2,88,101	17,25,162	10,00,479	25,49,108	12,88,580	42,74,258
Total { 1882-83	21,67,951	1,14,73,955	20,49,293	94,57,207	42,17,244	2,00,31,162
{ 1883-84	24,18,650	1,40,61,210	26,95,797	1,25,98,028	51,14,447	2,66,50,238
{ 1884-85	26,04,788	1,07,33,081	21,92,562	1,12,46,158	47,97,350	2,19,79,239

2. The quantity carried both ways during the past year was 3,17,097 maunds, or 6·20 per cent. below the figures of 1883-84, but 5,80,106 maunds, or 13·76 per cent. in excess of those of 1882-83. As regards the Midnapore canal, both the down and up traffic showed a marked improvement during the year,—the increase in the down traffic having amounted to 10·85 per cent., and in the up traffic to 16·69 per cent., as compared with the preceding year. The condition of the trade on the Hidgellee canal, however, was not satisfactory. The aggregate quantity carried last year by this route showed a decrease of 35·67 per cent. and 2·97 per cent., as compared with 1883-84 and 1882-83, respectively. The Executive Engineer, Balasore Division, writes—

“Although the Hidgellee tidal canal was re-opened after silt clearance on the 15th April 1883, it was found necessary again to close the second range in January 1885, silt having in the course of 20 months accumulated in it to the extent of 75 lakhs of cubic feet; the cause of and remedy for this extraordinarily rapid silting has been discussed in special reports and need not be entered on here, but owing to the obstruction that it presented to traffic, and the necessary closure of the second range for three out of the 12 months under discussion, the tolls collected fell off from Rs. 62,626 in 1883-84 to Rs. 41,299, or 33 per cent., the decrease in the first range being at the rate of 22 per cent., and in the second 49 per cent.

“The falling off was almost entirely in the sub-head “articles of food,” that is, rice and paddy. Besides the falling off in the traffic due to the silted state of the canal, there is nothing calling for special notice in the statistics.

“The state of things described above is doubtless far from satisfactory, but it is hoped that the time is not far distant when the coast canal being completed and necessary improvements carried out in the Hidgellee canal to prevent the necessity of frequent closures for silt clearance (even if the actual silt necessary to remove cannot be materially reduced), the financial state of the two canals taken as a whole will become more healthy.”

3. The articles in which the decrease during the past year comparing its trade with that of 1883-84 was most marked were rice (5,00,030 maunds) European piece-goods (Rs. 4,24,831 in value), Indian piece-goods (Rs. 4,21,110 in value), vegetables (27,408 maunds), and brass and copper (20,445 maunds), while paddy showed an increase of 1,35,102 maunds, timber of 68,280 maunds, salt of 65,899 maunds, coal and coke of 27,780 maunds, cotton twist and yarn, Indian, of 24,633 maunds and oils of 11,318 maunds. The following statement

shows the number of laden boats the cargoes of which were registered during the past three years—

YEAR.	Midnapore canal.				Hidgellee canal.		Total.	
	Down.		Up.		Down.	Up.	Down.	Up.
	No.	No.	No.	No.	No.	No.	No.	No.
1882-83	24,175	23,513	9,012	8,481	33,187	31,994
1883-84	24,300	23,859	11,790	11,100	36,090	34,959
1884-85	26,163	25,416	9,100	8,451	35,263	33,867

4. The different districts which contributed to the trade during the past three years, were—

	Imports.			Exports.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
Calcutta
Midnapore
Hooghly
Other districts
Total

During the past year the imports into Calcutta were 12·33 per cent. below those of the previous year. The quantity carried to Midnapore, however, showed an increase of 7·99 per cent., while in the case of Hooghly there was a falling off of 14·53 per cent. As regards the exports, the quantities contributed by Midnapore and Hooghly were 10·13 per cent. and 20·66 per cent., respectively, below the figures of 1883-84, but the Calcutta figures showed an increase of 9·98 per cent.

5. The principal articles of traffic carried along these canals during the past three years, are shown in the following statement—

1	2	3	4	5	6	7
CHIEF ARTICLES OF TRAFFIC.	Registered on the Midnapore canal.	Registered on the Hidgeon canal.	GRAND TOTAL.		PROPORTION OF CALCUTTA TRADE TO THE TOTAL TRAFFIC.

* Mats are shown according to value in rupees; and hides in number.

The Calcutta portion of the trade will be considered elsewhere in this report; the following remarks relate to the fluctuations in such articles of local traffic as are of importance.

6. *Piece-goods, Indian.*—The total value of cotton piece-goods of Indian manufacture fell from Rs. 12,29,950 in 1882-83, to Rs. 7,26,250 in 1883-84, and Rs. 3,05,140 in 1884-85. Last year the value of these goods imported into and exported from Calcutta through these canals was Rs. 2,61,640, the remainder, Rs. 43,500 worth of goods, were distributed as follows—

Importing marts.	Rs.	Sources of supply.	Rs.
Kharoobaria in Hooghly ...	25,500	Bhatoora in Hooghly ...	26,500
Ghattal in Midnapore ...	13,000	Kharoobaria in Hooghly ...	15,000
Midnapore ...	500	Ampta in Hooghly ...	1,500
Ampta in Hooghly ...	500	Other places ...	500
Other places ...	4,000		
	<u>43,500</u>		<u>43,500</u>

7. *Fruits, nuts, and vegetables.*—The figures for the past year showed a decrease of 27,408 maunds as compared with 1883-84, but an increase of 13,201 maunds as compared with 1882-83. The traffic outside Calcutta was only 12,264 maunds, half of which represents the local trade of the different marts within the Midnapore district, as is shown below—

	Mds.
Local trade of the Midnapore district ...	6,825
Local trade of the Hooghly district ...	2,268
Trade between Midnapore, Hooghly, and Nuddes ...	3,171
Total ...	<u>12,264</u>

8. *Rice and paddy.*—There was a considerable decrease under rice, the total quantity registered during the year having amounted to 14,71,963 maunds, against 19,71,993 maunds in 1883-84, and 15,64,608 maunds in 1882-83, as shown in the following statement. This traffic was impeded by the closing of the Hidgellee canal for silt clearance for three months from January 1885—

The local trade of the Hooghly district amounted to 140 maunds of rice, and 1,780 maunds of paddy, while the trade between Midnapore, Hooghly, the 24-Pergunnahs, and Jessore was 1,695 maunds of rice, and 1,481 maunds of paddy.

9. *Provisions other than ghee.*—Under this head is shown for the most part curdled milk. The total quantity registered during the past year was 54,417 maunds, against 58,539 maunds in 1883-84, and 27,613 maunds in 1882-83.

The total supplies sent to and from Calcutta aggregated 49,850 maunds; the remainder, 4,567 maunds, represents the trade between Hooghly and Midnapore.

10. *Sugar, undrained.*—The total quantity of undrained sugar was 1,12,999 maunds, against 1,15,600 maunds in 1883-84, and 97,765 maunds in 1882-83. The amount of the Calcutta traffic was 1,04,132 maunds, and of the other districts 8,867 maunds. Of this latter item, 6,069 maunds represent the local traffic of the Midnapore district, and 2,798 maunds the trade between Midnapore, Hooghly, 24-Pergunnahs, Nuddea, and Balasore.

11. *Tobacco.*—The total quantity registered was 1,14,446 maunds, showing a decrease of 8,373 maunds as compared with 1883-84, and an increase of 5,002 maunds as compared with 1882-83. The amount of the Calcutta trade was 1,06,167 maunds, and of the remainder, 5,504 maunds comprise the local trade of the Midnapore district.

12. *Timber.*—The total quantity rose from 94,919 maunds in 1882-83, and 1,17,559 maunds in 1883-84, to 1,85,839 maunds in 1884-85. The quantity of timber despatched to and from Calcutta was 55,645 maunds. The imports into Hooghly from Midnapore amounted to 14,971 maunds, and of the remainder, 1,14,157 maunds constituted the trade between the different marts within the Midnapore district.

CHAPTER VI.

TRAFFIC ON THE ORISSA CANALS.

The total weight and value of the trade registered on the Orissa canals during the past three years, were as follows.—

1	2	3	4	5	6	7
ORISSA CANALS.	Weight of goods registered by weight.			Value of all articles of trade.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.	Rs.	Rs.	Rs.
Down traffic	12,35,090	12,87,029	10,08,588	26,99,882	37,46,528	33,79,013
Up traffic .. .	2,70,717	3,59,258	4,76,111	6,41,440	29,43,807	22,33,064
Total ..	15,06,707	16,46,287	14,84,699	33,41,322	66,90,335	56,12,077

2. The decrease in the total traffic registered during the past year was 9·86 per cent., as compared with 1883-84, and 1·47 per cent., as compared with 1882-83. In reporting upon the condition of the trade on these canals, the Executive Engineer, Brahmini-Byturni Division, makes the following remarks.—

“The total tollage receipts on the canals of this division have been as follows.—

1883-84, Rs. 55,736 : 1884-85, Rs. 51,299 : decrease Rs. 4,437.

“The total decrease omitting passengers is only Rs. 800.

“The following items show an improvement in trade on the canals during the year—

	Rice.	Timber.	Paddy.
	Rs.	Rs.	Rs.
1883-84	18,263	2,438	2,602
1884-85	20,186	4,154	2,820
Increase ...	1,923	1,716	218

“The increase under ‘paddy and rice’ shows an improvement in the trade between Orissa and Colombo and the Malabar coast *via* False Point. The timber trade consists chiefly in the supply of railway sleepers to Calcutta.

“The Government transport service between Cuttack and Bhuddruk has progressed favourably during the year. The receipts were as follows—

1883-84, Rs. 8,217 : 1884-85, Rs. 13,163 : increase Rs. 4,946.

“The branch canal to Bhuddruk was only opened for traffic in January 1885. The receipts are chiefly for passenger traffic,—for the most part pilgrims on their way to and from Pooree.

“The new route to Chandbally *via* the Gobri extension canal was completed during the year, but not yet opened for traffic. This line is expected to divert much of the traffic which now goes to Chandbally *via* Jumboo. The new route which connects the Kendrapara canal with the Brahmini river is more direct, and will enable steamers to avoid the navigation of dangerous tidal creeks.”

3. The number of laden boats, the cargoes of which were registered during the past year, was 8,218, against 7,965 in 1883-84, and 6,391 in 1882-83, as shown below—

					1882-83. No.	1883-84. No.	1884-85. No.
Down	3,860	4,139	4,160
Up	3,031	3,826	4,058
Total					6,391	7,965	8,218

4. The different districts which contributed to the trade during the past three years, are shown below—

1	2	3	4	5	6	7	8	9	10	11	12	13
NAME OF DISTRICT.	IMPORTS.						EXPORTS.					
	Weight of goods registered by weight.			Value of all articles of trade.			Weight of goods registered by weight.			Value of all articles of trade.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.	Rs.	Rs.	Rs.	Mds.	Mds.	Mds.	Rs.	Rs.	Rs.
Balasore ...	6,07,130	2,88,239	1,52,945	10,07,637	5,16,912	4,77,513	1,42,553	1,83,837	2,26,533	4,35,464	29,13,097	16,01,288
Cuttack ...	8,99,577	13,58,648	13,31,554	23,33,685	61,73,483	51,34,534	13,00,107	14,57,780	12,52,916	38,93,985	40,69,897	39,04,862
Pooree	4,047	5,270	5,050	11,873	7,401	10,087
Total ...	15,06,707	16,46,887	14,84,499	33,41,322	66,90,395	56,12,047	15,06,707	16,46,887	14,84,499	33,41,322	66,90,395	56,12,047

The imports into the Balasore district in 1884-85 were below the figures of the two previous years 1883-84 and 1882-83, by 1,35,294 maunds and 4,54,185 maunds, respectively ; but the exports rose from 1,42,553 maunds in 1882-83, and 1,83,837 maunds in 1883-84, to 2,26,533 maunds in 1884-85. In the case of the Cuttack district, the import trade of 1884-85 showed a slight falling off of 27,094 maunds as compared with the previous year, but a large increase of 4,31,977 maunds as compared with 1882-83. The past year's export trade, however, was very much less than that of the preceding two years, the decrease having amounted to 2,04,864 maunds, and 1,07,191 maunds, respectively.

5. The following statement shows those articles of traffic which were most largely carried by these routes during the past three years—

1	2	3	4	5	6	7
NAMES OF ARTICLES.	Quantity.			Value.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.

All other articles ...	4,71,931	4,00,173	4,44,718	5,43,442	4,74,435	10,69,405
Total ...	15,06,707	16,46,887	14,84,499	33,41,322	66,90,395	56,12,047

The staples which contributed most largely to the decrease in the year's traffic as compared with 1883-84 were stone (1,51,696 maunds), rice (38,414 maunds), European cotton twist and yarn (20,898 maunds), undrained sugar (14,473 maunds), and the only items which showed a marked advance were paddy (15,307 maunds), timber (10,531 maunds), and salt (5,857 maunds).

6. *Rice and paddy.*—The total quantity of rice during the past year was 7,23,822 maunds, or 38,414 maunds below the trade of 1883-84, and 82,217 maunds over that of 1882-83. The total quantity of paddy showed an increase of 15,307 maunds as compared with 1883-84, and of 50,947 maunds when

compared with 1882-83. The places from which the consignments were drawn and those to which they were sent, are shown below—

CHAPTER VII.

TRAFFIC ON THE CALCUTTA CANALS.

The total amount of traffic carried along the Calcutta canals during the past three years, exclusive of the merchandise which was loaded and unloaded at the Port Commissioners' wharves on the Hooghly river, was as follows—

	QUANTITY OF GOODS REGISTERED BY WEIGHT.			VALUE OF ALL ARTICLES OF TRADE.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Maunds.	Maunds.	Maunds.	Rs.	Rs.	Rs.
Imports ...	1,72,61,201	1,49,88,484	1,42,54,648	3,61,02,059	4,34,31,007	3,60,49,777
Exports ...	38,79,610	42,00,883	39,95,013	1,18,36,416	1,27,74,906	1,36,48,916
Total ...	2,11,40,811	1,91,89,367	1,82,49,661	4,79,38,475	5,62,05,913	4,96,98,693

Boats passing along the Calcutta canals, which have been loaded, or which are to be unloaded at the Port Commissioners' wharves on the Hooghly, are not registered at the stations on these canals, because they are registered at the Commissioners' wharves.

2. The falling off in the gross quantity registered during the past year was 9,39,676 maunds, or 4·89 per cent., as compared with 1883-84, and 28,91,120 maunds, or 13·67 per cent., as compared with 1882-83. Compared with the quantities registered in the previous year, the decrease in the import and export trade was uniform, viz. 4·89 per cent. The remarks offered by the Collector and Supervisor, Calcutta Canals, regarding the state of the traffic along this route are extracted below:—

“That such important feeders of trade as the canals always must be would escape being affected by the depression which has prevailed for so long a period in trade and industries could scarcely be looked for. The gross total decrease in the value of the merchandise, imports and exports, in the sea-borne trade of the province of Bengal for 10 months to 31st January 1884-85, as compared with the corresponding months of 1883-84, was Rs. 4,75,51,000 in value. The following statement will show the details of this marked falling off—

BENGAL TRADE, 10 MONTHS.		1883-84.	1884-85.	+ or — for 1884-85.
		Rs.	Rs.	Rs.
Imports	19,07,89,000	18,13,86,000	—94,03,000
Exports	31,04,22,000	27,22,74,000	—3,81,48,000
Total	50,12,11,000	45,36,60,000	—4,75,51,000

“I instance these figures on their bearing on the canal traffic and compare the toll collections with the year just closed with those of the preceding year—

TOLL COLLECTIONS, CALCUTTA CANALS.		1883-84.	1884-85.	+ or — for 1884-85.
		Rs.	Rs.	Rs.
Tolls only	5,49,008	5,17,745	—31,263

“Looking at the approximate percentage of the decrease on trade and on the canal traffic they are about 9½ per cent. on the former and about 6 per cent. on the latter, so that under all circumstances the result may be viewed as not unfavourable.

“I quote below figures extracted from the *Calcutta Gazette*, which show the state of traffic on some canals and railways, compared for nine months from 1st April 1884 to 31st December 1884—

NAME OF CANALS.		Collections for nine months.	Decrease in corresponding period of 1883-84.
		Rs.	Rs.
Nuddea rivers	1,62,720	18,644
Orissa canals	51,191	24,082
Hidgolllee „	33,829	13,089
Sone „	38,739	28,473
Calcutta „	3,27,700	31,086

"The Midnapore canal, however, I observe for the same period shows an increase of Rs. 3,597 due, I understand, to the exceptionally large rice crops in the Midnapore district. From the above statement it will be seen that the Calcutta canal shows the smallest decrease in proportion to the collections. Again, for the same period, viz. 1st April to 31st December 1884, the receipts on the East Indian Railway fell off by Rs. 64,15,113. The Eastern Bengal State Railway for the same period shows an increase of Rs. 3,93,093, but in 1883 only 246 miles were open, while in 1884 there were 339 miles open. At the same time the earnings per mile for 1883 was Rs. 16,210 and for 1884 Rs. 12,922, or a decrease per mile for 1884 of Rs. 3,388. The Bengal Central Railway to Khulna has only been opened a few months; it is therefore impossible to compare its receipts. I do not think it has or will affect canal traffic except on a sudden rise of market rates. Of course it has taken away a large amount of canal passenger traffic, but that will have little effect on the revenue. A reference is only made to figures of earnings of the railways in India to show how deeply seated and general the cause is which has produced this effect on the Calcutta canal collections for the year. Another cause for the decrease is the two new river steam navigation companies which were started during the year, one of which passed as many as 68 large vessels though the Sunderbuns."

3. As regards the import traffic, the articles which showed a marked decrease over the trade of the previous year were firewood (6,41,708 maunds), rice (6,13,080 maunds), paddy (54,426 maunds), vegetables and fruits (1,33,330 maunds), betelnuts (68,782 maunds), undrained sugar (49,530 maunds), and raw jute (49,153 maunds), and the staples in which the largest increase occurred were lime and limestone (5,03,524 maunds), gram and pulse (1,66,876 maunds), linseed (92,435 maunds), spices (43,442 maunds), mustard seed (42,522 maunds), and provisions (23,453 maunds). In the export traffic, coal and coke showed a decrease of 3,50,440 maunds, and European cotton piece-goods of Rs. 49,958 in value, while there was an increase under salt of 91,818 maunds, and under oils of 44,488 maunds. Detailed statements in connection with this trade are published in the appendix to this report.

CHAPTER VIII.

TRAFFIC ON THE BRAHMAPUTRA AND MEGNA RIVERS,
INTERNAL, AND EXTERNAL (WITH ASSAM).

The trade carried along the Brahmaputra and Megna rivers is now registered under the following three heads—

- (1) River-borne traffic carried by the different River Steamer Companies.
- (2) Traffic carried by the steamers of the Eastern Bengal State Railway.
- (3) Trade of Bengal with Assam carried by country boats.

2. As heretofore, the information regarding (1) is obtained by the Government of Bengal from the records of the India General Steam Navigation Company and the Rivers Steam Navigation Company. The traffic statements for the past year also include the trade carried by the steamers belonging to the Inland Flotilla Company. The steamers of this Company began to ply on the Brahmaputra from November 1884. The statistics under the second head are furnished to the Government of Bengal by the Manager of the Eastern Bengal State Railway. Boat traffic is registered at Bhojrub Bazar and Dhubri under arrangements made by the Assam Administration, and is confined to a record of trade which crosses from Bengal into Assam and *vice versa*. Since the beginning of the year under report, the returns of this traffic have been received every quarter from the Assam Secretariat, and have been published with the quarterly returns of the rail-borne traffic of Bengal. A brief account of the trade registered under each of the foregoing heads is published separately in the following pages.

RIVER-BORNE TRAFFIC CARRIED BY THE RIVER STEAMER COMPANIES.

3. The total quantity and value of the merchandise carried on the Brahmaputra and Upper Megna rivers by the River Steamer Companies during the past three years were as follows :—

These figures show that there was a considerable expansion of traffic, the total quantity registered being 16,69,406 maunds in excess of the figures of 1883-84, and 16,97,325 maunds over those of 1882-83. The improvement is mainly in the downward traffic of which the gross weight amounted to 42,80,170 maunds, against 26,40,455 maunds, and 28,68,997 maunds in 1883-84 and 1882-83, respectively. Compared with the previous year, the increase on the Brahmaputra route was 20·21 per cent., and that on the Megna route 76·57 per cent. The most important items of trade which contributed to the increase in the year's traffic, as compared with 1883-84, were piece-goods, European (Rs. 10,36,780), raw jute (8,68,500 maunds), mustard seed (5,41,731 maunds), liquors (Rs. 1,77,154), betel-nuts (1,25,032 maunds), gunny-bags (28,165 pieces), tea, Indian (46,384 maunds), rice (26,231 maunds), and timber (24,192 maunds). On the other hand, the articles which showed a large decrease were treasure (Rs. 8,09,386), coal and coke (41,200 maunds), silk, manufactured (Rs. 25,394), wool manufactured, Indian (Rs. 16,989), salt (14,369 maunds), and stick and other kinds of lac (14,124 maunds).

4. The usual statement showing all the principal articles of traffic carried by this route during the past three years is subjoined :—

The fluctuations of the total Calcutta traffic will be considered elsewhere in this report; a brief notice is given here of the principal fluctuations of the trade so far as other stations are concerned.

5. *Caoutchouc or India-rubber.*—The quantity imported from Assam during the past year was 7,443 maunds, showing a decrease of 2,100 maunds as compared with that of 1883-84, and of 1,561 maunds as compared with 1882-83.

The supply despatched to Calcutta was 6,898 maunds, while only 545 maunds were sent to other places, of which Goalundo imported 528 maunds, and Naraingunge 17 maunds. The former market drew its supply from Goalpara (263 maunds), Seeksagur (200 maunds), Durrung (60 maunds), and Lukhimpore (5 maunds), while Naraingunge received its supply from Chuttack.

6. *Gunny-bags*.—Under this head the total exports to Assam were 1,23,935 bags, against 95,670 bags, in 1883-84, and 1,36,840 bags in 1882-83. Last year the supply exported from Calcutta was 86,380 bags, and of the remainder, 25,700 bags were carried from Serajgunge, and 11,855 bags from Naraingunge.

7. *Gram and Pulse*.—The total quantity carried to Assam fell by 5,380 maunds as compared with 1883-84, and by 19,583 maunds as compared with 1882-83. Out of the total supply during the past year, Calcutta contributed 91,620 maunds, Goalundo 13,589 maunds, Serajgunge 4,320 maunds, and Naraingunge 602 maunds.

8. *Rice*.—The exportation of rice to Assam aggregated 4,04,920 maunds in 1882-83, 3,63,242 maunds in 1883-84, and 4,19,416 maunds in 1884-85. Of the past year's supply, 1,31,434 maunds were shipped from Calcutta, 2,05,566 maunds from Goalundo, 72,519 maunds from Serajgunge, 8,200 maunds from Kaligunge in Rungpore, and 1,697 maunds from Naraingunge.

9. *Hides*.—The import traffic under this head showed a considerable increase, namely, 7,178 pieces and 17,531 pieces as compared with the two years 1883-84 and 1882-83, respectively. During the past year, 80 pieces were carried to Calcutta from Assam, 7,926 pieces from Naraingunge, and 2,900 pieces from Goalundo.

10. *Provisions*.—The export traffic under this head amounted to 35,594 maunds, against 30,280 maunds in 1883-84, and 20,674 maunds in 1882-83. The total quantity sent to Assam was 33,704 maunds, of which Calcutta supplied 27,519 maunds, Goalundo 4,627 maunds, and Serajgunge 1,558 maunds.

11. *Tea seed*.—The total imports into Bengal from Assam were 15,428 maunds, against 6,803 maunds in 1883-84, and 6,377 maunds in 1882-83. The supply shipped for Calcutta was 12,371 maunds, and for Goalundo 3,057 maunds.

12. *Treasure*.—The total exports of silver by this route from Bengal amounted in value to Rs. 6,27,054, against Rs. 11,92,390 in 1883-84, and Rs. 5,90,116 in 1882-83. The value of silver carried to Assam during 1884-85 amounted to Rs. 3,57,404, of which Calcutta contributed Rs. 2,74,125, Burrisaul Rs. 62,379, and Nulchitty Rs. 20,900.

**TRAFFIC ON THE BRAHMAPUTRA AND MEGNA RIVERS CARRIED BY THE
STEAMERS OF THE EASTERN BENGAL STATE RAILWAY.**

13. The amount of traffic carried along the Brahmaputra and Megna rivers by the different steamer services of the Eastern Bengal State Railway during the past three years, is shown in the following statement—

	DOWN TRAFFIC.			UP TRAFFIC.			TOTAL.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.

Total { Quantity—Mds.	27,54,996	16,57,547	17,59,986	6,04,263	7,60,207	5,78,736	33,59,149	24,07,814	23,38,722
Value—Rs.	1,50,70,197	1,54,40,809	1,28,50,559	1,29,40,311	1,21,43,205	1,45,74,525	3,10,10,409	2,78,39,014	2,74,25,084

Last year the quantity of merchandise registered was 2·86 per cent. below the trade of 1883-84, and 30·38 per cent. below that of 1882-83. The weight carried downwards rose from 16,57,547 maunds in 1883-84, to 17,59,986 maunds in 1884-85, but the latter figures were less than those of 1882-83 by 9,94,900 maunds. The value of the past year's trade, however, fell by Rs. 25,90,250 as compared with 1883-84. In the up-stream traffic the figures showed a falling off of 1,71,531 maunds in quantity, but an advance of

Rs. 24,26,320 in value as compared with 1883-84, and a decrease of 25,527 maunds in quantity and an increase of Rs. 16,34,313 in value as compared with 1882-83. Of the entire traffic, 93·20 per cent. was carried to and from Calcutta.

14. In the down trade the greatest advance in the past year's traffic as compared with the preceding year is observable in gunnies (2,089,854 bags), mustard seed (98,075 maunds), other fibres, (than jute) raw (31,517 maunds), linseed (17,061 maunds), tilseed (11,435 maunds), and betelnuts (10,256 maunds), while jute showed a decrease of 1,05,180 maunds, hides of 81,278 pieces, raw cotton of 14,282 maunds, and tea, Indian, of 11,104 maunds. The largest increase in the up traffic was in European piece-goods (Rs. 31,47,790), liquors (Rs. 49,420), iron (26,640 maunds), undrained sugar (14,361 maunds), and oils (8,018 maunds), and the largest decrease in Indian piece-goods (Rs. 1,32,880), manufactures of leather (Rs. 2,56,040), hides (29,690 pieces), and drugs and chemicals (Rs. 10,890).

15. *Dacca service*.—The decrease in the quantities carried both ways was 13·81 per cent. as compared with 1883-84, and 38·34 per cent. as compared with 1882-83. The chief staples of merchandise of which this traffic consisted, were—

Chief articles of downward traffic.

16. In the down traffic the largest increase during the past year as compared with 1883-84 was in mustard seed (16,570 maunds), betelnuts (9,298 maunds), and linseed (8,728 maunds), and the largest decrease was in hides (74,838 in number), piece-goods, Indian (Rs. 62,960), raw jute (43,698 maunds), and raw cotton (14,261 maunds). In the up traffic the articles which showed an advance over the figures of the previous year were piece-goods, European (Rs. 20,06,250), liquors (Rs. 39,870), iron (30,438 maunds), and undrained sugar (12,973 maunds), while there was a decrease under leather, manufactured (Rs. 2,40,360), piece-goods, Indian (Rs. 1,36,480), silk manufactured (Rs. 1,06,200), and salt (30,858 maunds).

17. *Serajunge service*.—The total traffic exhibited an increase of 15·89 per cent. as compared with 1883-84, and a falling off of 19·40 per cent. as compared with 1882-83. The following statement shows all the principal articles carried by this service during the past three years—

Chief articles of downward traffic.

18. Of the chief articles of trade in the down traffic, gunny-bags showed an increase of 2,083,546 in number as compared with the previous year, mustard seed of 81,426 maunds, tilseed of 11,482 maunds, and linseed of 7,837 maunds. In raw jute there was a falling off of 61,482 maunds, and in hides of 11,170 pieces. As regards the up traffic, the articles which showed an increase over the trade of the previous year were European cotton piece-goods (Rs. 3,52,224) and salt (28,405 maunds), while manufactures of leather showed a decrease of Rs. 14,420 in value.

19. *Cachar service.*—The gross quantity carried showed a decrease of 11·22 per cent. and 8·74 per cent. as compared with the figures of the two years 1883-84 and 1882-83, respectively. The following abstract shows the quantity and value of the principal articles of traffic conveyed during the past three years—

Chief articles of downward traffic.

ARTICLES.		Quantity.			Value.		
		1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.

20. The trade in caoutchouc showed a decrease of 163 maunds as compared with 1883-84, that in Indian tea fell from 56,962 maunds to 46,046 maunds, and that in stick lac from 92 maunds to 4 maunds. In the up traffic, European piece-goods showed a considerable increase of Rs. 7,89,316 in value as compared with the previous year, while coal and coke fell by 10,372 maunds.

TRADE OF BENGAL WITH ASSAM CARRIED BY COUNTRY BOATS.

21. The total weight and value of the trade of Bengal with Assam carried by country boats along the Megna and Brahmaputra rivers during the year 1884-85 were as follows—

TRADE OF BENGAL WITH ASSAM.	REGISTERED AT HOYRAH BAZAR.		REGISTERED AT DHUBRI.		TOTAL.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Mds.	Rs.	Mds.	Rs.	Mds.	Rs.
Imports from Assam	44,35,244	56,10,068	10,56,877	28,94,211	54,92,121	85,04,277
Exports to Assam	12,76,228	80,41,116	2,78,688	20,06,768	16,49,066	1,00,47,881

22. These figures show that 80·76 per cent. of the import traffic and 77·33 per cent. of the export traffic followed the Megna route. The necessary arrangements for showing the traffic of Assam with each trade block in Bengal were not completed until the beginning of the second quarter of the year under report, and therefore the distribution of the traffic to and from Bengal, block by block, cannot be given for the whole year. The

abstract below shows the quantity and value of the principal staples registered during the past year—

CHAPTER IX.

INLAND TRADE OF CALCUTTA.

THE inland traffic of Calcutta is registered as it enters or leaves the town by rail, by inland steamer, by country boats, and by road. The result of the past year's registration is shown below as compared with the trade of the preceding two years—

SPECIFICATION OF ROUTES.	IMPORTS.		EXPORTS.		TOTAL.

2. The quantity shown above against rail-borne trade represents the entire weight carried, but as no correct value can be assigned for the head “all other articles of merchandise,” the value shown above against the rail-borne trade does not represent the value of the entire traffic, but only of the trade in those articles enumerated in the revised list of commodities prescribed by the Government of India in January 1884. There was a large increase of 47·40 per cent. in the value of the import trade carried by the East Indian Railway, chiefly owing to an advance in the quantities of opium carried to Calcutta during the past year, the total quantity of this drug having amounted to 1,97,886 maunds, valued at Rs. 25,36,89,852, against 91,761 maunds, valued at Rs. 8,39,47,050 in the previous year. The increase observable in the value of the import trade carried by the Eastern Bengal line was for the most part due to larger quantities of raw jute having been carried during the past year, the total supply brought down by this route having been 48,75,737 maunds valued at Rs. 1,58,46,152, against 32,52,194 maunds valued at Rs. 1,21,95,426 in 1883·84.

COTTON, RAW.

3. The following statement gives the total quantity of raw cotton imported into, and exported from, Calcutta during the past three years—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.

„ road ...	6,711	9,181	8,708	4,682	8,098	3,677
„ sea ...	1,92,121	2,05,682	2,19,212	7,00,703	8,67,173	3,93,652
Total ...	9,96,523	12,66,173	9,04,530	7,28,021	9,30,363	4,46,435

4. The total decrease under imports was 4,60,644 maunds, or 36·41 per cent., as compared with 1883-84, and 1,93,994 maunds, or 19·43 per cent., as compared with 1882-83.

Last year the heavy decline of 4,87,074 maunds, or 49·74 per cent., in the quantities carried by the East Indian Railway was owing to a deficient outturn of the crops in the Upper Provinces. The quality of the crop was of a lower average than usual, and prices also were comparatively high. On the other hand, the Mediterranean ports drew in a greater measure from Bombay the supplies required by the continent of Europe.

5. The following comparative statement shows the importation of raw cotton from the several provinces during the past three years—

					1882-83.	1883-84.	1884-85.
					Mds.	Mds.	Mds.
From the North-Western Provinces and Oudh					6,64,892	9,21,468	4,10,457
"	Bengal	95,335	79,407	95,428
"	Punjab	41,817	55,385	68,725
"	Rajputana	91	167	7,646
"	Other places	1,96,388	2,08,746	2,22,273
Total					9,98,523	12,65,173	8,04,529

There was a great falling off in the imports from the North-Western Provinces and Oudh during the past year. The rains in August and September 1884 in those provinces were incessant and heavy being nearly treble the fall of the preceding year. Cotton, which was then in bud, lost its first balls, and the crop which was subsequently gathered was much inferior in quality. The largest decline was in the quantities received from Cawnpore, Agra, and Bullandshahr, the total imports from which districts were about $4\frac{1}{4}$ lakhs of maunds less than in 1883-84.

Principal railway stations.

6. The supply by rail during the past year was chiefly consigned from the following stations—

Station.			District.			Quantity.		
						Mds.		
Agra	...	Agra	1,51,157
Cawnpore	...	Cawnpore	82,717
Delhi	...	Delhi	54,004
Koorjah	...	Bullandshahr	98,447
Allyghur	...	Allyghur	25,360
Chundowai	...	Mooradabad	17,196
Umballa	...	Umballa	14,650
Etawah	...	Etawah	11,288
Ferozabad	...	Agra	11,206

The supply carried by the steamers of the Eastern Bengal State Railway was 10,274 maunds, out of which 6,259 maunds were shipped from Dacca, and 4,015 maunds from Naraingunge.

7. The quantity of raw cotton imported by sea during the past year was 13,530 maunds in excess of the figures of 1883-84, and 27,091 maunds above those of 1882-83. The imports during the past year comprised 1,75,560 maunds despatched from Bombay, 32,802 maunds from British Burmah, 6,352 maunds from Chittagong, 4,315 maunds from Madras, and 183 maunds from other places.

8. There was a very large decrease in the export trade, amounting to 52·01 per cent., as compared with 1883-84, and 38·68 per cent. as compared with 1882-83. The destination of the exports by sea during the past three years was to the following places—

		1882-83.		1883-84.		1884-85.	
		Cwts.	Mds.	Cwts.	Mds.	Cwts.	Mds.

GRAND TOTAL	...	514,802	7,00,703	637,106	8,67,173	289,214	3,93,652

There was a decline in the exports to foreign countries of nearly 55 per cent. compared with 1883-84, and the past year's figures are the lowest since 1874-75. The shipments to the United Kingdom, France, Italy, and China showed a heavy falling off. The Collector of Customs, Calcutta, writes—

“The decline to the United Kingdom amounted to 50 per cent., though the American crop was not a larger one, and there was during part of the year a fair demand by Lancashire for short stapled cotton in the London market. The circumstances were therefore favourable to exports, but for the shortness and bad quality of the crop. Trade in Lancashire was also in a bad state during the year, which would have a depressing effect upon shipments from this side.

“To France the shipments have declined to trifling figures. The large shipments of the previous year and the stoppage of a line of French steamers that traded between Calcutta and the French ports may account for this. There has been no increase of shipments of cotton to France from the United Kingdom during the past year, the figures for three years being—1882, 103,140 cwts., 1883, 125,374 cwts., 1884, 79,586 cwts. It would appear from these figures and from the smaller shipments from Calcutta that France must have received larger supplies direct from other countries, or that the supplies of the previous years were in excess of consumption. The shipments from Bombay, however, do not show any decline.

“The shipments to Italy have declined after the larger exports of the previous year, and from other ports of India there has also been a falling off.

“The exports of Bengal cotton to China have fallen away still further, and the shipments of last year were very little more than one-fifth of what they were in 1880-81. The decline, which began in 1881-82, has been continuous, and if it goes on in the same ratio, the trade will very soon disappear altogether. Bombay has sent larger supplies to the China market during the last few years, but there was a decline from that port also during the past year. The reason no doubt has been the unsettled state of China owing to the war with France.”

9. The surplus of imports over exports amounted to 3,58,094 maunds,

Quantity not exported before the close of the year. against 3,34,840 maunds in 1883-84, and 2,70,502 maunds in 1882-83.

COTTON TWIST AND YARN.

10. The total quantity of cotton twist and yarn imported into, and exported from, Calcutta during the past three years, was as follows:—

SPECIFICATION OF ROUTES.				IMPORTS.			EXPORTS.

The Collector of Customs, Calcutta, makes the following remarks on the condition of this trade during the past official year—

“All descriptions of twist and yarn, grey and white, Turkey red and coloured, taken together, show an advance in quantity with a decline in the total value. This is due to larger importations of both Turkey red (principally alizarine) and coloured yarn, as the receipts of grey and white show a decline of 18½ per cent. The falling off in grey yarn is distributed among all the counts from s. 25 upwards, the only increase being in counts below s. 24. These coarse counts of yarn, as I mentioned in my last year's report, are for use in the jute mills in Calcutta, and the larger manufacture of jute fabrics during the past year accounts for the increase in their importation. There has been an accumulation in stocks of grey yarn, the quantity in first hands at the close of 1884 being 2,884 bales, against 2,452 bales at the end of 1883. This increase in stocks is, however, confined almost entirely to s. 40, for the higher counts do not show any increase.”

12. There was very little change in the total importation of Indian twist and yarn during the past year as compared with 1883-84, but it showed an increase of 53.86 per cent. when compared with 1882-83. The supply imported by sea was 8.94 per cent. in excess of the figures for 1883-84, and 25.75 per cent. greater than those for 1882-83. The chief port of supply was Bombay; the Collector of Customs, Calcutta, makes the following remarks regarding the imports from that port :—

“The importations of these goods from Bombay again show an advance, and the figures are the largest yet reached. The advance has been a steady one for the past five years. No doubt there has been increased consumption of the coarse count yarns from Bombay, but there was no special demand in the Calcutta market last year to account for this increase, the tendency being rather towards reduced consumption, as the trade in European twist and yarn distinctly shows. I attribute the increase to the unsatisfactory state of the market in Bombay for country-made twist and yarn, leading the spinners there to seek outlets for their production in other quarters. This is also evident from the fact that, notwithstanding the unsettled state of trade in China owing to the war with France, shipments from Bombay to that country were larger in the past than in the previous year.”

The boat traffic, which comprises for the most part the produce of the cotton mills in the vicinity of Calcutta, showed a decrease of 27.24 per cent. as compared with 1883-84. The following statement shows the details of this traffic during the past three years—

PLACE OF SHIPMENT.		1882-83.		1883-84.		1884-85.

The supply imported by the Eastern Bengal State Railway showed an increase of 80·99 per cent. on the returns of 1883-84, and 149·39 per cent. on those of 1882-83. The following are the chief stations from which twist and yarn were consigned to Calcutta during the past two years—

					1883-84.	1884-85.
					Mds.	Mds.
Shamnuggur	30,412	56,883
Rajbaree	1,124	559
Other places	244	132
Total					81,810	57,574

The imports by road routes, however, showed a falling off of 26·82 per cent. as compared with the previous year. The supply brought by these routes represents part of the outturn of the mills in Calcutta and the suburbs.

13. The export trade by internal routes showed a falling off of 5·88 per cent. as compared with 1883-84, but an increase of 1·49 per cent. as compared with 1882-83. The sea-borne exports, however, show an advance of 19·40 and 29·62 per cent. on the figures of the two years 1883-84 and 1882-83, respectively. The distribution of the exports during the past three years, was as follows :—

EXPORTS.

European twist and yarn.

In connection with the sea-borne trade, the Collector writes—

“There has been a considerable advance in the shipments of foreign twist and yarn, and the figures shown are the highest in the table. To Madras the exports advanced by 16 per cent., while to Orissa ports (principally Chandbally) the advance is 39½ per cent. The exports to the Madras Presidency consist principally of coloured and Turkey red, while to Orissa they are principally grey twist. While the use of British cotton twist and yarn is extending in Orissa, it appears that of country twist is declining. To Burma exports show a decline to about the level of 1882-83. These shipments also consist largely of coloured twist, which is dyed in and around Calcutta.”

14. The different marts on river routes to which European twist and yarn were carried largely during the past three years, were as follows :—

Principal river marts.

15. In addition to these supplies, the amount of twist and yarn produced in the cotton mills on the banks of the Hooghly river and sent to Midnapore direct without passing the Port Commissioners' wharves, but intercepted on the Midnapore canals, aggregated 59,899 maunds, against 34,861 maunds in 1883-84, and 48,625 maunds in 1882-83. The total importation of twist into that district, therefore, amounted to 72,106 maunds as shown below :—

		European twist.			Indian twist.			Total.		
		1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.

Total	60,840	54,840	72,106	39,54,000	22,99,001	26,35,845	11,95,700	6,77,450	2,52,190

This statement shows that there was a very large decrease in the importation of country cloths during the past two years. The decline is evidently owing to the keen competition of Manchester and Bombay goods. On the other hand, the importation of twist and yarn into the Midnapore district during the past year showed an increase of over 31 per cent. as compared with 1883-84. It is apparent, therefore, that the past year's supply was utilized chiefly in the manufacture of cheap cloths for the poorer classes within the district. The statistics show that *dhotis* and *uranis* of good quality are not now made to any great extent in the Ghattal Sub-division. The condition of the weaving class, according to the Commissioner of Burdwan, is "most deplorable" throughout the division.

17. Besides Midnapore, the other districts which imported twist and yarn largely from Calcutta are Nuddea (12,953 maunds, against 17,367 maunds), Dacca (20,603 maunds, against 19,428 maunds), and Furreedpore (7,589 maunds, against 7,093 maunds).

Principal railway stations.

18. The exports by rail during the past three years were chiefly consigned to the following stations :—

Stations.	District.	1882-83.	1883-84.	1884-85.
		Mds.	Mds.	Mds.
Cawnpore	Cawnpore	7,086	11,718	12,806
Delhi	Delhi	7,544	4,922	7,197
Tari Ghât	Ghazipore	10,002	8,629	6,102
Goalundo	Furreedpore	4,685	4,960	5,086
Umritsur	Umritsur	6,745	6,274	5,013

Coomercoolly	Nuddea	2,894	2,629	2,657
Raneegunge	Burdwan	2,277	2,547	2,636
Benares	Benares	2,812	2,703	1,979
Loodhiana	Loodhiana	2,403	2,628	1,595
Kishengunge	Nuddea	2,050	1,645	892

The steamer service of the Eastern Bengal State Railway carried 3,196 maunds to Dacca, against 2,772 maunds in the previous year; 2,676 maunds,

against 2,686 maunds to Serajgunge; and 498 maunds against 1,314 maunds to Naraingunge.

19. The exports of Indian twist and yarn showed an advance of 21·41 per cent. on the trade of 1883-84, and 27·58 per cent. on that of 1882-83. The different stations to which twist was carried by the East Indian Railway during the past three years, were as follows:—

Marts.	District.	1882-83.	1883-84.	1884-85.
		Mds.	Mds.	Mds.

GRAND TOTAL ...	4,034,845	48,035	4,186,313	50,875	3,833,737	46,620

The Collector of Customs, Calcutta, writes:—

“The figures show a decline to about the level of 1882-83. British Burmah has, however, taken a larger quantity than in 1883-84, while to the Madras Presidency and to Chandbally the exports have further declined. The shipments to Port Blair amounted to lbs. 40,000 (486 maunds) during the year.”

21. The exports balance the imports with a surplus amounting to 31,352 maunds in 1884-85, against 57,274 maunds in 1883-84. In 1882-83 there was a deficit amounting to 26,471 maunds.

COTTON PIECE-GOODS.

22. The result of the registration of the trade of Calcutta in European cotton piece-goods during the past three years is shown in the following statement—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
By Boat ...	3,300	300	28,01,658	29,05,585	31,39,326
Inland steamer	81,73,814	54,06,430	54,45,510
East Indian Railway ...	1,05,450	1,77,552	1,84,808	9,31,62,375	8,93,15,786	8,61,36,536
Eastern Bengal State Railway	18,530	31,248	1,06,776	2,75,42,006	2,67,01,624	3,00,35,248

Sea ...	11,24,54,745	11,30,47,697	10,96,42,248	45,44,199	54,42,468	69,51,244
Total ...	11,36,24,320	11,32,55,868	10,99,70,860	13,80,25,006	13,44,62,370	13,77,59,440

23. The figures given in the foregoing statement represent declared values in all cases, except consignments carried by railway and by inland steamers. Piece-goods carried by these two routes are registered by weight only, and for the purposes of the present report, the values have been calculated at Rs. 72 per maund—the rate adopted in the report for 1883-84. Under the orders of the Government of India, both European and Indian piece-goods have been shewn in the railway returns from the commencement of the past year in maunds, a distinction being made between goods carried in bales and in boxes, in order to facilitate the valuation of these goods, as piece-goods packed in boxes are considerably more valuable than those sent in bales. The Government of India have, however, added that these distinctions should be adhered to only in the returns prepared in railway offices, but need not be followed in the provincial annual reports, as they have served their purpose as soon as the valuation has been effected. Agreeably to these instructions the Collectors of 12 selected districts were directed to report the average wholesale prices of piece-goods per bale and per box, but the result of the enquiries made has been entirely infructuous, and the Government of Bengal is of opinion that in order that a correct valuation of the trade in these goods and certain other goods for statistical purposes may be arrived at, arrangement should be made to record in the railway invoice the declared value of the goods carried. A separate communication on this subject has been submitted to the Government of India.

24. The figures given against the imports by sea represent the total clearances for consumption from shipboard and from bond. The supply during the past year was 3.01 per cent. below the figures for 1883-84 and 2.50 per cent. below those for 1882-83. The different ports which contributed to the trade during those years were as follows:—

				Imports by sea.		
				1882-83.	1883-84.	1884-85.
				Rs.	Rs.	Rs.
Foreign ports—						
United Kingdom	11,17,86,893	11,21,09,273	10,86,78,696
Other Foreign ports	3,34,614	6,57,579	6,44,324

Madras	47,904	42,741	70,083
Other ports in Madras	6,351	651	3,200
British Burma	54,904	19,994	47,353
Other Indian ports	17,296	1,500	2,850
Total of interportal trade				3,33,238	2,80,845	3,19,322
GRAND TOTAL				11,24,54,745	11,30,47,697	10,96,42,342

25. The Collector of Customs thus explains the falling off in the trade—

“The principal cause of the bad trade of the year is said to be over-production, the consuming markets not being able to take off the immense outturn of Lancashire at profitable rates. This has been so brought home to the manufacturers that they have, by closing mills or working short time, individually been trying to reduce their losses. There was no concerted action in this matter, but each manufacturer took the opportunity of reducing his outturn as it suited him best. This reduction in the outturn has no doubt prevented prices falling lower than they have done, but notwithstanding this the losses must have been heavy, especially at about the close of 1884, when there was an advance in the price of cotton unaccompanied by a corresponding increase in the value of the manufactured article. Calcutta has been kept well supplied with all descriptions of cotton goods; in fact with more than the market has been able to take off, for there have been accumulations of stocks of nearly all kinds. The trade here has generally not been profitable during the past year, for prices have been low, and in many instances there must have been heavy losses. This depression has been especially felt at the close of the year, for the complications with Russia on the Afghan frontier had the effect of making the dealers cautious, and they refrained, as far as possible, from operations, pending the settlement of the question. Sales were most difficult to make, and transactions were on the very smallest scale. No doubt with the cessation of these political complications there will be a resumption of business.

Then, again, the fall in the price of silver made business in imports more difficult, for such a fall means an immediate addition to the rupee price of the goods which the dealers in most cases have been very unwilling to pay. Marked fluctuations in the price of the metal have very much unsettled the trade during the latter portion of the past year, for there has been no possibility of making a safe calculation. It is not a matter of very great moment to the importers of these goods at what rate silver may be sold so long as there are no violent fluctuations."

26. The increase last year in the export trade was 2·44 per cent. on the figures of 1883-84, but there was a decrease of 0·86 per cent. as compared with 1882-83. The supply carried by rail, which amounted to 84·39 per cent. of the total trade, was 1·06 per cent. more than in 1883-84, and 3·70 per cent. less than in 1882-83. In the case of the East Indian Railway, however, the traffic fell off by 3·50 per cent. as compared with 1883-84, but the Eastern Bengal State Railway figures showed a rise of 16·94 per cent. The steamer figures are 12·33 per cent. and 15·53 per cent. more than those of 1883-84 and 1882-83 respectively. The exports by country boat were 8·06 and 12·07 per cent. more than in 1883-84 and 1882-83 respectively. The road traffic was 15·91 and 14·12 per cent. less than in 1883-84 and 1882-83 respectively. The supply consigned by sea was 22·23 per cent. in excess of that of 1883-84, and 43·87 per cent. over that of 1882-83. The different provinces to which European piece-goods were carried during the past three years are shown in the following statement—

Exports from Calcutta.			
	1882-83.	1883-84.	1884-85.
	Rs.	Rs.	Rs.
To Bengal	4,38,93,173	4,29,50,319	4,54,53,083
" Behar	3,61,60,484	3,30,81,806	3,44,47,604

" Foreign ports	83,847	1,79,947	1,57,298
" Bombay	1,13,259	1,46,855	63,027
" Other Indian ports	27,316	36,109	42,697
" Southern India	39,168	8,712
Total	13,89,35,066	13,44,62,270	13,77,39,440

27. After adding 25 per cent. to the total clearances for consumption from shipboard and from bond on account of understatement of values, insurance, landing charges, &c., &c., the total of the year's traffic by all routes would be raised to Rs. 13,73,81,445. The value of piece-goods exported amounts to Rs. 13,77,39,440, exhibiting an increase of Rs. 3,57,995 over the figures of imports. In 1883-84, however, there was a surplus of imports over exports to the extent of Rs. 70,58,522 against Rs. 18,02,940 in 1882-83.

28. European piece-goods were carried to the value below named in the last three years from Calcutta to the different revenue divisions comprised in Bengal proper—

	1882-83.	1883-84.	1884-85.
	Rs.	Rs.	Rs.
Burdwan Division (excluding Howrah) ...	71,84,046	73,11,450	72,46,019
Presidency Division (excluding Calcutta and the Suburbs)	93,35,976	92,64,263	92,48,726
Rajshahye Division	1,20,35,874	1,18,70,093	1,32,23,714
Dacca Division	1,39,23,745	1,30,42,071	1,41,38,858
Chittagong Division	14,63,532	14,62,442	15,95,766
Chota Nagpore Division	14,53,500	14,12,852	14,34,980
Total	4,53,48,678	4,43,62,671	4,68,88,043

The value of piece-goods carried by rail to Bengal from places other than Calcutta during those years was—

	1882-83.	1883-84.	1884-85.
	Rs.	Rs.	Rs.
From Behar	5,550	7,992	1,512
„ North-Western Provinces and Oudh ...	2,326	648	2,664
„ Bombay	1,275
Total ...	9,150	8,640	4,176

Besides these, the imports into Chittagong from foreign and Indian ports other than Calcutta were Rs. 3,07,519, against Rs. 3,15,792 in 1883-84 and Rs. 2,91,760 in 1882-83. The aggregate value of imports into Bengal, therefore, amounted to Rs. 4,71,99,738, against Rs. 4,46,87,103 in 1883-84 and Rs. 4,56,47,583 in 1882-83.

Exports. 29. The total value of piece-goods exported from Bengal by rail and by road during the past three years was as follows—

	1882-83.	1883-84.	1884-85.
	Rs.	Rs.	Rs.
To Behar (by rail)	21,000	23,616	18,072
„ North-Western Provinces and Oudh ... (do.)	5,025	501	144
„ Punjab (do.)	1,800	576	504
„ Rajputana (do.)	450	576	288
„ Bombay (do.)	150
„ Southern India (do.)	72
„ Nepal, Sikkim, and Bhutan ... (by road)	7,69,694	6,09,029	5,37,618
Total ...	7,98,119	6,34,372	5,56,626

30. The excess of imports over exports amounted, therefore, to Rs. 4,66,43,112, which, among a population of 40,419,594 souls, would give an average consumption of Rs. 1-2-5 per head; against Rs. 1-1-5 in 1883-84, and Rs. 1-1-9 in 1882-83.

31. The total amount of piece-goods consigned to the province of Behar from Calcutta during the past three years, follows—

Trade of Behar—Imports.

	1882-83.	1883-84.	1884-85.
	Rs.	Rs.	Rs.
Patna Division	2,61,03,734	2,33,62,664	2,51,51,972
Bhagulpore Division	1,00,56,750	96,69,142	92,95,632
Total ...	3,61,60,484	3,30,31,806	3,44,47,604

The importation of piece-goods into Behar by rail from other markets during the past three years, was—

	1882-83.	1883-84.	1884-85.
	Rs.	Rs.	Rs.
From Bengal (excluding Calcutta) ...	21,000	23,616	18,072
„ North-Western Provinces and Oudh ...	23,326	26,280	30,816
„ Punjab	2,925	72
„ Central Provinces	600	360	504
„ Bombay	35,325	76,536	84,096
Total ...	63,175	1,26,792	1,33,560

The gross imports into the province were therefore Rs. 3,45,81,164, against Rs. 3,31,58,598 in 1883-84, and Rs. 3,62,43,659 in 1882-83.

32. The amount of piece-goods exported from this province by rail and by road during the past three years is shown below—

				1882-83.	1883-84.	1884-85.
				Rs.	Rs.	Rs.
To Howrah	(by rail)	20,775	23,544	9,144
" Bengal	(do.)	5,550	7,992	1,512
" North-Western Provinces and Oudh	(do.)	24,600	25,344	29,304
" Punjab	(do.)	3,225	6,336	7,832
" Rajputana	(do.)	1,050	1,296	4,896
" Central Provinces	(do.)	675	315
" Bombay	(do.)	375	72	360
" Southern India	(do.)	144
" Nepal	(by road)	11,12,014	15,89,261	14,20,135
Total				11,68,264	16,53,989	14,73,199

33. After deducting exports from imports, the value of piece-goods left for consumption in Behar amounted to Rs. 3,31,07,965 during the past year. This would give a rate of Rs. 1-6-11 per head on a population of 23,127,104 souls, against Rs. 5-9 in 1883-84, and Rs. 1-8-3 in 1882-83.

Trade of Orissa.

The total value of piece-goods imported into Orissa during the past three years was as follows—

		1882-83.	1883-84.	1884-85.
		Rs.	Rs.	Rs.
From Calcutta	...	10,42,646	10,40,076	15,80,029
" other Indian ports	...	1,519	7,621
Total		10,44,365	10,47,697	15,80,029

34. The exports from this province during the past year were valued at Rs. 2,740, and the balance, amounting to Rs. 15,77,289, gives an average yearly local consumption of As. 4-10 per head on a population of 5,199,877 souls, against As. 3-2 in 1883-84, and As. 3-3 in 1882-83.

35. The amount of piece-goods sent to Assam from Calcutta was Rs. 66,81,457, against Rs. 44,52,178 in 1883-84, and Rs. 47,34,505 in 1882-83.

Trade of Calcutta with Assam.

Trade of Bengal with the Upper Provinces.

36. The piece-goods trade between Bengal and the Upper Provinces during the past three years is shown below—

				Imports into Bengal.			
				Into Calcutta.	Into Bengal.	Into Behar.	Total.
				Rs.	Rs.	Rs.	Rs.
North-Western Provinces and Oudh	1882-83	30,975	2,325	23,325	56,625

41. As in 1883-84 so in the past year, there were six cotton mills at work in Bengal, namely, two in Howrah and four in the 24-Pergunnahs district; but in none of them were piece-goods manufactured during the year. As regards hand-made cloths, the local reports show that the industry is steadily declining. The Commissioner of Burdwan makes the following remarks on the condition of hand-loom manufacture in his division—

“The manufacture of cotton cloth is everywhere fast declining, owing to the competition of Manchester goods. It is only the natives of the upper class who still use country-made cloths, which are dearer but more durable than the English manufacture. The number of such upper class men is not large, and as many of them have adopted European dress, the demand for country-wove cloth is small. The condition of the weaving class is therefore most deplorable, and the prospects of the industry so hopeless that some have been induced to give up the industry and betake themselves to other professions. Good qualities of *dhoties* and *urans* are still manufactured in the districts of Hooghly and Howrah, and also in the Ghattal sub-division in Midnapore, and are much prized by native gentlemen. In the Jehanabad sub-division alone, it is said about Rs. 1,11,500 worth of clothes are sold every year. Howrah hât is the centre of the business and receives imports from other places. The Magistrate of Howrah reports that he has learnt from the proprietors of the hât that the sales of country-made cloths in that market amount to 18 lakhs of rupees a year, and are effected principally in the month of September on the occasion of the Doorga Poojah.”

42. The Commissioner of the Rajshahye Division states that "this industry, which is a principal one in the Pubna district, continues to improve and contribute to the well-being of the weaving class. In other districts the article is manufactured principally for local consumption." The report of the Dacca Division shows that the "weaving for which Dacca was so celebrated is gradually dying out, as people do not care to pay for such expensive products." In Furreedpore "cloth-weaving, though not very flourishing, is still carried on on a large scale. The cloth made is generally very coarse, but is liked by the masses for its durability." In Backergunge "cotton cloth, such as *dhoties*, *chadars*, gauzes for curtains of fine texture, have begun to be manufactured by the native weavers of Madhabpasha, Shidhipasa, Uzirpore, and these articles command an extensive sale." Regarding Mymensingh, the Commissioner writes—

"The principal indigenous manufacture, viz. that of country cloth, is in a declining state, and the weavers have lost their trade by the introduction of European and Bombay cotton piece-goods. In the Kishoregunge sub-division some finemuslin, *tanjeb*, and other cloths of good quality are still made to a small extent. It is stated that the weavers have mostly given up their trade and taken to agriculture. This is the case in every district."

43. Regarding Chittagong, the Commissioner writes—

"Weaving is reported by the Magistrate as a declining industry, but it is in a much better state than in most districts. Nearly every man wears locally-woven clothes made, however, chiefly from imported thread. In another part of his report the Magistrate states that the Mahomedan weavers still hold their own. Further proof of the quantity of home-woven cloth that is consumed is to be found in the fact that while the consumption of English piece-goods is calculated to be Rs. 3-8 a head per annum in Tipperah, it is only Rs. 1-8 in Chittagong."

44. The Commissioner of the Bhagulpore Division writes—

"The manufacture of coarse country cloth is declining gradually in consequence of the introduction of the English yarn. Country-made cloths are still, however, largely made for local consumption. The Momins of the Sonthal Pergunnahs carry on a considerable amount of business. The Sonthals prefer this country cloth for ordinary wear, as it is stronger and wears better than the cheap European fabrics, which they buy for holiday attire."

INDIGO.

45. The indigo trade of Calcutta during the past year, as compared with that of the preceding two years, was as follows :—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.

The result of the past year's registration exhibited a small increase in the import trade, and a slight falling off in the export trade. The estimated out-turn of the year's crop was a little over that of the previous year; but, as regards the quality, it is said that there was certainly less fine indigo in the Bengal and Behar markets than was the case last year. The quality of the indigo manufactured at Benares and Oudh was also generally disappointing, really good consignments of either being exceptionally few. On the other hand, the prices of indigo were low, averaging, according to the Customs returns, only Rs. 209 per maund, against Rs. 225 in 1883-84, and Rs. 223 in 1882-83. The Collector of Customs, writes—

"The average price, it will be seen, has fallen to the lowest point touched for many years. At the beginning of the season prices were much lower than in the previous year, and throughout the demand was languid for nearly all descriptions, except occasionally for the better sorts. The quality of the crop generally was not up to the average."

46. The quantity of indigo brought to Calcutta during the past year was 3.85 per cent. in excess of the imports during the preceding year, and 13.03 per cent. above those

Imports.

of 1882-83. The bulk of this traffic is rail-borne; the supply conveyed by the East Indian Railway was 2·16 and 13·73 per cent. in excess of that carried during the two years 1883-84 and 1882-83, respectively; while the Eastern Bengal State Railway figures also shewed an increase of 19·48 and 10·21 per cent. as compared with the two previous years. The sources of supply, classified by provinces, were :—

		1882-83.	1883-84.	1884-85.
		Mds.	Mds.	Mds.
North-Western Provinces and Oudh	...	64,944	73,939	71,861

Total	...	1,37,883	1,50,074	1,55,851

47. According to Messrs. Moran and Company's market report the past season in the Benares division was more favourable on the whole than was 1883-84. The estimated outturn from the European factories exceeded that of 1883-84 by over 1,100 maunds. So far as the outturn in the native factories is concerned, reports from Azimgurh, Ghazipore, Jounpore, &c., show that more land was under cultivation last year than the year before, and the estimated produce was 3,000 maunds in excess of the preceding year's figures. The yield in the Doab in 1884-85 is said to have been slightly more than that of the previous season. There was a very large increase in the native cultivation in the Doab, and had the yield from the plant been as good as it was in 1883-84, there would have been an enormous outturn from this quarter. As regards Behar, the total production was nearly equal to that of 1883-84, but owing to scanty rainfall there was a great falling off in the supplies from Chupra. In Lower Bengal, however, the yield of the season's crop was a little in excess of that of the previous year.

48. In the export trade, there was a decrease of 2·24 per cent. in the supplies carried during the past year as compared with 1883-84, but an increase of 6·72 per cent. is shown when compared with 1882-83. The destination of the indigo exported by sea from Calcutta is shewn in the following statement :—

The exports of indigo to foreign countries fell off by 3½ per cent. as compared with 1883-84, but the figures are above the average of the five previous years. The Collector of Customs writes—

“To the United Kingdom the decrease amounts to 13 per cent. This may be owing to the low prices that ruled at the auction sales in London during the last year, and to shipments being despatched direct to the consuming countries instead of through the United Kingdom. When it was known that the crop to be shipped from Calcutta was again large, holders became desirous of realizing, and a fall in prices was the result. No doubt also the general depression in trade had some effect in producing the heavy fall in values which in some descriptions was as much as 18 to 20 per cent. compared with rates ruling at the corresponding time of the previous year.

“There has not, however, it is said, been any special increase in consumption, notwithstanding the low prices ruling, as stocks in the whole of Europe (including London) were estimated to be about 5,000 chests in excess of what they were last year. Unless there is a general revival in trade, the large crop just sent forward will probably not realize higher prices than the one before it.”

49. During the year under report, the surplus of imports over exports was 8,824 maunds. In 1883-84 the exports exceeded the imports by 320 maunds, while in 1882-83 the excess of imports over exports amounted to 111 maunds.

JUTE, RAW.

50. The total quantity of raw jute carried to, and from, Calcutta by all routes during the past three years, was as follows—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.

51. The imports showed an advance of 23,94,011 maunds on the trade of 1883-84, and a decrease of 24,76,968 maunds as compared with that of 1882-83. The quantity sent to Calcutta by country boats was almost the same as in the previous year. The increase in the imports by the Eastern Bengal State Railway was 49·92 per cent., and that by inland steamers, 45·99 per cent. The Collector of Customs, Calcutta, makes the following remarks on the condition of the jute trade—

“It was at one time anticipated that the crop would be quite as large as in the year 1882-83, which was the largest ever known, but in the end, though large, it was not up to the level of that year. The quality of the jute was not satisfactory, the bulk of the crop being very inferior.

“The jute trade in Dundee has not been in a flourishing condition in the past year, though the price of the raw material was fairly low during a considerable portion of it. As in Calcutta, a large increase in the outturn, due to additions made to mills already working, resulted in very low prices for both jute yarn and cloths; the supply of these

exceeded the demand. The keen competition from Calcutta is no doubt being felt in markets that in former years were principally supplied by Dundee, and the competition of continental mills will also have had an adverse effect."

52. The Commissioner of the Dacca Division states that there was a very good jute crop in Dacca, Furreedpore, and Mymensingh. Owing to the abundant crop grown during the year, prices in the division fell from Rs. 4-12 to Rs. 2-8 a maund. There was no alteration in the course of the trade; most of the jute was exported to Chittagong by sloops and schooners, and to Calcutta by the Eastern Bengal State Railway, by inland steamers, and by country boats. Several jute mills are at work at Naraingunge and one at Dacca.

53. The other principal seat of the jute industry in Bengal is the Rajshahye Division. Next to rice, jute is the most important crop in the division. It is grown more or less in all the districts, and is largely exported. In Rajshahye the outturn slightly increased for the year, in Julpigoree it was much the same as in the preceding year, and in the other districts the yield was rather less than in 1883-84. In the trade and commerce section of his administration report for 1884-85, the Commissioner writes—

"The trade in jute flourished in the division notwithstanding the deficient rainfall of the year. In addition to a good crop in some of the producing districts, the traders, it is said, had kept in reserve a large stock of the previous year's produce in expectation of high prices, and the demand in Calcutta having risen, an impetus was given to the business.

"From the railway stations in Dinapore 70,633 maunds were sent, while the produce of the northern tract, where jute is the principal crop, found its way to Damer and Huldibari stations for export. The Durwani station also attracted some portion of the traffic. The quantity exported from these stations is stated to have been 3,65,049 maunds, but it presumably includes a good portion of the Rungpore jute.

"In Rajshahye, where less jute is grown than in some other districts, the chief centre of the trade is Nowgong, whence 2,31,650 maunds were exported by rail to Calcutta and about 16,000 maunds from elsewhere.

"At Serajunge there was depression in the trade, for which no sufficient reason has been furnished by the Collector. A portion of the traffic may, however, have been diverted to Bera—a rising place conveniently situated at the junction of the Oorasagar, the Bural, and the Echamutty. The goods from these places are taken by boats or steamers to Goalundo or to Calcutta direct.

"The trade in Bogra seems to have developed during the year beyond expectation: 1,43,960 maunds, or nearly the whole estimated export of the previous year, were carried by railway from the northern part of the district, while the whole produce of the eastern part was borne by water to Goalundo.

"In Rungpore there was also improvement, though the degree of it cannot be ascertained from what the Collector says on the subject.

"The Julpigoree jute seems to be regarded as better in quality than that produced in the southern districts, and this has no doubt contributed to the development of the trade, which is chiefly rail-borne.

"About 40,000 maunds of jute appear to have been exported from Darjeeling during the year."

54. The principal jute-producing tracts in the Purneah district of the Bhagulpur Division are in the Kishengunge and sudder sub-divisions. Last year the exports of jute from those parts as well as from the Arrareah sub-division was larger than in the previous year. It is said that the "ryots have brought an unprecedentedly large area of land under jute and mustard, and thus have been able to recoup themselves to a considerable extent for the losses they sustained by the partial failure of the *bhadoi* and *aghani* crops." The Collector writes—

"The sub-divisional officer of Kishengunge reports that during the past year a large part of the jute trade of his sub-division was taken to the Northern Bengal State Railway by a village road going from Ranigunge to Fattelpur Hat and thence to the railway station at Daigong in the district of Dinapore. The route hitherto used was by wagon to Siligoree, and by rail to Daigong, from which place the jute reaches its destination—Calcutta. The merchants have thus been saved a good deal of expense. The sub-divisional officer is of opinion that if this road is metalled most of the jute, mustard, and tobacco traffic in the police station of Kaligunge would pass by this line. The opening of this shorter cut has already, the officer remarks, affected the trade of Dulalgunge and Pichla in the sub-division, where the Bengali *mahajans* have mostly taken up their *golahs* or stores. When the line from Dinapore to Purneah is opened, a most important change will, I believe, directly take place in the trade routes of the district."

55. The different districts from which raw jute was largely consigned for Calcutta during the past three years are shown below, the quantities imported by railway being also given.

Principal supplying districts.

Other districts	95,096	78,973	65,930				
Total	1,55,30,404	1,06,59,425	1,30,63,430	Total	70,01,980	32,82,194	46,79,448

These figures show that the percentage of imports by rail to the total trade was 37·37, against 30·51 in 1883-84, and 45·08 in 1882-83. The districts from which the consignments showed an increase of over 50,000 maunds as compared with 1883-84 were Furreedpore (13,95,350 maunds), Dacca (7,06,547 maunds), Rungpore (2,27,681 maunds), Jessore (1,93,725 maunds), Rajshahye (89,500 maunds), Nuddea (86,712 maunds), and Dinagoree (59,759 maunds). The causes of increase in these districts have been explained in the preceding paragraphs. As regards the falling off of 1,13,559 maunds in the exports from the 24-Pergunnahs, the Collector states that "the jute crop harvested during the year was not sufficient even to meet the local demands, and consequently the growers were not in a position to send out more than the quantity which their stocks permitted."

56. The principal river marts whence large supplies of jute were carried by country boats during the past three years, were—

Marts.	Districts.	1882-83. Mds.	1883-84. Mds.	1884-85. Mds.
Serajgunge	Pubna	15,15,078	12,85,094	11,03,035

Dacca ...	Dacca ...	33,985	4,499	39,382
Dhubri ...	Goalpara ...	73,122	25,672	38,643

Principal marts on road routes.

59. The imports by road routes during the past three years were chiefly consigned from the following marts—

	1882-83. Mds.	1883-84. Mds.	1884-85. Mds.
In the 24-Pergunnahs { Baraset ...	1,72,062	2,90,643	2,97,725
{ Bussacrhath ...	77,017	1,45,786	95,393
{ Rajah's Hat ...	32,069	39,568	24,198

60. The quantity of raw jute exported during the year showed an advance of 21·06 per cent. on the returns of 1883-84, but a decrease of 19·17 per cent. as compared with those of 1882-83. The bulk of this trade was sea-borne, and its destination was as follows—

	1882-83.		1883-84.		1884-85.	
	Cwts.	Mds.	Cwts.	Mds.	Cwts.	Mds.
To Foreign ports ...	9,191,884	1,25,11,195	5,953,147	81,02,894	7,305,391	99,43,449
„ Indian „ ...	59,488	80,972	56,630	77,080	58,016	78,966
Total ...	9,251,372	1,25,92,167	6,009,777	81,79,974	7,363,407	1,00,22,415

During 1883-84 the decrease in the exports was due to a short crop; but with the larger outturn during the past year, there was an advance in shipments to foreign ports of about 22½ per cent. The Collector of Customs, Calcutta, writes—

“Following the larger crop, exports to all countries consuming this article, except Australia, show increased figures. To the United Kingdom the advance is 14 per cent., to Austria 69 per cent., and to the United States 33½ per cent.”

61. The quantity of raw jute not exported before the close of the year was 26,88,235 maunds, against 20,97,527 maunds in 1883-84, and 27,06,532 maunds in 1882-83.

GUNNY-BAGS.

62. The total number of gunny-bags carried to, and from, Calcutta during the past three years is shown in the following statement:—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.

Total ...	29,061,908	24,311,816	18,196,002	123,314,752	125,478,193	137,870,318

63. The registration of gunny-bags carried by boat, road, and sea is effected according to number, but in the case of railways, the quantities are returned in maunds, and the conversion of maunds into number is made at the rate of 35 bags to a maund. The trade showed a great development during the past year; but the industry was carried on at a considerable loss to the manufacturers owing to over-production of, and low prices for, bags.

64. The import trade showed a decrease of 25·15 per cent. as compared with 1883-84, and of 37·38 per cent. as compared with 1882-83. The boat traffic exhibited a heavy falling off of 50·65 per cent. as compared with 1883-84; the traffic on the Eastern Bengal State Railway showed an increase of 11·03 per cent., and that on the East Indian Railway of 27·58 per cent. The supply carried by the Eastern Bengal line included 4,427,185 bags consigned *via* the Northern Bengal line against 4,671,660 bags in 1883-84, and 9,104,413 bags in 1882-83. Regarding the manufacture of, and trade in, gunnies, the Commissioner of the Rajshahye Division writes:—

“*Jute cloth and bags.*—These continue to be extensively manufactured in Dinagore and Pubna. In Julpigoree and Darjeeling the manufacture of gunny-bags is on the increase, the former district alone having exported 10,880 maunds by railway from June 1884 to March 1885. There was a large increase in the quantity manufactured at the Serajgunge jute mills, where about 19,000,000 yards were made during the year—a result due to uninterrupted work at the mills and extension of buildings and machinery. In the Nilphamaree sub-division, in Rungpore, gunny-cloth and bags are manufactured for local use and exportation. The manufacture of this article is carried on on a large scale in the north-western part of the division, comprising the northern portion of Dinagore, the Nilphamaree sub-division of Rungpore, Julpigoree, and the Darjeeling Terai.

“The trade in these articles, which is largely carried on at Serajgunge, in Pubna, Dinagore, and Julpigoree, and to a limited extent in Bogra, appears to continue in the same state as before. In regard to the trade in Julpigoree, Mr. Dalton writes: ‘This being a great jute-producing district, I have endeavoured to find out whether the export of raw jute or of gunny-bags is most paying to the producer. Some people say that the sale of raw jute pays them best. I think it likely that inferior jute, which is not likely to command a high price, is manufactured into gunny-bags.’ These articles continue to be largely exported.

“Thirty thousand gunny-bags of local manufacture are said to have been exported from Darjeeling.”

65. The districts which despatched gunnies in large quantities to Calcutta during the past three years, are shown below—

1	2	3	4	5	6	7	8	9	10

Dinapore ...	Dinapore	394,905
Chilahati ...	Julpigoree ...	699,335	423,676	274,995

The steamer service of the Eastern Bengal State Railway carried 5,584,810 bags from Serajgunge, against 3,559,971 bags in 1883-84, and 3,384,591 bags in 1882-83.

68. The number of bags exported during the year showed an advance of 9·87 per cent. over the trade of 1883-84, and 11·82 per cent. in excess of that of 1882-83. The total exportation by sea during those years is shown below—

The Collector of Customs, Calcutta, writes:—

“The exports of jute gunny-bags during the last year were the largest since the trade began, being in advance of 1883-84, also a year of large exports, by 30½ per cent. Increased shipments were made to the United Kingdom, the United States, Egypt, the Straits Settlements, Australia, and to other countries, the only decline shown in the above table being to Hong-Kong. There has, however, been a decline to the United States taking the shipments to Hong-Kong, which eventually go to America.

“Under ordinary circumstances such a large development of any trade should indicate that the trade is in a prosperous condition, but it is very far from being the case in this

instance. The increase in exports shown, unfortunately represents over production ; the outturn had somehow to be disposed of, but it could not be disposed of profitably. The prosperous condition of the jute-manufacturing industry in 1882-83 brought about more mills and large increases in the producing capacity of those in existence, and the extra quantity of the manufactured article to be disposed of has accentuated the depression that began in 1883-84. The crop of jute last year, though large, did not reduce the cost of production sufficiently to ensure profits, for prices of bags also fell, with the result that nearly all the mills during the past year have been working at a loss, and in one case the company has gone into liquidation."

69. Out of the total exports by internal routes, 14 were carried during the past year by the East Indian R. , against 18,812,955 bags in 1883-84, and 16,808,855 bags in 1882-83. destination of the exports during the past year was—Patna (2,109,310 bags), Cawnpore (1,713,320 bags), Delhi (1,394,155 bags), Umritsur (878,885 bags), Sonthal Pergunnahs (549,640 bags), Shahabad (461,370 bags), Jubbulpore (417,515 bags), Monghyr (416,465 bags), Allahabad (402,605 bags), Durbhunga (328,930 bags), Agra (315,350 bags), Bhagulpore (304,430 bags), Fyzabad (291,025 bags), Loodhiana (282,360 bags), Allyghur (254,205 bags), Burdwan (248,465 bags), Lahore (212,275 bags), Meerut (210,490 bags), Mirzapore (210,175 bags), and other places (3,301,935 bags). Of the supply exported by country boats, 628,284 bags were consigned to Hooghly, 167,639 bags went to the 24-Pergunnahs, 126,057 bags to Nuddea, 103,563 bags to Midnapore, 60,588 bags to Bhagulpore, and 270,400 bags to other places.

70. If imports be deducted from exports, a deficit of 119,674,316 bags will be found against 101,166,377 bags in 1883-84, and 94,252,844 in 1882-83. The excess of exports over imports is due to the large manufacture of gunny-bags in Calcutta and the Suburbs.

GUNNY-CLOTH.

71. The registered trade of Calcutta in gunny-cloth carried by internal routes during the past three years, was as follows :—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Pieces.	Pieces.	Pieces.	Pieces.	Pieces.	Pieces.
By Boat	32,285	19,724	25,173	30	6	83
„ Eastern Bengal State Railway	120	180	28
„ Road	21,899	7,310	9,664	225	305	201
Total	54,304	26,934	34,836	435	339	284

72. Under the orders of the Government of India gunny-bags and cloth have been shown together since the beginning of the past year in the railway returns. The quantities of gunny-cloth and bags carried by the East Indian Railway had always before been shown in the returns furnished to Government under a head "gunnies." Moreover, while the registration of the road and boat trade is made according to pieces, the sea-borne trade returns show this article in yards. For the purposes of converting pieces into yards, a machine-made piece is taken as equal to 80 yards, and a hand-made piece is equal to 22 yards.

73. The total quantity of the sea-borne trade under this heading during the past three years is shown below :—

	1882-83.	1883-84.	1884-85.
	Yds.	Yds.	Yds.
Imports	21,896	15,944	48,775
Exports	10,202,249	11,010,569	19,923,884

74. The imports by internal routes increased by 29·33 per cent. over those of 1883-84, but they were 35·85 per cent. below the trade of 1882-83. The total trade of the past year

comprised 8,690 pieces of power-loom manufacture, and 26,146 hand-made pieces. The sources of supply were as follows:—

Power-loom Gunny-cloth.

GRAND TOTAL	10,117,559	84,690	10,202,249	10,892,109	118,400	11,010,509	10,847,217	76,067	10,923,894

The large increase shown under gunny-cloth was due to the same causes which operated in the case of gunny-bags, namely, low prices and over-production.

76. The surplus of exports over imports amounted to 18,627,417 yards, against 10,167,037 yards in 1882-83, and 8,123,043 yards in 1883-84; these quantities represent part of the out-turn of the mills in and around Calcutta.

77. In addition to the registered supplies mentioned above, the returns of the Nuddea rivers show that large quantities of power-loom gunny-cloth were sent up-country direct from the neighbouring mills without passing the Port Commissioners' wharves. The following statement shows the total quantity sent to each district by these routes during the past three years:—

78. There are at present 19 jute mills at work in the vicinity of Calcutta. In 18 of them the amount of raw jute worked up during the past year was 38,50,260 maunds. In 1883-84 there were 20 mills, and the quantity of raw jute worked up in 18 of them was 35,73,528 maunds, while the figures for 1882-83 showed the number of mills to be 19 and the quantity of raw jute worked up in 17 of them, 30,76,657 maunds. According to these figures the consumption of raw jute during the past year showed an increase of 7.74 and 25.14 per cent. as compared with the preceding two years, respectively. No statistics, however, are available to show separately how much of the raw material was used in making gunny-cloth and gunny-bags. The statement below shows the number of looms and spindles at work and the quantity of raw jute worked up in the different mills in Hooghly, Howrah, and the 24-Pergunnahs districts, during the past three years:—

Districts.	Total number of mills at work.	NUMBER OF		QUANTITY OF JUTE WORKED UP DURING THE YEAR.		REMARKS.
		Looms.	Spindles.	Owts.	Mds.	
Hooghly	4	1,418	27,593	472,340	6,42,907	a Not given for 2 mills.
Howrah	4	1,453	28,194	708,255	9,61,221	b Ditto 3 mills.
24-Pergunnahs	11	8,685	66,082	1,550,106	22,46,093	c Represents the amount of jute worked up in 18 mills. Figures for the other mill are not available.

FOOD-GRAINS.

79. A general account of the outturn of the harvests of the Lower Provinces, and the prices current of food-grains such as has been hitherto given in this portion of the Internal trade report has been given in Chapter II of the present report.

The partial failure of the rice harvest in Bengal and the slackness of demand for wheat in England had the effect of reducing the food-grain traffic of Bengal to a considerable extent. The statistics show that there was a total decrease of 25.22 per cent. in the importation of food staples into Calcutta as compared with 1883-84, and of 24.66 per cent. as compared with 1882-83, while in the export trade the figures exhibited a fall of 33.91 and 32.29 per cent., respectively. The following statements show the total traffic under each class of food-grains separately during the past three years:—

Imports into Calcutta.						
				1883-83.	1883-84.	1884-85.
				Mds.	Mds.	Mds.
Rice	1,67,62,927	1,34,13,318	1,17,49,985
Paddy	18,90,873	15,53,920	20,68,448
Wheat	73,08,081	1,12,12,086	46,99,141
Gram and pulse	31,61,413	31,72,502	31,47,913
Other spring and rain crops	3,02,865	2,97,110	5,02,594
Total	2,94,26,159	2,96,48,936	2,21,68,081

Exports from Calcutta.						
				1882-83.	1883-84.	1884-85.
				Mds.	Mds.	Mds.
Rice	1,51,08,943	1,16,08,260	95,92,975
Paddy	4,83,773	2,97,334	6,58,477
Wheat	61,26,509	1,04,51,808	35,92,136
Gram and pulse	13,84,002	12,58,142	15,50,938
Other spring and rain crops	1,24,244	1,30,313	2,96,874
Total	2,31,77,471	2,37,45,857	1,56,93,199

A large portion of the difference between these totals went to feed the population of Calcutta.

According to the above figures, the total quantity of food-grains imported into Calcutta and not exported thence before the close of the year under report

showed an increase of 9.69 per cent. as compared with 1883-84, and of 3.63 per cent. in comparison with 1882-83, as detailed below :—

				Surplus of imports over exports.		
				1882-83.	1883-84.	1884-85.
				Mds.	Mds.	Mds.
Rice	16,53,984	18,05,058	21,57,010
Paddy	14,07,100	12,56,586	14,09,871
Wheat	11,81,572	7,60,278	11,07,008
Gram and pulse	18,27,411	19,14,860	15,95,976
Other spring and rain crops	1,78,691	1,66,797	2,02,920
Total	62,48,688	59,03,079	64,74,574

WHEAT.

80. The wheat trade of Calcutta during the past three years is shown below :—

Total ...	73,08,081	1,12,12,086	46,90,141	61,26,509	1,04,51,808	35,92,135

82. The total decrease in the imports amounted to 65,12,945 maunds as compared with the figures of 1883-84, and to 26,08,940 maunds as compared with those of 1882-83. Wheat is brought to Calcutta chiefly by the East Indian Railway, and the returns of that line show a decline of 61.59 per cent. and 38.49 per cent. as compared with the totals of the two years 1883-84 and 1882-83, respectively. The boat traffic also fell off by 33.66 per cent. as compared with 1883-84, and by 21.68 per cent. as compared with 1882-83. The main cause of the decrease was the slackness of demand for this article in the Calcutta market, for export to foreign countries. A good harvest in England combined with large stocks available in America not only considerably lowered the price of this cereal in the English and continental markets, but also checked the export of Indian wheat and caused a depression in trade. The Collector of Customs writes :—

“ Keeping in view that there have also been large exports from Bombay and Kurrachee to the continent, India would appear to have held her own well, in a particularly unfavourable year. She had certainly had low rates of freight and exchange in her favour, but the

trade was not fostered last year by crops below the average in the United States and Europe.

"Notwithstanding the smaller supplies from abroad, the range of prices in the United Kingdom has been the lowest recorded for over a century, the average price for the year being 35s. 8d. per quarter, which has not been touched since 1780. In December the Gazette price quoted was 30s. 5d. per quarter. The low prices are quite sufficient to account for the decline in the shipments from Calcutta. I believe from no country can wheat be profitably laid down in England at such prices, and the falling off in the exports of it in spite of low rates of freight and exchange conclusively show that much of the Indian wheat which finds an outlet from Calcutta cannot. The growers up-country have therefore stored their grain rather than sell it at the low prices that have been offered to them. These stores, however, will have to be sent forward this year, and should there be a closing of the Russian wheat trade, our exports will be still further increased; large purchases of wheat have already been made in view of that contingency."

83. The quantities received from each province during the past three years are shown below:—

	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
North-Western Provinces and Oudh ...	43,33,111	70,47,837	30,81,033
Behar ...	22,42,249	33,54,234	9,91,048
Bengal ...	4,56,696	5,68,100	4,60,676
Punjab ...	2,40,082	2,11,384	1,17,681
Central Provinces... ..	2,587	22,227	31,187
Other places ...	33,356	8,304	17,516
Total ...	73,08,081	1,12,12,086	46,99,141

As compared with 1883-84, the imports during the past year showed the largest falling off under Behar, and the North-Western Provinces and Oudh, viz., 70·45 per cent. and 56·28 per cent., respectively.

84. The districts of the North-Western Provinces and Oudh from which the largest quantities of wheat were imported during the past three years, were:—

	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
Bara Banki ...	3,53,747	6,40,369	5,17,851

Azimghurh ...	42,810	32,712	1,07,968
Other districts ...	10,77,852	12,16,669	2,15,920
Total ...	43,33,111	70,47,837	30,81,033

Compared with 1883-84, the imports during the past year showed a falling off of 83·91 per cent. from Fyzabad; 80·52 per cent. from Shahjehanpore; 70·90 per cent. from Benares; 67·75 per cent. from Meerut; 66·45 per cent. from Bullundshahr; and 58·15 per cent. from Cawnpore. The causes of these fluctuations have already been explained in the extract given above.

85. The districts in Behar which supplied the largest quantities during the past three years, are as follows:—

	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
Shahabad ...	1,94,937	8,18,735	3,56,822
Patna ...	10,48,866	14,19,002	1,77,647
Sonthal Pergunnahs ...	2,66,343	2,35,483	1,54,691
Bhagulpore ...	2,52,157	2,90,333	1,12,004
Maldah ...	58,570	80,039	79,339
Monghyr ...	2,27,188	2,56,020	47,876
Saran ...	93,555	70,910	38,396
Other districts ...	1,01,233	1,83,712	24,273
Total ...	22,42,249	33,54,234	9,91,048

The decline is due to bad harvests and to increased demand for local consumption. The largest decrease was in the export from Patna, Shahabad, Monghyr, and Bhagulpore. The Collector of Patna has recorded the following remarks regarding the wheat trade of his district:—

“Wheat occupies a prominent place in the railway returns, but the figures are altogether misleading as far as the production and consumption of the district are concerned. Very little wheat is produced in the district, and a considerable quantity is imported. The exports are really the produce of other districts to the west and north of Patna, which is conveyed to the Patna market by river and thence despatched by rail both eastward and westward.”

“During the past year considerable relief was afforded to the tracts affected by drought in that portion of the district by the timely despatch of wheat, and the railway returns show that nearly half of the total quantity shown as imported was consigned to Patna, which is the railway station for Behar.”

As regards the trade in this staple in the Bhagulpore district, the Collector writes as follows:—

“The export of wheat is gradually decreasing. There are two reasons for the falling off—(1st) the market at Calcutta was overstocked; (2nd) that the wheat of this district is generally either red wheat, or an admixture of red and white; both of these kinds are of inferior quality, and cannot command a good sale in the market.”

86. The bulk of the Bengal supply of wheat was, as usual, comprised of exports from Nuddea 2,38,825 maunds, Moorshedabad 72,625 maunds, and from Hooghly 59,510 maunds.

87. The consignments from railway stations which despatched 30,000 maunds and upwards during the past year are compared below with the figures of the two previous years:—

Jungypore	Moorshedabad	3,446	8,132	10,497

89. The figures of the export trade show a decline of 68,59,673 maunds as compared with 1883-84, and of 25,34,374 maunds as compared with 1882-83. The details of the sea-borne trade are as follows:—

	1882-83.		1883-84.		1884-85.	
	Cwts.	Mds.	Cwts.	Mds.	Cwts.	Mds.
To Foreign Ports	4,438,503	60,41,304	7,611,414	1,03,59,080	2,561,077	34,86,727
„ Indian	5,270	7,175	11,890	16,184	7,554	10,282
Total	4,443,773	60,48,479	7,623,304	1,03,75,264	2,568,631	34,97,009

The improvement noticed in the report for 1883-84 was not maintained during 1884-85, the figures for which year are the lowest recorded for some time. The falling off in the exports to foreign ports amounted to so much as 66·34 per cent. The Collector of Customs writes:—

“The decline in exports to the United Kingdom, amounting to 60½ per cent., was due to the extraordinary low prices ruling as the result of an abundant wheat crop, and the enormous supplies available there and elsewhere.

“The heavy falling off here in exports last year was principally in Delhi No. 1 Club, and Oudh No. 2 Club. The year before not only were prices better in London, but the Calcutta buyers had in many instances speculated and sold in advance, so were obliged to take wheat at the rates asked by the growers. Losses ensued, and last year they were cautious and did not repeat the adventure, so that they were not compelled to buy, and the price which in view of the London market they could profitably offer, the growers would not accept, but stored their wheat instead. These stores, as I have already mentioned, must be sent forward in the current year, for they can hardly be kept longer, whatever the price may be; but if prices continue as low as last year for a lengthened period, the natural result to be expected is that Oudh will give up growing wheat for export, and Calcutta cease exporting No. 2 Club till it can be supplied from nearer districts.”

Quantity not exported before the close of the year.

90. After deduction of the exports from the imports there remained 11,07,006 maunds, against 7,60,278 maunds in 1883-84, and 11,81,572 maunds in 1882-83.

GRAM AND PULSE.

91. The principal staples comprised under this head are *mutter*, *khesari*, *mushuri*, *maskalai*, *moog*, *boot* or *chhola*, and *urhur*. The gross import and export traffic of Calcutta under this head during the past three years, was as follows:—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.

Total	31,61,413	31,72,502	31,47,913	13,84,002	12,58,142	15,59,938

92. There was very little change in the import traffic of the past year as compared with the two previous years. The consignments by the East Indian Railway, however, showed a falling off of 5,76,128 maunds as compared with 1883-84, but this was made up by a corresponding increase in the quantities imported by other routes. The Eastern Bengal State Railway figures showed an advance of 1,49,272 maunds, the figures of the boat traffic rose by 2,72,189 maunds, the road traffic returns showed an increase of 13,332 maunds, and the sea-borne trade returns, 1,15,489 maunds. The distribution of the imports is classified by provinces in the following statement :—

				1882-83.	1883-84.	1884-85.
				Mds.	Mds.	Mds.
From Bengal	8,86,670	11,16,646	18,03,624
" Behar	19,94,418	12,18,017	7,56,455
" North-Western Provinces and Oudh	1,91,489	6,62,583	3,07,121
" Madras	11,898	74,177	1,95,725
" Punjab	33,788	24,592	46,487
" Central Provinces	62,778	32,004
" Other places	43,150	13,709	6,497
Total	31,61,413	31,72,502	31,47,913

93. The consignments from Bengal were 6,86,978 maunds more than in the previous year. The produce of the *rubbee* cereals in Nuddea was excellent, owing to the timely rainfall in September and October; and the exports from this district alone showed an increase of 3,34,786 maunds. The Collector observes that "the cultivating classes tided over the distress they were subjected to owing to the failure of the rice crop, by the profit derived from the sale of the winter crops." In Jessore too these crops were good, and the exports advanced by 1,33,342 maunds. The other districts which showed a marked increase were Furreedpore (95,988 maunds), Rajshahye (52,491 maunds), and Pubna (55,391 maunds). The large decrease of 4,61,562 maunds under Behar is, no doubt, the result of the short outturn of crops in most of the districts. From Monghyr the exports fell short by 1,45,900 maunds as compared with the previous year. The outturn of the *rubbee* crops in this district, however, was much better than in the preceding two years. The decrease under Patna where these crops suffered much amounted to 90,944 maunds. The contribution from Bhagulpore fell off by 67,607 maunds. The average outturn of the whole district was not more than 6 $\frac{1}{4}$ annas. The other districts which showed the largest decrease were the Sonthal Pergunnahs (34,755 maunds), Maldah (32,498 maunds), Purneah (29,900 maunds), Shahabad (24,435 maunds), Durbhunga (16,203 maunds), and Sarun (13,275 maunds). The large decline of 3,55,462 maunds in the imports from the North-Western Provinces and Oudh was owing to a falling off in the consignments from Allahabad (2,30,373 maunds), Cawnpore (84,604 maunds), and Futtehpore (33,971 maunds).

94. The following statement shows the principal river marts whence the shipments were largest during the past year, the figures of the preceding two years being also noted :—

96. The different marts on road routes which contributed most to the trade were Baraset (54,731 maunds), Bussirhat (18,954 maunds), and Bongong (12,052 maunds).

Principal marts on road routes.

97. The advance in the export trade during the past year was 23·27 per cent. over the figures of 1883-84, and 16·26 per cent. over those of 1882-83. The exports by sea from Calcutta in those years were as follows :—

WHITHER EXPORTED.		1882-83.		1883-84.		1884-85.	
		Cwts.	Mds.	Cwts.	Mds.	Cwts.	Mds.

The partial failure of the rice crops in Bengal during the past year caused a falling off in the imports as well as in the exports as compared with the two previous years. In connection with the exports of these staples to foreign countries, the Collector of Customs writes—

“The exports of rice have fallen by 18½ per cent. as compared with 1883-84, and have been the lowest since 1879-80. There was a scarcity in some parts of Bengal, and consequently a large demand for local consumption, which would partly account for a fall in shipments. Prices advanced, so that with much smaller exports there was a larger sum to be paid by the foreign consumers than in the year of the largest exports—1882-83. The cultivators who have obtained average crops should therefore have received more money for their produce than they have done for some time.”

100. The import trade of the past year showed a decrease of 13,41,753 maunds, or 9·33 per cent., as compared with 1883-84, and 49,01,958 maunds, or 27·32 per cent., as compared with 1882-83. The quantities of rice carried by country boats fell by 11,65,461 maunds and 30,25,929 maunds as compared with the two years 1883-84 and 1882-83, respectively. The imports by road were 1,13,090 maunds below those of the previous year, and 7,97,868 maunds below those of 1882-83. The Eastern Bengal State Railway returns showed an increase of 22,502 maunds over the figures of 1883-84, and a decrease of 4,35,142 maunds over those of 1882-83, while the East Indian Railway figures exhibited a decrease of 1,24,716 maunds and 9,36,176 maunds, respectively. The sea imports were less by 2,82,531 maunds than those of 1883-84, but they showed an increase of 1,82,430 maunds as compared with 1882-83. The abstract below gives the sources of this supply, province by province, together with the channels through which the consignments were received during the past three years—

Compared with 1883-84, the past year's figures against Bengal fell by 11·66 per cent., while those against Orissa rose by 15·67 per cent. The fluctuations in this trade necessarily depend upon the outturn of the crops, and the causes of increase and decrease noticed above have already been explained. The districts in Bengal whose exports fell off most largely were Dacca, Burdwan, Dinagepore, and Backergunge, which supplied 87·00 per cent., 69·23 per cent., 58·46 per cent., and 18·04 per cent., respectively, less than in 1883-84.

101. The following statement shows the principal river marts in the interior from which rice was carried to the extent of one lakh of maunds and upwards during the past year, as compared with the figures for the preceding two years—

104. Of the imports by sea during the past year, Balasore contributed 7,75,504 maunds, against 10,06,674 maunds in 1883-84; Chittagong 19,596 maunds, against 33,569 maunds; British Burmah 5,468 maunds against 8,801 maunds; Madras 11,037 maunds, against 16,127 maunds; and other places 707 maunds, against 29,672 maunds.

105. The figures of the export trade during the past year showed a decrease of 15·17 per cent. as compared with 1883-84, and of 35·08 per cent. as compared with 1882-83. The details of the sea-borne trade, which forms more than four-fifths of the total traffic, are as follows—

Regarding the exports to foreign ports, the Collector of Customs, Calcutta, writes as follows—

“The decline shown is due to smaller exports to the United Kingdom, the Cape of Good Hope, Mauritius, South America, the West Indies, the Maldives, the Straits Settlements, France, and Italy, while there have been larger shipments to Ceylon, Réunion, Aden, Persia, Australia, Zanzibar, and Natal.

“To the United Kingdom the shipments are the smallest for many years, the decline amounting to 36½ per cent. This was principally owing to the state of trade generally in England. The past year has been one of great depression in almost every branch, and the rice trade has been no exception. The higher range of prices here would also have tended to reduce the shipments to markets that are not compelled for some reason to obtain their supplies from Bengal. This trade throughout the year is reported to have been of the most unsatisfactory character. Smaller supplies from one country were partly counterbalanced by larger supplies from others, and, with very few fluctuations, there has been a steady fall in prices, which reached the lowest point ever touched. The consequence has been that heavy losses have been experienced, for usually the London value did not cover the cost, and some of the importers there have had to abandon the trade.

“The trade with France has fallen away to the smallest point touched for five years, the exports being only 10,811 cwts., against 732,058 cwts. in 1883-84, and 533,898 cwts. in 1882-83. This trade suddenly sprang into importance two years ago, and it has subsided just as quickly. There has been no increase of exports from Burmah to make up for the decline from here. Other countries may have forwarded larger supplies, but I think it is due to the substitution of other articles for purposes of distillation in the place of this common rice, the quality of which was complained of last year.

“The trade with Italy has also declined in a similar manner, the fall being from 254,740 cwts. in 1883-84 to 6,006 cwts.

“Ceylon has again taken the first place as a consumer of this staple. Probably the smaller demand from the United Kingdom left a larger quantity available for export to Ceylon. The advance amounts to 48 per cent. in comparison with 1883-84, but the figures are not above the average.

“The exports to Mauritius are about the same as in the previous year, while the fall shown in the exports to Réunion has been partly recovered. Under ‘other countries’ the shipments were principally to Zanzibar and Natal. To the former the increase was from 110,174 cwts. in 1883-84 to 143,715 cwts. in the past year, probably owing to the regular running of the Arab steamer *Swordsmen* between this port and Zanzibar.”

106. The following statement shows the stocks of rice at all the markets and warehouses in Calcutta and the suburbs in the first week of April of the past three years—

Stocks of rice in Calcutta.

					First week of April.		
					1883.	1884.	1885.
					Mds.	Mds.	Mds.
Baliaghatta	8,35,000	10,12,000	7,00,000
Ooltadanga	1,06,400	86,900	54,600
Chitpore, Golabaree, Coomertoolee, Hatkhola, and Culpay Ghat	9,14,200	7,76,800	7,73,900
Pathuriaghatta, Posta, and Jorabagan	18,200	6,400	4,500
Tollygunge, Chitla, Kidderpore, and Moonshigunge	1,20,400	1,47,160	1,27,800
Twenty-one minor bazars (estimated)	2,40,000	2,40,000	2,40,000
Other retail shops, 3,129 in number (estimated)	2,50,000	2,50,000	2,50,000
Boidyabatty, Nowabgunge, Bhuddressur, and Chander-nagore	12,025	34,087	8,951
On railway premises on both sides of the river	3,736	1,560	1,938
On boats, unloaded	1,18,528	66,282	1,30,357
Total					26,14,089	66,21,179	22,92,046
Probable stock available for exportation by sea as estimated on local enquiry					15½ lakhs	15½ lakhs	12½ lakhs

Paddy is not included in the above statement. The total imports of paddy during the past year having been 20,68,448 maunds, and the total exports 6,58,477 maunds, there remained a surplus of 14,09,971 maunds, which, at the rate of 25 seers of rice to a maund of paddy, is equivalent to 8,81,232 maunds of rice. If this figure be added to the stocks of rice shown above, the total difference between imports and exports would be raised to 31,73,278

maunds for 1884-85, against 34,06,545 maunds in 1883-84, and 34,93,527 maunds in 1882-83.

MISCELLANEOUS SPRING AND RAIN CROPS.

107. The principal staples classed under this head are—barley, *kodo*, *shama*, Indian corn, oats, and millets, which are reaped during the spring and rainy seasons. The aggregate quantity carried to, and from, Calcutta during the past three years is given below—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
By Boat	70,123	86,922	1,39,366	1,651	193	892
East Indian Railway	2,11,829	2,00,267	1,52,803	741	387	56,051
Eastern Bengal State Railway	14,782	9,638	2,09,069	1,201	3,459	1,17,191
Road	354	922	767
Inland steamer	407	978
Sea	131	283	1,196	1,19,890	1,24,474	1,23,773
Total	3,02,865	2,97,110	5,02,594	1,24,244	1,30,313	2,98,074

108. The generally plentiful harvests of these grains resulted in a very large increase in the import trade of 2,05,484 maunds as compared with 1883-84, and of 1,99,729 maunds as compared with 1882-83. The advance in the quantity carried by the Eastern Bengal State Railway amounted to 1,99,431 maunds on the returns of 1883-84, while the imports by the East Indian Railway fell by 47,304 maunds. The boat traffic, however, rose from 86,922 maunds in 1883-84 to 1,39,366 maunds in 1884-85. The imports of miscellaneous food-grains were drawn from the following provinces—

	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
Bengal	61,130	38,170	2,41,268
Behar	2,34,099	2,29,742	2,27,043
North-Western Provinces and Oudh	6,736	25,778	30,271
Other places	900	3,420	4,012
Total	3,02,865	2,97,110	5,02,594

The increase of 2,03,098 maunds shown against Bengal during the past year as compared with 1883-84, was due to larger exports from Nuddea, Jessore, and Furreedpore, where these crops yielded a good outturn. These districts sent 1,67,122 maunds, 15,969 maunds, and 14,470 maunds, respectively, in excess of the figures of the previous year.

109. The following statement shows all the principal supplying marts, both on river routes and on the line of rail, during the past three years—

Marts.	Districts.	By boat.	By rail.	Total.		
				1882-83.	1883-84.	1884-85.
		1884-85.	1884-85.	Mds.	Mds.	Mds.

total	6,937,453	6,541,499	7,999,202	5,583,884	6,469,118	7,233,447

113. As regards the imports, the figures show a large increase of 22·28 per cent. as compared with 1883-84, and of 15·30 per cent. as compared with 1882-83. Last year there was a fair demand in Calcutta for hides for shipment to Great Britain, and this increased despatches to Howrah by the East Indian line, which carried 1,179,656 pieces more than in 1883-84. The imports by country boats showed an advance of 51,708 pieces, those by the Eastern Bengal State Railway of 81,272 pieces, and those by sea of 145,218 pieces. The following statement shows the places of supply, province by province, during the past three years—

	1882-83.	1883-84.	1884-85.
	No.	No.	No.
Behar	2,544,050	2,493,560	2,801,531
Bengal	2,712,389	2,424,549	2,615,857

117. The imports by road routes were obtained from Busseerhat (35,220 pieces, against 27,969 pieces), Baraset (33,029 pieces, against 27,010 pieces), and a large number of smaller marts in Hooghly and the 24-Pergunnahs districts.

118. The sea imports were chiefly derived from Balasore (256,052 pieces, against 280,922 pieces), Madras (116,827 pieces, against 73,915 pieces), and from Chittagong (89,628 pieces, against 83,328 pieces).

119. Last year the percentage of increase in the exports was 11.98 as compared with 1883-84, and 29.53 as compared with 1882-83. The quantities shipped from Calcutta by sea during the past three years, were destined as follows—

	1882-83.		1883-84.		1884-85.	
	No.	Cwts.	No.	Cwts.	No.	Cwts.
To Foreign Ports—						
United Kingdom	3,931,823	303,617	4,297,924	324,187	4,639,363	339,858
Other Ports	1,618,195	186,329	2,130,761	219,331	2,523,505	262,520
Total	5,550,020	489,946	6,428,685	543,518	7,162,868	602,378
To Indian Ports	635	61	280	23	8,672	636
GRAND TOTAL	5,550,655	490,007	6,428,965	543,541	7,171,540	603,014

The Collector of Customs, Calcutta, makes the following remarks on the trade in hides:—

“Throughout the year there was generally a very fair demand in the bazar, and all the receipts were taken off, while prices were maintained without any marked fluctuations.

“To the United Kingdom the advance in exports amounted to 5½ per cent., which is an ordinary fluctuation that might occur in any year, and for which no special reasons can be assigned. The re-exports of raw hides from the United Kingdom were again large being for the past three years—

1882—cwts. 313,396; 1883—cwts. 411,177; 1884—cwts. 409,928.

“The countries drawing the largest supplies from there are Germany and Holland. Probably these consist chiefly of the imports from Calcutta, as the receipts in the United Kingdom of dry hides are principally from the British East Indies.”

120. The total number of hides not exported before the close of the year under report was 765,755, against 82,381 pieces in 1883-84, and 1,353,569 pieces in 1882-83.

Quantity not exported before the close of the year.

SALT.

121. The amount of salt carried to, and from, Calcutta by all routes during the past three years, was as follows :—

1	2	3	4	5	6	7	8	9	10	11	12
YEAR.	IMPORTS INTO CALCUTTA BY SEA.			EXPORTS FROM CALCUTTA AND HOOGHLY.							
	From Foreign ports.	From Indian ports.	Total.	Inland exports.						Exports by sea.	GRAND TOTAL.
				By East Indian Railway.	By Eastern Bengal State Railway.	By inland steamer.	By boat.	By road.	Total.		
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
1882-83	78,45,144	4,78,735	81,23,879	34,37,184	10,14,053	1,80,808	37,12,499	64,443	83,58,975	65	83,59,040
1883-84	84,65,683	8,39,478	90,05,161	30,98,287	10,10,324	1,31,183	36,27,182	61,084	79,25,042	829	79,25,871

122. During the year under report there was a considerable expansion of the export salt trade. The customs duty on imported salt remained the same as in the previous years, namely, Rs. 2 per maund, and this reduced duty tended to stimulate consumption of this article, for, according to the published fortnightly prices current, the average retail price in the interior showed a reduction of 2.73 per cent. as compared with the previous year, and of 1.07 per cent. as compared with 1882-83. The abstract below shows, for each district of these Provinces separately, the average retail price of this article during the past year as compared with that of 1883-84 :—

Retail price of salt per rupee.

DISTRICTS.	Average price.		Difference.	Average rise in price per maund.		Average fall in price per maund.	
	1883-84.	1884-85.		Rs. A. P.		Rs. A. P.

123. The total quantity of salt brought to Calcutta by sea during the past year was 0·22 per cent. below the imports of the preceding year, but 10·61 per cent. above those of 1882-83. The different ports which contributed to this supply are shown in the following statement:—

	Quantities in tons.			Quantities in Indian maunds.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
Liverpool ...	246,873	242,088	272,142	67,20,413	65,90,185	74,08,296
Arabian and Persian Gulfs ...	25,133	37,473	30,861	6,84,171	10,20,100	8,40,108
Bombay ...	17,586	18,901	14,179	4,78,735	5,14,520	3,85,987
Italy ...	6,642	21,036	11,289	1,80,802	5,72,651	3,07,301
Madras	917	1,248	...	24,958	33,976
Saigon	365	9,945
France ...	1,510	10,281	...	41,119	2,79,865	...
Port Elizabeth	106	2,882	...
Spain ...	585	15,931
Austria ...	99	2,708
Total ...	298,428	330,802	330,084	81,23,879	90,05,161	89,85,613

The above figures have been taken from the reports of the Board of Revenue, Lower Provinces, on the administration of the salt department for the past three years. The figures hitherto published under this head in the internal trade report of previous years were supplied by the Collector of Customs, Calcutta, but it has been ascertained that his figures merely show (1) the quantity of salt passed out of ship on payment of duty, and (2) the quantity passed into bond out of ship, whereas the Board's figures represent the above quantity minus (a) the quantity on which refund of duty was given on account of short delivery, and (b) the quantity short delivered out of ship when passing into bond.

124. Compared with 1883-84, the decrease occurred in the importations from Bombay (1,28,533 maunds), the Arabian and Persian Gulfs (1,79,992 maunds), and (Italy 2,65,350 maunds), while there was an increase in the quantities shipped from the United Kingdom (8,18,111 maunds), and Madras (9,018 maunds). Last year no salt was received from France and Port Elizabeth, but 9,945 maunds were imported from Saigon. The decrease in the importations from the Arabian and Persian Gulfs is said to be due to "large stocks being held at the close of 1883-84 and to a marked fall in prices during the greater portion of the year." The large increase in the importation from Italy during 1883-84 was due to the "opening up of a new line of steamers by Messrs. Ralli. As these boats ceased to run after July, the returns for the past year show a large decrease."

125. In addition to the above supply, the amount of indigenous salt carried to Calcutta by the East Indian Railway was 95 maunds, against 315 maunds in 1883-84, and 2,448 maunds in 1882-83.

126. The exports of salt rose by 4,23,547 maunds, or 5·34 per cent., over those of 1883-84, but they were almost equal to those of 1882-83. The exports by country boats were 52,229 maunds less than in the previous year. The supply carried by rail, however, showed a large increase of 4,85,512 maunds, namely, 4,72,345 maunds on the East Indian line, and 13,167 maunds on the Eastern Bengal State Railway. The trade carried by the inland steamers fell off by 13,379 maunds, and the road traffic by 3,068 maunds as compared with 1883-84. The following statement illustrates the distribution of the past year's exports, province by province, as compared with the figures of the two previous years:—

			1882-83.	1883-84.	1884-85.
			Mds.	Mds.	Mds.
To Bengal	46,54,281	45,59,142	44,95,934
" Behar	29,29,587	26,90,681	29,86,987
" Assam	3,37,931	3,23,527	3,76,730
" North-Western Provinces and Oudh	2,93,737	2,04,943	3,01,901
" Chota Nagpore	1,32,709	1,45,898	1,80,324
" Other Provinces	10,730	851	2
Total	83,58,975	79,25,042	83,41,878
" Sea Ports	65	829	7,540
Grand Total	83,59,040	79,25,871	83,49,418

127. If exports be deducted from imports, there remain 6,36,290 maunds against 10,79,605 maunds in 1883-84. In 1882-83 there was a deficit of 2,32,713 maunds.

128. The detail of quantities on which duty was paid in Calcutta and the 24-Pergunnahs during the past three years, as compared with the inland despatches from Calcutta, is given in the following statement :—

		Sea imported salt.	Excise salt.	Total clearances.	Sent into the interior.
		Mds.	Mds.	Mds.	Mds.
1882-83	...	88,06,343*	8,500	88,14,843	88,59,040
1883-84	...	85,79,97†	12,657	85,92,584	79,25,871
1884-85	...	93,71,086‡	11,124	93,82,210	83,49,418

The total clearances of sea-imported salt advanced by 9·19 per cent on the returns of 1883-84 and by 6·43 per cent. on those of 1882-83, while excise salt fell by 12·11 per cent. as compared with 1883-84, but rose by 30·87 per cent. as compared with 1882-83. The Board of Revenue, Lower Provinces, observe that “there is no special reason given for the increase in clearances from ship-board (which formed 78·17 per cent. of the total clearances), but it may be attributed to the general increase in clearances during the year under review.”

The quantity of salt available for consumption in Calcutta, the Suburbs, Hooghly and a part of the 24-Pergunnahs district was 10,32,792 maunds, against 6,66,713 maunds in 1883-84, and 4,55,803 maunds in 1882-83 :—

129. The quantity of salt sent to each division of the Bengal province from Calcutta direct during the past three years, was as follows :—

SALT TRADE OF BENGAL.

		1882-83.	1883-84.	1884-85.
Imports.		Mds.	Mds.	Mds.
Burdwan division (excluding Hooghly with Howrah)	...	9,13,638	9,44,325	10,25,387
Presidency division (excluding Calcutta, the Suburbs, and a part of the 24-Pergunnahs district)	...	8,96,252	11,36,609	9,63,670
Rajshahye division	...	11,39,153	10,78,391	12,16,367
Dacca ditto	...	15,46,213	12,76,117	12,08,469
Chittagong ditto	...	1,59,025	1,23,700	82,041
Chota Nagpore ditto	...	1,32,709	1,45,898	1,80,324
Total	...	47,86,990	47,05,040	46,76,258

The supply imported into this province from places other than Calcutta in those years, is shewn in the following statement :—

		1882-83.	1883-84.	1884-85.
		Mds.	Mds.	Mds.
Imported by rail	...	1,412	2,941	281
Clearances of salt manufactured in the 24-Pergunnahs and Orissa under the excise rules.	...	3,63,723	4,39,257	5,01,256
Sea-imported salt on which duty was paid in the Chittagong, Naraingunge, Cuttack, and Balasore ports	...	3,75,847	4,45,123	5,37,047
Total	...	7,40,982	8,87,321	10,38,584

According to these figures the gross registered imports amounted to 57,14,842 maunds against 55,92,361 maunds in 1883-84, and 55,27,972 maunds in 1882-83. The increase in the sales of salt manufactured in Orissa is said to be due to the manufacturers in Pooree endeavouring to dispose of their large stocks by selling at reduced rates throughout the year, in order to prevent the importation of foreign salt. Concerning the Chittagong and Naraingunge ports, the Board observe as follows :—

“The increased clearances for Chittagong are attributed by the Commissioner to small dealers having bought more largely than usual, owing to the cheapness of salt in the months of November and December 1884 and January 1885, when the salt was selling at 1 anna 3 pie per seer. The Commissioner also says that the trade appears to be in a healthy state, and the port of Chittagong is yearly becoming more firmly established as the port from which all East Bengal draws its salt. The Commissioner of Dacca states that the Collector of Customs, Naraingunge, reports that the quantity cleared would have been considerably

* Including 5,21,000 maunds of Bombay salt, which was passed free of duty.
† Ditto 5,15,468 ditto Bombay and Madras salt, which was passed free of duty.
‡ Ditto 4,15,994 ditto Bombay salt, which was passed free of duty.

larger had not the salt golah cracked in August 1884, and in consequence had to be pulled down. It was not built again till the latter end of February 1885 when 45,800 maunds of salt were brought in. While the golah was under repairs the bonders got their two private rooms licensed to keep the non-duty paid salt in. As these rooms could not contain more than 11,500 maunds of salt, the bonders were obliged to import duty-paid salt, amounting to 1,00,999 maunds."

130. The registered quantity of salt exported from this province during the past three years is detailed below :—

Exports.	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
To districts in Behar from the Bengal block of the East Indian Railway...	14,457	13,976	9,107
To North-Western Provinces from the Bengal block of the East Indian Railway ...	1,943	272
To Nepal, Sikkim, and Bhutan, from districts on the Northern Frontier ...	1,122	1,196	1,477
Total ...	17,522	15,444	10,584

131. The total quantity of salt available for consumption in Bengal Proper during those years, was as follows :—

	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
Metropolitan consumption ...	4,55,803	6,66,713	10,32,792
Consumption in the interior after deducting exports ...	55,10,450	55,76,917	57,04,258
Total ...	59,66,253	62,43,630	67,37,050

132. These figures would allow 11 lbs 15 oz. per head of the population, consisting of 46,409,757 souls, against 11 lbs 1 oz. in 1883-84, and 10 lbs 9 oz. in 1882-83.

133. The importation of salt into Behar, division by division, from Calcutta direct during the past year as compared with the figures of the two previous years, was :—

SALT TRADE OF BEHAR.

Imports.

	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
Patna Division ...	21,02,794	18,59,523	21,22,567
Bhagulpore Division ...	8,26,793	8,31,158	8,64,420
Total ...	29,29,587	26,90,681	29,86,987

The imports from other sources during the year were 44,047 maunds, against 87,497 maunds in 1883-84, and 51,366 maunds in 1882-83, as shown below :—

	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
From Bengal ...	14,457	13,976	9,107
„ North-Western Provinces and Oudh ...	3,166	3,701	1,003
„ Punjab ...	33,471	66,937	33,667
„ Rajputana ...	272	2,883	270
Total ...	51,366	87,497	44,047

The aggregate registered quantity of salt sent to Behar therefore was 30,31,034 maunds, against 27,78,178, and 29,80,953 maunds in the two years 1883-84 and 1882-83, respectively.

134. The following statement shows the total exportation of salt from Behar by rail and by land during the past year as compared with the trade of the two previous years :—

Exports.	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
To Bengal Block from the Behar block of the East Indian Railway ...	1,410	2,641	186
„ North-Western Provinces from the Behar block of the East Indian Railway ...	3,834	2,461	2,129
„ Central Provinces from the Behar block of the East Indian Railway ...	546
„ Nepal from districts on the Northern Frontier of the Behar Province ...	78,628	96,468	96,269
Total ...	84,418	1,01,570	98,584

135. The total quantity available for consumption in Behar was therefore 29,32,450 maunds, against 26,76,608 maunds in 1883-84, and 28,96,535 maunds in 1882-83. The population of Behar being 23,127,104, the consumption of salt would be 10 lbs 7 oz. per head, against 9 lbs 8 oz. in 1883-84, and 10 lbs 5 oz. in 1882-83.

136. The quantity of salt imported into Assam from Calcutta was 3,76,730 maunds, which showed an increase of 53,203 maunds on the returns of 1883-84, and of 38,799 maunds on those of 1882-83.

137. The following comparative statement shows the registered salt trade of Bengal with the Upper Provinces during the three years ending 1884-85:—

From	Imports into Bengal (by rail).			
	Into Calcutta.	Into Bengal.	Into Behar.	Total.
	Mds.	Mds.	Mds.	Mds.
North-Western Provinces and Oudh	1882-83 ... 1,027 1883-84 ... 231 1884-85 ... 69	2 27	3,166 3,701 1,003	4,195 3,959 1,072

SALTPETRE.

139. The saltpetre trade of Calcutta during the past three years, is shown in the following statement :—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
By East Indian Railway ...	6,21,510	7,44,135	6,95,056	2,134	2,466	1,330
Eastern Bengal State Railway ...	20	3	...	897	791	454
Boat ...	8,450	12,212	27,296	741	5,559	459
Inland steamer	103	234	262
Road	15	3,069	290
Sea	5,45,377	6,71,569	6,17,862
Total ...	6,29,986	7,56,350	7,22,352	5,49,200	6,82,088	6,20,708

There was a slight decrease in this trade during the past year, but the figures are still above the average of the three previous years, both as regards imports and exports. Indian saltpetre has to compete in the European market with nitrate of soda, and it is said that the raw material from which this is made is unlimited in quantity, and that this will keep all nitrogenous articles, including saltpetre, at a moderately low price.

140. The total quantity carried to Calcutta during the past year was 4.42 per cent. below the trade of 1883-84, but 14.76 per cent. in excess of that of 1882-83. The supply brought by the East Indian line showed a decrease of 6.51 per cent. as compared with the preceding year, but the figures of the boat traffic increased by

123.52 per cent. The different provinces which contributed to the trade during the past three years, were—

			1883-84. Mds.	1883-84. Mds.	1884-85. Mds.
Behar	4,24,416	5,29,347	5,07,244
North-Western Provinces and Oudh	1,37,093	1,39,821	1,27,906
Punjab	68,451	87,401	87,089
Other places	20	281	743
Total	6,29,980	7,56,350	7,22,952

Compared with 1883-84, there was very little change in the imports from the Punjab, but the figures under Behar showed a fall of 4.17 per cent., and those under the North-Western Provinces and Oudh of 8.19 per cent. There was a considerable improvement in the saltpetre business in the Champaran district, and in Durbhunga too it showed some briskness, while in Mozufferpore this trade was slack.

141. The following statement shows all the principal supplying stations along the railway lines during the past year, as compared with the figures for the preceding two years:—

Stations.		Districts.	1882-83. Mds.	1883-84. Mds.	1884-85. Mds.
Patna, Bankipore, and Dinapore Patna ...	2,21,115	1,88,295	1,82,705
Furruckabad Furruckabad	44,976	84,770	62,215
Maesi Champaran	1,923	53,153	56,815

Total	...	1,871	2,547	2,596	3,533	3,331	4,534
GRAND TOTAL	...	400,684	5,45,377	493,397	6,71,569	453,939	6,17,862

The Collector of Customs, Calcutta, writes—

“There were increased shipments to China and to the United States, against decreases to the United Kingdom, France, Italy, and Mauritius.

“The decline in the exports to the United Kingdom amounts to 22½ per cent. The large supplies of the previous year may have tended to this, and also the very large receipts again of nitrate of soda. Prices in London were also lower.”

144. After deduction of the gross exports from the total quantity imported into Calcutta during the past year, there remained a surplus of 1,02,244 maunds, against 73,662 maunds in 1883-84, and 80,720 maunds in 1882-83.

Quantity not exported before the close of the year.

LINSEED.

145. The following statement shows the trade of Calcutta in linseed during the past year, as compared with that of the preceding two years :—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
By Boat	11,41,436	13,54,101	13,20,861	877	1,708	411
Inland steamer	880	840	19,024	10	37	21
East Indian Railway	33,04,079	42,53,496	32,77,581	69	3
Eastern Bengal State Railway	1,21,428	2,26,404	3,08,083	26	10	107
Road	24,809	24,304	38,747	140	20
Sea	1,651	136	2,131	47,54,315	59,39,588	51,13,734
Total	45,94,383	58,59,341	49,66,827	47,55,228	58,41,390	51,14,290

146. The supply carried to Calcutta during the past year was 8,92,514 maunds below the figures for 1883-84, but it was 3,72,444 maunds in excess of those for 1882-83.

Imports. Compared with 1883-84, the falling off was most marked in the consignments carried by the East Indian Railway (22·95 per cent.), while the quantity imported by country boats shewed a decrease of 2·45 per cent. On the other hand, the figures of traffic attracted to the Eastern Bengal State Railway shewed an increase of 36·07 per cent., and the supplies by road routes were 59·03 per cent. in excess of the previous year's trade. The statement below shews all the provinces from which the supply of linseed was derived during the past three years :—

	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
Behar	29,88,165	35,78,047	26,79,959
Bengal	6,65,260	8,67,297	11,22,180
North-Western Provinces and Oudh	8,48,999	12,02,808	8,62,262
Central Provinces and Rajputana	12,433	1,75,853	2,07,001
Assam	12,666	26,757	91,022
Other places	66,861	8,579	4,403
Total	45,94,383	58,59,341	49,66,827

The imports from Behar shewed a decrease of 8,98,088 maunds owing to short shipments from Patna (5,17,199 maunds), Bhagulpore (95,656 maunds), Monghyr (93,320 maunds), Durbhunga (83,018 maunds), and from the Sonthal Pergunnahs (26,966 maunds). The supply from the North-Western Provinces and Oudh also fell by 3,40,546 maunds. The districts from which the imports were less than in the previous year were Fyzabad (1,59,678 maunds), Mirzapore (1,06,732 maunds), Allahabad (56,679 maunds), and Goruckpore (35,719 maunds). On the other hand, the imports from Bengal showed an increase of 2,54,883 maunds which was due to larger consignments from Nuddea (1,58,116 maunds) and from Jessore (54,570 maunds).

Hanskhally ...	Nuddea ...	9,459	34,100	15,935

149. The total quantity of linseed exported from Calcutta during the past year was 12·45 per cent. below the total of 1883-84, but 7·55 per cent. over that of 1882-83. Almost the whole trade was sea-borne, and its distribution was as follows :—

	1882-83.		1883-84.		1884-85.	
	Cwts.	Mds.	Cwts.	Mds.	Cwts.	Mds.
To United Kingdom ...	3,225,018	43,89,616	3,183,876	43,33,609	2,694,613	36,67,668
„ Other Foreign Ports ...	267,927	3,64,678	1,106,417	15,05,957	1,062,405	14,46,051
Total of Foreign Ports ...	3,492,945	47,54,294	4,290,293	58,39,566	3,757,018	51,13,719
To Indian Ports ...	15	21	16	22	11	15
GRAND TOTAL ...	3,492,960	47,54,315	4,290,309	58,39,588	3,757,029	51,13,734

The causes of fluctuations in this trade are stated by the Collector of Customs, Calcutta, to be as follows :—

“There has been a decline of 12½ per cent. in the exports of this seed as compared with those in 1883-84. The United Kingdom took a smaller quantity than in the previous year, while to the United States the exports show an increase. These are the only countries that take this seed in large quantity from Calcutta. Under “other countries” are included small shipments to numerous places, the only important ones being to Holland and to Demerara. The exports to the latter were not intended for consumption there, but were shipped by vessels bound there with coolies and afterwards proceeding to Europe.

“The general depression in trade in the United Kingdom, the larger supplies to America, and the larger shipments proportionately from the Western side of India would account for this decline.

“The exports to the United States have again been on a large scale, and were in advance of 1883-84 by 1½ per cent. There was at one time of the year a very strong demand for linseed for America. The home production there has evidently been again on a small scale, and the consumption with a rapidly increasing population is also no doubt advancing.”

150. Last year the exports exceeded the imports by 1,47,469 maunds.

Quantity not exported before the close of the year. In 1883-84 there was a surplus of imports over exports to the extent of 17,751 maunds, while in the previous year the exports were 1,60,845 maunds in excess of the imports.

MUSTARD SEED.

151. The total quantity of mustard seed imported into, and exported from, Calcutta during the past year, as compared with that of the two previous years, was as follows—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.		
	1882-83.	1883-84.	1884-85.	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
By Boat ...	5,44,031	5,08,411	7,97,889	3,96,069	2,48,892	1,99,537
„ Inland steamer ...	75,784	1,07,699	6,46,432	2
„ East Indian Railway ...	31,72,083	25,98,290	19,44,707	810	5,644	1,323
„ Eastern Bengal State Railway ...	42,304	2,31,569	4,06,762	71,255	20,014	7,593
„ Road ...	190	4,24,819	2,66,274	2,26,418
„ Sea ...	4,062	275	1,041	20,83,244	23,04,667	26,00,249
Total ...	38,37,334	35,36,367	37,99,891	29,76,197	28,73,808	30,34,634

There was a recovery in the past year's trade owing to good crops and to the greater demand for this seed for exportation to foreign countries.

152. The imports rose by 7.45 per cent. over those of 1883-84, but they were still 0.98 per cent. below those of 1882-83.

Imports.

The boat traffic showed a large advance of 2,89,478 maunds as compared with the previous year, but in the figures of rail-borne traffic there was a heavy falling off, amounting to 5,63,453 maunds. The imports by inland steamers, which for the most part represent the produce of the districts of the Brahmaputra Valley in Assam, showed an increase of 5,41,733 maunds as compared with 1883-84. The amount of mustard seed supplied by each province is shown below—

		1882-83.	1883-84.	1884-85.
		Mds.	Mds.	Mds.
Behar	...	12,37,290	10,56,191	12,07,087
North-Western Provinces and Oudh	...	22,44,520	14,19,843	10,37,707
Bengal	...	1,73,732	4,71,135	10,26,018
Assam	...	74,470	91,748	4,09,603
Other places	...	1,07,322	4,97,410	59,576
Total	...	38,37,334	35,36,367	37,99,891

A decrease is observed in the imports from the North-Western Province and Oudh only, and was owing to the partial failure of the crop in those provinces. The largest falling off occurred in the imports from Fyzabad (3,25,605 maunds), Allyghur (89,434 maunds), Moradabad (74,082 maunds), Agra (39,021 maunds), and Shahjehanpore (25,649 maunds). The increases shown against Behar and Bengal were due to good crops in certain districts. In Behar there was a great advance in the quantities received from Durbhunga (76,567 maunds), Patna (74,761 maunds), Shahabad (31,750 maunds), Sonthal Pergunnahs (31,255 maunds), and Purneah (26,824 maunds), and in Bengal in the despatches from Pubna (2,55,721 maunds), Dacca (1,73,219 maunds), and Furreedpore (59,976 maunds). As regards the improvement noticed against Assam, the principal districts which contributed to the increase were Goalpara and Kamroop, which supplied 1,59,612 maunds and 1,33,064 maunds, respectively, in excess of the figures of 1883-84.

153. The following statement shows the imports from the principal supplying stations along the railway lines during the past year, as compared with the totals of the preceding two years—

Principal railway stations.

Stations.	Districts.	1882-83.	1883-84.	1884-85.

Regarding this trade with foreign ports, the Collector of Customs writes—

“The increase in shipments of this seed amounts to 12½ per cent., and the figures are the highest shown in the table.

“The trade in this article was of a dragging nature throughout the greater portion of the year, and prices declined from Rs. 4-4 to as low as Rs. 3-3 per maund. This was in sympathy with the London market, the larger supplies after a previous year of large imports causing a heavy fall in values.”

156. After deducting the exports from the imports, there remained a surplus of 7,65,267 maunds, against 6,62,564 maunds in 1883-84, and 8,61,137 maunds in 1882-83.

SILK, RAW.

157. The trade of Calcutta in raw silk registered during the past three years, is shown in the following statement:—

158. There was a large increase in this trade during the past year, the total quantity carried to Calcutta having amounted to 29,689 maunds, which were 22.13 per cent. and 16.79 per cent. in excess of the figures of the two previous years 1883-84 and 1882-83, respectively. The quantity attracted to the East Indian line was 36.87 per cent. more than in the previous year. The condition of the silk industry in Bengal is thus described in the Commissioners' administration reports of the year.

Burdwan Division.—“The manufacture of mulberry silk is declining in most places. In Burdwan a superior quality of silk cloth is still woven at Mymari, Radhakantpore, and neighbouring villages. The total outturn is estimated at 9,300 yards, valued at Rs. 11,901. The principal seat of the silk industry in this division, however, is in Beerbhoom, where the spinning of silk is carried on chiefly at the three filatures of Gonotea, Bhudderpore, and Kytha by the Bengal Silk Company. It is reported that great difficulty is experienced in getting a sufficient supply of cocoons, and the competition among the buyers is often very keen. The cost of cocoons reared under European supervision would be prohibitive, but under the present system the whole family of a cultivator look after the silkworms in their leisure time; they also raise their own mulberry leaves. Consequently they can sell the cocoons at a price which admits of spinning being carried on at a profit. The outturn of

these three filatures was 300 maunds, valued at Rs. 1,64,914, against 379 maunds, worth Rs. 1,91,392, in the preceding year.

"Silk cloth is also manufactured in Beerbhoom, and the best quality is to be had at Bishenpore in the Rampore Hat sub-division at Rs. 9 per piece (7 yards).

"The manufacture of silk fabric in Midnapore and Hooghly is in the wane, and does not call for special notice.

"Tusser silk cloth is manufactured in all the three districts of Burdwan, Bankoora, and Beerbhoom, more or less, but the principal seats of the industry are, as stated in last year's report, at Kuddea and Tantipara in Beerbhoom. The outturn of cloth manufactured in these two places during the year under report is estimated at 17,460 pieces, each 10 yards long, valued at Rs. 96,030. The value of the previous year's outturn was estimated at Rs. 46,675. The demand for tusser cloth appears for some reasons to have been greater than usual during the past year."

Presidency Division.—"The only silk-producing district in this division is Moorshedabad. The Collector, however, has not given a full account of this industry. The manufacture of this article has been on the decline. The silk industry was a losing one, several merchants engaged in it having sustained losses. There are some silk filatures in the district, but the trade is carried on on a smaller scale than formerly. There was, however, an unusually good crop of mulberry. During the winter season a cocoon exhibition was held at the district head-quarters for the encouragement of the cultivators generally of this and the neighbouring districts."

Rajshahye Division.—"It is to be regretted that silk-manufacture is steadily falling off in Rajshahye and Bogra. In the former district, whence the article is chiefly exported, the two principal European manufacturing firms turned out only 1,628 maunds against 2,097 maunds in the previous year."

Bhagulpore Division.—"In my last year's report I said that the manufacture of *tusser* and *bafta* pieces in Bhagulpore and of silk fabrics in Maldah was gradually decaying. There has been no change during the year worth noticing. The manufacture of the former is confined to the weavers in Champanagur, the western part of the town of Bhagulpore. There are now 880 looms, and the outturn is said to have been 44,355 pieces, valued at Rs. 1,91,500, against 46,726 pieces, valued at Rs. 2,01,778 in the preceding year.

"The Sonthal Pergunnahs export *tusser* cocoons to the neighbouring district of Beerbhoom, where the silk is manufactured. About 3,500 maunds of cocoons are said to have been exported during the year. The industry in this district therefore is confined to rearing of the worms. There is no local manufacture of the *tusser*.

"In Maldah the mulberry, like other crops, suffered from the drought and heat of the year, and this of course did harm to the silk industry, of which the state has been for some years past one of gradual decline, and the outlook is discouraging. No improvements have been recently made in the system of manufacture. The China war among other circumstances led to a decline in the demand and prices of silk made under European supervision."

The Commissioner of the Chota Nagpore Division states that tusser cloths, manufactured at Raghoonathpore and Singbazar in Manbhoom, have more than a mere local reputation.

159. The stations on the line of rail from which the principal consignments of silk were sent were—Damookdea in Nuddea, 7,472

Principal railway stations.

maunds; Mooraroc in Beerbhoom 4,144 maunds; and Azimgunge in Moorshedabad, 3,843 maunds.

160. The imports by country boats, which fell off by 18·30 per cent. as compared with 1883-84, were consigned from

Principal river marts.

Ghattal, 3,175 maunds; Midnapore, 709 maunds, and Tumlook, 356 maunds.

161. The supply exported from Calcutta by all routes was nearly the same as in 1883-84, but it was 17·44 per cent. greater than the figures for 1882-83. The bulk

Exports.

of the trade was sea-borne, and its destination was as follows:—

		1882-83.		1883-84.		1884-85.

The Collector of Customs, Calcutta, writes :—

“ The trade in Calcutta in this article throughout the year has been a dull one and prices have declined heavily, which chiefly accounts for the fall in the total value, though there has also been a falling off in the quantity of raw silk exported.

“ The increase to the United Kingdom was 15½ per cent. and the figures are the highest since 1879-80. The market in London for raw silk was freely supplied from China and large stocks accumulated, and this coupled with the general depression in trade brought about a heavy fall in prices.

“ Though the consumption of Bengal silk in the United Kingdom was larger, it was not sufficient to take off all the importations, for stocks accumulated, being 145,950 lbs at the end of 1884 against 101,850 lbs at the end of 1883.”

162. The result of the past year's traffic was a surplus of imports over exports amounting to 3,210 maunds. In 1883-84 there was a deficit in the imports compared with exports of 2,033 maunds, against a surplus of 2,874 maunds in 1882-83.

SUGAR.

163. The total amount of sugar carried to, and from, Calcutta during the past three years, was as follows :—

164. The decrease last year in the imports of drained sugar was 24·58 and 33·53 per cent. as compared with the two years 1883-84 and 1882-83, respectively. In undrained sugar the figures showed a falling off of 5·83 per cent. as compared with 1883-84, but they exceeded the trade of 1882-83 by 21·28 per cent. In comparison with 1883-84, the boat traffic showed a decrease of 73,937 maunds under drained, and an increase of 29,707 maunds under undrained, sugar. The supply carried by rail exhibited a decrease of 52,348 and 93,980 maunds under drained and undrained sugar, respectively. In the figures of road traffic, the fluctuations were very slight, while in the sea-borne imports, drained sugar showed a considerable increase of 1,07,310 maunds. The supply imported during the past three years was derived from the provinces mentioned below :—

PROVINCES.	DRAINED SUGAR.			UNDRAINED SUGAR.

165. The Commissioner of the Presidency Division gives the following account of the sugar industry in his division during the past year:—

"The manufacture of this article is extensively carried on in Jessore and Khulna. The number of sugar factories in Jessore (excluding those in the Jhenida sub-division, for which no figures have been furnished) was 163. The area under date and cane cultivation was 46,276 bighas. The outturn of coarse sugar or *goor* is stated at 2,85,508 maunds, and that of *chini* or fine sugar at 3,03,148 maunds. The Collector is of opinion that but little reliance can be placed in these figures, but in the absence of any more reliable information, he has been obliged to accept them for the purposes of the present report.

"It is reported that some of the principal *kuries* in the Magura sub-division having sustained heavy loss during the previous year, have closed some of their sugar factories, and elsewhere, it is said, there have been reductions. But on the whole the sugar season was favourable.

"The Collector of Khulna has not given any detailed information under this heading. It is only stated that sugar and molasses are largely made in the sudder and Satkhira sub-divisions, and to a limited extent at Bagirhat."

Concerning the routes followed by the sugar trade in the Jessore district, the Collector writes that the "most important change is the diversion of a large portion of the export of sugar from Kotechandpore from the route by road to Kissengunge and thence by Eastern Bengal State Railway to Calcutta to the route by boat to Jhingergatchi and thence by the Central Bengal Railway to Calcutta." The Collector of Nudda states that coarse sugar is manufactured everywhere in his district. Dowlatgunge, Dosanu, Boalmari, Munshigunge, Andulberia and Alandangah in Chuadanga sub-division and Santipore and Chogdah in the Ranaghat sub-division are the principal centres of such manufacture. The Collector of the 24-Pergunnahs gives the following account of this industry in his district:—

"Sugar, both refined and unrefined, is extensively manufactured in this district. Next to rice the largest traffic is carried on in this article. In almost all the sub-divisions attached to this district, manufacture of *goor* is carried on. Baduria in the Bussirhat sub-division is the principal trade centre of *goor*. There are several sugar refineries in this sub-division as well as in the Baraset sub-division. The Deputy Collector of Baraset gives the following account of the trade in sugar in Baraset—"While there (Goburdanga) I enquired into the goods traffic. I found that in 1884 three wagons of sugar or 750 maunds per day had been sent down by the rail from 15th January to 15th March and 100 to 150 bags on Fridays and Tuesdays during the sugar season up to September. In 1885 there was a sensible falling off in the exports of sugar by rail during the first two weeks of January, only three waggons a day or 750 maunds were exported during the rest of the 1st quarter and down to third week of April 50, 60 and 80 bags of sugar containing 2½ maunds were sent. Since, however, the last two weeks 100 to 148 bags have been exported on Tuesdays and Fridays. Last year the price of sugar was Rs. 10 to Rs. 11 per maund. This year it is Rs. 7." The total weight of sugar, both refined and unrefined, carried during the year under report to Calcutta through the several registering stations was 3,19,024 maunds against 2,83,988 maunds in the preceding year, showing an increase of 35,036 maunds or 12·3 per cent. The increase is presumably due to the fact that owing to the partial failure in the paddy crop, people carried on the manufacture of *goor* on a larger scale than in ordinary years."

166. The condition of the sugar industry in Northern Bengal is thus described by the Commissioner of the Rajshahye Division:—

"Sugarcane was a good crop everywhere. The cultivation continues to increase in Rajshahye, having now extended to Nowgong and the west of the district. The Collector says:—"It is to some extent superseding mulberry, though paddy land is also being taken up for the purpose." The ryots find it a very safe crop, and they are enabled to get all that is possible out of it by means of the Behea sugar mills, which continue to rise in public favour, and are used more or less extensively in all the districts except Julpigoree and Darjeeling.

"There was a marked development of trade in molasses in Rajshahye and Pubna. Mr. Buddock, of Rajshahye, observes: 'The business is steadily improving from the increased cultivation of sugarcane and from the more extended use of the Behea sugar mills.' In Darjeeling, too, the trade seems to have expanded a little."

167. In the Dacca Division, sugarcane is largely cultivated in Furreedpore, and the crop was a good one. The Collector of the district, however, remarks that "there has of late been a marked decrease in the manufacture of this article (*goor*) of export, one of the causes being the destruction of the sugarcane caused by wild pigs. *Goor* commanded a fair price and a ready sale. Mr. Badshah reports that about 2,50,000 maunds of *goor* were exported from Madaripore alone." The cultivation of this crop in Backergunge increased by 25 per cent. during the year under report.

168. The Commissioner of the Bhagulpore Division writes on the subject as follows :—

“ The manufacture of crude sugar made satisfactory progress in the Bhagulpore district, in the south of which the cultivation of sugarcane has increased very much. The outturn of *goor* has been estimated at 70,000 maunds, against 60,000 maunds in the preceding year ”

169. The following extract gives an account of the sugar industry in the Patna Division :—

“ The sugar industry, which ranks next in importance to indigo, is carried on more or less extensively in all the districts of this Division. The estimated outturn of this article in the Shahabad district alone was 1,55,648 maunds, which includes the produce of both Sasseram and Buxar sub-divisions, the latter of which is estimated to have yielded 23,880 maunds, valued at Rs. 2,62,689. In the Bettiah sub-division in the district of Champaran the outturn of sugar is estimated at 65,000 maunds, which at Rs. 10 per maund represents a value of 6½ lakhs of rupees. The sugar industry was in a flourishing condition in this district, the area under sugarcane increasing every year. The bulk of the produce is exported. The crop is a troublesome one to grow, as it necessitates a considerable amount of care, but the profits realised from it are also considerable. There was a falling off in the manufacture of sugar in Durbhunga and Gya owing to a partial failure of crop.”

170. In the Chota Nagpore Division the manufacture of *goor* is said to be increasing in Manbhoom, where more sugarcane is now grown than formerly, and the use of the Behea sugar-mill is becoming more popular.

171. The following statement shows all the principal districts which contributed largely to the trade, arranged in the order of the quantities imported into Calcutta :—

The exports of drained sugar to foreign ports fell to a very low point, the decline in comparison with 1883-84 being 92 per cent. The Collector of Customs observes that the crop of beet in Europe and of cane in Java is again said to be very large, so that there is for the present little hope of a revival in exports of Bengal sugar. He writes :—

“ Only the United Kingdom took any considerable quantity of sugar from us last year, the shipments to other countries being insignificant, and even to the United Kingdom the exports are only a fraction of what they were in 1883-84. The cause of this falling off

is the very low price of sugar in Europe, due to the enormous production of beet on the continent. This makes it impossible to send supplies from here at prices low enough to compete. Raw sugar has never been so cheap in England before, the price on the 1st January 1885, being 9s. 6d. to 12s. per cwt. against, on the 1st January 1884, 16s. 6d. to 19s. per cwt. Coarse sugar was sold at 1d. per lb to be used for fattening cattle in place of linseed cake. The exports to England were all during the three first months of the year; during the remaining nine they ceased altogether.

"Bengal has been a sugar-exporting as well as a sugar-producing country, but in the past year it has almost ceased to export, and has become an importing country instead."

173. If two and a half maunds of undrained sugar be taken as equal to one maund of drained sugar, the total of the year's traffic amounted to 19,51,853 maunds of undrained sugar under imports, and to 7,48,587 maunds under exports. The excess of imports over exports therefore amounted to 12,03,266 maunds, against 9,16,281 maunds in 1883-84, and 9,52,819 maunds in 1882-83.

TEA, INDIAN.

174. The following statement shows the registered trade of Calcutta in Indian tea during the past year, as compared with the totals of the preceding two years—

SPECIFICATION OF ROUTES.	IMPORTS.						EXPORTS.					
	1882-83.		1883-84.		1884-85.		1882-83.		1883-84.		1884-85.

175. Last year there was an increase in the imports as well as the exports compared with the previous year. The quality of the year's crop was up to the average, except in Darjeeling, where it was disappointing, owing to the unfavourable weather during the principal manufacturing months of the season. According to the customs returns of the Calcutta port, the average value per lb showed a falling off of 7.68 per cent., viz. from 10 annas 10 pie to 10 annas. The Collector of Customs remarks as follows on the prospects of the tea industry in India—

"The exports of tea have advanced in comparison with 1883-84 by 7 per cent. with a decline in the average declared value to the lowest point yet reached; for with an increase in shipments of over 4 millions of pounds there is a decline in the total declared value of over 4 lakhs of rupees. There has been a steady extension in the production of tea, owing principally, as I mentioned in last year's report, to the opening out of new areas in Sylhet and the Dooars. These new gardens having been started as economically as possible, can produce at less cost than the older ones, and make profits, while the latter are losing. Prices fell heavily last year, and many of the older gardens were far from remunerative. It appears likely that proprietors will have to be satisfied in the future with lower prices than they obtained in past years, for with a large increase in production, unless the markets for it can be proportionately extended, the value of tea in the ordinary course must fall.

"I referred in last year's report to the growing importance of the tea industry in Ceylon, and to the competition that will ultimately be the result of the large extension of tea growing in that island. The amount even now is insignificant compared with the exports of Indian tea, but it will increase year by year, and the extension in cultivation already is said to have been from between 200 and 300 acres in 1873 to 48,000 acres in 1884. This is an enormous advance, and the production, when the large available acreage, said to be from 150,000 to 160,000 acres, has been opened out and comes into full bearing, will have a very sensible effect on the tea market. It has been estimated that about 70,000,000 pounds yearly may eventually be the outturn of Ceylon. Tea there has several advantages. First and foremost is the excellent quality of the tea produced, for it is said to be equal to the very best of the Indian teas, and it obtains quite as high prices. In London during the past year there was an active enquiry for Ceylon teas, buyers finding them to be most useful for mixing purposes. Then an acre in Ceylon will produce half as much tea again as it will in

India. The climate too is more to be depended on for tea-growing; there is a good supply of labour, and the tea can be more cheaply shipped. Lastly, Ceylon is growing tea on our experiences, and will presumably avoid our past mistakes. With all these advantages it is clear that the prospects of Ceylon tea are in the ascendant, and that the expansion of tea growing there will continue rapid.

"With the largely increased production in prospect, it will surely become of vital importance to Indian tea interests that large markets in Australia and America should be arrived at, but it would be rash to infer from past experience that the hopes in this direction will be realized at all shortly. I should be more sanguine of the large extension of the market for cheap tea in India itself."

176. In the Rajshahye Division there was a further development of the tea industry. The number of gardens in Julpigoree and Darjeeling rose from 232 in 1883 to 276 in the year under report; the area under cultivation showed an increase of 5,748 acres, the gross yield advanced by 10.59 per cent., while the percentage of the average yield per acre from mature plants was 289.05lbs. In his trade section of the annual administration report for the past year, the Commissioner writes—

"The export of tea is confined to Julpigoree and Darjeeling only—the two producing districts—where it is steadily expanding. The quantity exported from Darjeeling during the year was 72,570 maunds, against 66,364 maunds in the previous year. The quantity sent from Julpigoree could not be ascertained by the Deputy Commissioner, but the proportional increase on the produce and export of the previous year was greater than in Darjeeling. From both these districts all the tea grown is despatched by rail to Calcutta, and the export from Julpigoree was simply almost the entire quantity manufactured, which was 2,673,884lbs."

177. The year under report was only a fair one for tea in Chittagong. In that district several gardens suffered from the unfavourable distribution of the rains. The Commissioner of the division gives the following account concerning the manufacture of this article during the past official year—

"The export of tea from Chittagong was slightly greater than in 1883-84, but considerably under that of 1882-83, the figures being—

	Rs.	Difference, as compared with previous years.	
		Rs. (+)	Rs. (-)
1882-83	10,31,881
1883-84	8,89,631	1,52,250
1884-85	8,93,923	4,292

These figures include tea exported both directly to England and to Calcutta. They differ slightly from the figures given last year, as the amount exported directly to England was omitted in 1882-83, and there was some slight mistake, which I cannot now explain, about the figures for 1883-84. Owing to the low prices which were obtained during the year, nearly all gardens have been reducing expenditure and staff, and it does not seem likely that this industry will extend unless prices go up and until the whole district is properly surveyed and Government is in a position to give a better title to waste lands than is possible at present."

178. As regards the Chota Nagpore Division there was an appreciable increase in the production per acre of mature plants in the Hazaribagh and Lohardugga districts, though the Deputy Commissioners speak of the past season as having been very unfavourable for tea cultivation, owing to the abnormally deficient rainfall during the first four months of the year. "Tea in Chota Nagpore," says Colonel Samuells, "can never pay, firstly, on account of the climate during March, April, and May, and, secondly, because the soil is too poor and unable, even with high cultivation and manure, to yield a proper and adequate outturn per acre. Even in quality the Chota Nagpore teas seem to be held in low estimation as compared with other Indian teas, and there have been complaints generally of the low prices obtained in the Calcutta market during the last season."

179. The import traffic during the past year shows an increase of 6.27 per cent. as compared with 1883-84, but a decrease of 1.42 per cent. as compared with 1882-83. There was little change in the quantities carried during the past year by the Eastern Bengal State Railway and by sea as compared with the previous year, while the East Indian Railway showed a falling off of 22.17 per cent., but there was a decided increase (10.07) per cent. in the supplies brought by inland steamers.

The following table gives an abstract of the imports from each province separately during the past three years—

	1882-83.		1883-84.		1884-85.	
	Mds.	lbs.	Mds.	lbs.	Mds.	lbs.

The Collector of Customs, Calcutta, writes—

“The shipments have been to the United Kingdom, Australia, and the United States as usual, the quantity to other countries being quite insignificant.

“Objections have again been raised by the brokers in London regarding the way the crop is placed on the market. No attempt is made to regulate the supplies, and thus within a few months nearly the entire crop is put up to auction. In October the imports were nearly 10½ millions of pounds, and in December they were over 10½ millions of pounds. As the quantity of the tea sent forward increases, which it will year by year, this disadvantage must be aggravated, unless a better arrangement can be devised.

“The increase of 319 per cent. in the exports of tea to Australia is satisfactory, and, after a somewhat troubled experience, this trade seems to have a fair prospect before it; but even last year the imports there were comparatively insignificant, and that the market is an elastic one is hardly to be inferred. Australia does not take the best qualities of our teas, but a low medium quality.

“To the United States the exports have again declined. China and Japan teas are said to have a strong hold on this market, and it must be a long time before we can secure any large share of the trade. Constant shipments will, no doubt, gradually make our tea known and may ultimately create a demand for it, but the process is likely to be a slow one.”

184. A deduction of imports from exports shews a difference of 59,384 maunds during 1884-85, and of 53,243 maunds in 1883-84. In 1882-83, however, there was a surplus of imports over exports amounting to 26,116 maunds, and the difference must have been made up from old stocks if the figures of the last two years are accurate.

TOBACCO.

185. The total quantity of the trade of Calcutta in tobacco during the past three years is shown in the following statement:—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.

186. Owing to the slackness of demand both in Calcutta and Burmah, there was a falling off in this trade during the past year as compared with the two previous years. In Northern Bengal, tobacco generally yielded

a good outturn. It is largely grown in Rungpore, and is an important article of export from that district. The Commissioner of the Division writes:—

“Rungpore is famous for its trade in tobacco. There has been a large increase in the traffic in this article on the Northern Bengal State Railway, amounting to 12,686 tons, to which Rungpore undoubtedly contributed a good portion. The demand for Rungpore tobacco exists chiefly in Burmah, where it is sent *viâ* Calcutta to be made into Burmese cheroots.

“The trade in Pubna seems to have been brisker, while in Rajshahye it was the reverse.

“Tobacco is one of the principal exports of Darjeeling to Tibet. The quantity imported into the district from the plains was 3,614 maunds, and the exports 2,841 maunds.”

187. In the Patna Division the trade in this staple was in a depressed state on account of a bad crop. The tobacco factory at Poosa, in the Durbhunga district, however, is said to have turned out 300,000 pounds of prepared tobacco during the year under notice, and the manufacture of tobacco there is said to be prospering. The tobacco exports of the Mozufferpore district were only 97,110 maunds last year, against 1,07,050 maunds in the previous year. The accounts received from Purneah show that tobacco was a very poor crop both in the Sudder and Arrareah Sub-divisions during the year under report. In the Presidency Division tobacco is one of the staple articles of produce in the Ranaghat Sub-division in Nuddea, and the Collector reports that “the production of tobacco as well as its trade during the year was very successful.” In the 24-Pergunnahs district, however, the outturn of tobacco was not satisfactory. The Collector writes:—

“The cultivation of tobacco leaves is carried on in every part of the district, but the yield, except in the Bussirhat Sub-division, is insufficient even for local demands. In Baduria, in the Bussirhat Sub-division, the cultivation is carried on on a large scale, and the surplus finds its way to the Calcutta market. A sort of tobacco called *hingly* is produced there, and it fetches for its superior flavour higher price than the ordinary tobacco leaves. * * The decline in the export trade was nearly 60 per cent., and was due to the meagre outturn of the year's crop.”

188. The total quantity of tobacco imported by all routes was 21·11 per cent. below the trade of 1883-84, and 5·43 per cent. below that of 1883-84. Compared with the previous year, the supply carried by the Eastern Bengal State Railway showed a falling off of 81,736 maunds, or 24·31 per cent.; that carried by road routes of 31,295 maunds, or 14·68 per cent., and that by country boats of 46,575 maunds, or 24·87 per cent. The following statement shows the imports of tobacco from the different provinces during the past three years:—

The heavy decrease of 1,49,990 maunds under Bengal was owing to shorter despatches of this article, chiefly from the districts of Rungpore, the 24-Pergunnahs, and Hooghly, which exported 69,166 maunds, 37,165 maunds, and 25,471 maunds, respectively, less than in 1883-84.

189 The principal river marts from which the largest supplies were despatched were—

Concerning the trade of Calcutta with foreign ports, the Collector of Customs writes—

“The exports of unmanufactured tobacco declined by 40½ per cent. in the past year in comparison with 1883-84, but they were still in advance of previous year's shipments.

“Shipments have been smaller to the United Kingdom, to France, and to Mauritius; against advances to Spain (Gibraltar), Belgium, and Holland.

“The falling off in shipments to the United Kingdom is probably partly due to larger shipments having been made direct to Belgium and Holland. Bengal tobacco is not consumed largely in the United Kingdom: it is principally used in the manufacture of the low-priced common cigars produced on the continent.”

193. The excess of imports over exports amounted to 2,04,693 maunds,

Quantity not exported before the close of the year. against 1,88,618 maunds in 1883-84, and 2,29,394 maunds in 1882-83.

CHAPTER X.

INLAND AND SEA-BORNE TRADE OF CHITTAGONG.

The total weight of the traffic carried to, and from, Chittagong by country boats registered during the past three years, was as follows:—

	1882-83.	1883-84.	1884-85.
	Mds.	Mds.	Mds.
Imports	28,08,852	19,22,906	19,82,753
Exports	4,66,542	4,71,905	6,19,522
Total	32,65,394	23,94,811	26,02,275

2. The aggregate quantity carried last year showed an increase of 2,07,464 maunds, or 8·66 per cent. as compared with 1883-84, and a decrease of 6,63,119 maunds, or 20·31 per cent. as compared with 1882-83; there was a marked improvement in almost every class of goods. In the import traffic, the largest increase as compared with 1883-84, occurred in cocoanuts (2,888,550 in number), firewood (2,23,526 maunds), hides (103,495 pieces), spices (63,123 maunds), lime and limestone (27,873 maunds), mustard and rape seed (27,278 maunds), piece-goods, Indian (Rs. 25,860), oils (19,604 maunds), tobacco (14,664 maunds), betelnuts (14,057 maunds), and undrained sugar (11,970 maunds); and the largest decrease under rice (4,06,641 maunds), paddy (22,422 maunds), and timber (17,772 maunds). In the export traffic the most noticeable items of increase were European piece-goods (Rs. 2,82,460), salt (25,046 maunds), oils (18,513 maunds), and bamboos (320,258 in number); timber showed the largest decrease (14,706 maunds).

3. The following comparative statement shows the value of this trade and of the sea-borne trade during the past three years:—

		Imports.	Exports.	Total.
		Rs.	Rs.	Rs.
Inland trade	{ 1882-83 ...	61,51,334	14,15,629	75,66,963
	{ 1883-84 ...	58,82,768	13,98,845	72,81,613
	{ 1884-85 ...	77,29,259	18,78,726	96,07,985
Sea-borne trade...	{ 1882-83 ...	1,12,96,793	1,23,63,497	2,36,60,290
	{ 1883-84 ...	1,16,99,673	1,30,57,055	2,47,56,728
	{ 1884-85 ...	1,12,30,570	1,03,16,828	2,15,47,398

As compared with 1883-84, a marked increase is shown in the value of the inland trade of Chittagong. Under imports, the advance was 31·39 per cent., and under exports, 34·31 per cent. The falling off in the total sea-borne trade was 12·96 per cent. as compared with 1883-84, and 9·31 per cent. as compared with 1882-83. The decrease of Rs. 4,69,103 in imports as compared with 1883-84 is chiefly attributable to the short importation of gunny-bags, jute, tobacco, and treasure from Calcutta and Naraingunge, while the large falling off of Rs. 27,40,227 in the export trade was caused by smaller quantities of almost all the principal articles of trade having been sent to both foreign and Indian ports during the past year. The Commissioner of the Chittagong Division writes:—

"The trade of Chittagong has necessarily shared to a certain extent the general depression which has taken place all over India, and the progress of the trade of the port is not equal to that of the last few years; but, on the whole, the statistics of the past year are satisfactory and give hope of still further extension in the trade of the port as soon as a revival takes place in trade generally."

4. *Lime and limestone.*—The trade in these articles showed a large expansion during the past year, the quantity imported into Chittagong having been

38,759 maunds, against 10,886 maunds in 1883-84, and 12,588 maunds in 1882-83. Of these supplies, Naraingunge contributed 37,060 maunds in 1884-85, 9,860 maunds in 1883-84, and 12,517 maunds in 1882-83.

5. *Caoutchouc*.—The value of the coasting trade under exports was Rs. 8,480, against Rs. 10,443 in 1883-84, and Rs. 8,430 in 1882-83, the decrease being due to the high prices which ruled for this article in the interior of the Chittagong district.

6. *Cotton, raw*.—In the past year the cotton crop to be excellent, but it was greatly damaged by the heavy rainfall just before it was fit to be gathered. The quantity exported from Chittagong by country boats showed an increase of 3,039 maunds as compared with 1883-84, and a decrease of 4,012 maunds as compared with 1882-83. The increase during the past year was due to smaller exports during the previous year, and not to actual expansion of trade. The exports by coasting vessels amounted in value to Rs. 1,70,200, against Rs. 1,81,730 in 1883-84, and Rs. 3,01,283 in 1882-83, the decrease being due to shorter exports to Calcutta on account of the high prices which prevailed in the Chittagong market. The total supply of raw cotton brought to Naraingunge from Chittagong during the past three years is shown in the following statement:—

Year.			By country boats.	By sea-going vessels.	Total.
			Mds.	Mds.	Mds.
1882-83	6,980	46,141	53,121
1883-84	640	23,676	23,916
1884-85	792	22,684	23,476

7. *Cotton twist and yarn, European*.—According to the coast trade returns, the value of the imports was Rs. 2,19,785, showing a decrease of Rs. 4,528 as compared with the trade of 1883-84, and an increase of Rs. 811 on that of 1882-83; the deficiency in the supply was compensated for by a more than corresponding rise in the imports of piece-goods from Calcutta for local consumption in the Chittagong district.

8. *Cotton piece-goods, European*.—Last year the total value of the import trade by coasting vessels under this head was Rs. 18,63,168, against Rs. 17,04,493 in 1883-84, and Rs. 16,51,886 in 1882-83. The increase during the past year is stated by the Collector of Customs to be due to larger supplies having been received from Calcutta to meet the increased local demand. The total value of these goods exported by country boats was Rs. 6,00,071, showing an increase of Rs. 2,82,460 over the figures of 1883-84, and of Rs. 2,97,256 over those of 1882-83. The whole of the past year's supply was sent from the town of Chittagong to the different markets in the interior of the district and to Sundeep in Noakhally; a small quantity also found its way to Akyab. The large increase was due to greater native demand for European piece-goods, which are said to be cheaper than those manufactured locally.

Concerning piece-goods and yarns, the Commissioner makes the following remarks, which are worthy of notice:—

"There is a very large trade in piece-goods and yarns, and these are imported entirely from Calcutta, the freight for these being Rs. 20 a ton. This is an article of trade which must in time be imported direct. The saving would be very large, as not only would the heavy freight from Calcutta to this place be saved, but the goods could be landed here cheaper than in Calcutta, on account of the smaller port and towage charges. In fact it is a matter of surprise that firms like Ralli Brothers or George Henderson and Company (M. David and Company), who have branches here, do not import direct and supply the whole market of East Bengal.

"If imports came here direct, all Noakhally would be supplied cheaper than it now is from Calcutta. The Collector of Noakhally values the piece-goods now imported at Rs. 7,62,642; but this must be much under the real consumption, as it is less than Re. 1 a head of population, and these goods have almost entirely supplanted native-woven material. Tipperah is at present supplied partly from Calcutta direct and partly from Dacca. The value of piece-goods imported yearly into that large district alone is calculated to be Rs. 41,56,000. If goods were imported direct from England to Chittagong, the whole trade of Tipperah would necessarily come here, and also a very large proportion of the Dacca trade, because it would pay the jute brigs well to carry their goods to Naraingunge at two annas a maund and bring back jute at the same rate. It is going empty one way and getting only two or three annas a maund the other way that will not pay them. The Dacca piece-goods

market is a very large one, and I calculate that a maund of piece-goods could be laid down there for over Re. 1 less by this route than *via* Calcutta, the difference being as below :—

	Rs. A. P.
Difference in freight from Chittagong to Dacca, at 2 annas a maund by water to Naraingunge and, say, 10 pie from Naraingunge to Dacca by rail, as compared with present rate, Calcutta to Dacca, which is Re. 1, say ...	0 13 2
Saving in being able to tranship at once from ship to ship in Chittagong, and of Calcutta cartage, say ...	0 4 0
Total ...	1 1 2

“On the heavier and coarser classes of piece-goods, the profit would be very large. It would of course be less on the finer kinds, but it is chiefly the coarser kinds that are consumed.”

9. *Jute, raw*.—This article is brought to Chittagong from Naraingunge for shipment to England. The total quantity imported during the past three years, was as follows :—

Imports into Chittagong from Naraingunge.

	1882-83. Mds.	1883-84. Mds.	1884-85. Mds.
By sea-going vessels ...	16,22,714	14,81,976	18,53,485
By country boats	60
Total ...	16,22,714	14,81,976	18,53,545

The quantity shipped for England from this port during those years, was as follows :—

Exports to the United Kingdom from Chittagong.

	1882-83.	1883-84.	1884-85.
Quantities in Cwts. ...	1,149,257	1,064,570	1,063,268
Ditto in Mds. ...	15,64,266	14,48,998	14,47,226
Total value in Rs. ...	73,23,050	70,69,330	61,88,602

Compared with 1883-84, the decrease during the past year amounted to 1,772 maunds in quantity, and to Rs. 14,80,728 in value. The Commissioner of the Chittagong Division writes as follows :—

“The quantity of jute exported was very nearly the same in the two years, being only about 65 tons short in the past year; but the difference in value is enormous, being nearly 15 lakhs of rupees, and is caused by the low selling price of jute in the year under report.

“The reason of the short exports of the past year as compared with the imports is that one ship left after the close of the year. But for this, the exports would have exceeded last year in quantity. The value of the jute imported was clearly wrongly declared, as the export value ought always to be greater. The freight for jute from Naraingunge to Chittagong has generally come to about 4 annas a maund, but in the current year shippers are holding out for 2½ annas a maund or 12 annas a bale, and have chartered some brigs at that rate. This rate will probably drive the smaller brigs off the trade, and can only pay those of the larger ones which can manage to make four to six trips in the year, or if they can get a cargo both ways.”

10. *Gunny-bags*.—The total value of the imports into Chittagong by sea-going vessels was Rs. 1,02,009, against Rs. 1,81,473 in 1883-84, and Rs. 1,75,463 in 1882-83; the falling off was due to the decrease in the export grain trade, and to the high prices which prevailed.

11. *Cocoanuts*.—The number of cocoanuts imported into Chittagong by country boats was 4,252,840, against 1,364,290 in 1883-84, and 1,299,005 in 1882-83. The supply received from Noakhally was 2,776,540, and from Burrisaul 1,474,100. The large increase last year is stated by the Collector to be due to increased demand for local consumption, and for manufacture of oil.

12. *Rice and paddy*.—The import trade under this head carried by country boats during the past three years is shown in the following table :—

	1882-83. Mds.	1883-84. Mds.	1884-85. Mds.
Rice ...	18,68,827	11,96,152	7,89,511
Paddy ...	5,75,266	4,49,116	4,26,694

The remarks made by the Collector of Customs under this heading are
extracted below:—

"Rice, husked and unhusked, shows a considerable decrease—due to large quantities having been deflected to Calcutta and elsewhere to supply more profitable markets. The closing of the Mohesh khal in this district diminishes the supply of grain to this port, as owing to the silting of that canal, boats have to accept the greater risk of coming round the sea face of the district, and so in rough weather stop coming altogether."

Imports of rice into Chittagong during 1884-85.

				GRAND TOTAL	4,26,694
	Total	2,19,501			

The supply of rice and paddy exported to foreign ports from Chittagong during the past three years, was as follows:—

			1892-93.	1893-94.	1894-95.
Rice	{ Cwts.	...	776,947	663,939	407,442
	{ Mds.	...	10,57,511	9,03,695	5,54,573
Paddy...	{ Cwts.	...	5,812	12,647	} Nil
	{ Mds.	...	7,912	17,214	

The Commissioner observes that the "high price at which rice sold in India checked export very largely, as it does not pay to export when rice sells here above a certain price, and the same cause entirely put a stop to the export of paddy."

According to the above figures the surplus of imports over exports during the past three years, was as follows:—

				1882-83.	1883-84.	1884-85.
Rice	{ Cwts.	596,068	214,866	172,607
	{ Mds.	8,11,316	2,92,457	2,34,938
Paddy	{ Cwts.	416,831	317,315	318,489
	{ Mds.	5,67,854	4,31,902	4,26,694

The quantity of rice and paddy shipped for the different coast ports from Chittagong during the past three years, was as follows:—

			1882-83.	1883-84.	1884-85.
Rice ...	{ Cwts.	431,413	318,942
	{ Mds.	5,87,301	4,34,116
Paddy ...	{ Cwts.	412,216	315,916
	{ Mds.	5,61,072	4,29,997
					203,534
					2,77,034

13. *Hides and skins.*—This trade is steadily increasing, the value of the exports by sea-going vessels having amounted to Rs. 2,63,953, against Rs. 2,57,105 in 1883-84, and Rs. 2,85,734 in 1882-83.

14. *Oils.*—The total value of oils imported by coasting vessels was Rs. 1,12,330, showing a decrease of Rs. 33,556 as compared with 1883-84, and of Rs. 7,791 as compared with 1882-83. The Commissioner writes:—

“There has been a complete change in the course of trade in inflammable oils in the last few years. Formerly American kerosine oil was imported from Calcutta direct or *via* Naraingunge. Last year oil to the value of Rs. 2,03,265 was imported from New York and Boston direct, and another ship virtually came direct, although, from its having called at Bombay for orders, it is entered as interportal. The consumption of American oil is steadily increasing, and it is driving out the Burmese oils to a considerable extent.”

The quantity of oils carried to Chittagong by country boats rose from 11,614 maunds in 1882-83, to 12,983 maunds in 1883-84, and 32,587 maunds in 1884-85. The latter item was chiefly comprised of kerosine oil from Calcutta, and the increase is said to be due to larger purchases having been made during the year owing to prices being low.

15. *Salt.*—This continues to be the main article of import from England. The quantity of salt imported from the United Kingdom was 6,30,270 maunds, against 4,57,363 maunds in 1883-84, and 3,22,002 maunds in 1882-83. The salt imported here now supplies the whole of East Bengal through the bonded warehouses at Naraingunge, and the increase during the past year was due to the development of the trade. The exports by country boats during the past three years were:—

			1882-83.	1883-84.	1884-85.
			Mds.	Mds.	Mds.
To Chittagong	1,86,151	1,86,994	1,92,053
„ Noakhally	29,985	25,894	43,649
„ Other districts	1,928	2,750	4,982
Total	2,18,064	2,15,638	2,40,684

Besides these supplies, the amount of salt carried to Naraingunge by coasting vessels was 2,83,002 maunds, against 2,48,860 maunds in 1883-84, and 1,71,278 maunds in 1882-83.

16. *Mustard and rape seed.*—The quantity carried to Chittagong by country boats rose from 4,096 maunds in 1882-83, to 5,164 maunds in 1883-84, and 32,442 maunds in 1884-85. Of this latter supply, 28,207 maunds were shipped from Naraingunge, against only 1,780 maunds in 1883-84, and 2,150 maunds in 1882-83.

17. *Spices.*—The boat traffic returns of the inland trade show an importation of 66,573 maunds of spices, chiefly chillies and black pepper, against 3,450 maunds in 1883-84, and 3,866 maunds in 1882-83. The quantity shipped from Naraingunge alone amounted to 43,114 maunds, against 370 maunds in 1883-84, and 89 maunds in 1882-83.

18. *Sugar.*—The import trade in drained and undrained sugar carried by country boats during the past three years is shown below—

			1882-83.	1883-84.	1884-85.
			Mds.	Mds.	Mds.
Drained sugar	3,863	3,800	7,341
Undrained ditto	36,491	36,414	48,384
					o 2

The value of sugar imported into g by coasting vessels showed an increase of Rs. 15,975 over the figures of , and of Rs. 7,609 over those of 1882-83.

19. *Tea, Indian*.—The total quantity of Indian tea exported from Chittagong by coasting vessels was 890,076 lbs., against 888,845 lbs. in 1883-84, and 1,029,973 lbs. in 1882-83. The decrease in the past year's trade is attributed to an unfavourable season. The quantity of tea sent direct to the United Kingdom was 3,847 lbs., against only 786 lbs. in 1883-84, and 954 lbs. in 1882-83.

20. *Tobacco*.—The quantity brought to Chittagong by coasting vessels was valued at Rs. 83,065, against Rs. 1,51,594 in 1883-84, and Rs. 70,913 in 1882-83; the decrease is said to be due to a larger quantity having been imported in the previous year. The total quantity of tobacco despatched to Chittagong from Naraingunge during the past three years, was as follows:—

Year.				By country boats.	By sea-going vessels.	Total.
				Mds.	Mds.	Mds.
1882-83	1,996	6,687	8,683
1883-84	1,192	25,042	26,234
1884-85	10,004	7,234	17,238

The amount of tobacco shipped for foreign ports was 16,176 lbs., against 70,136 lbs. in 1883-84, and 30,353 lbs. in 1882-83.

CHAPTER XI.

SEA-BORNE TRADE OF ORISSA.

The total value of the sea-borne trade of the Orissa ports during the past three years, exclusive of Government transactions, is shown in the following statement:—

1	2	3	4	5	6	7	8	9	10

2. This trade is in a very flourishing condition, every year showing an improvement over the preceding one. The figures for the past year show a large increase, amounting to 28·99 per cent. as compared with 1883-84, and 64·15 per cent. as compared with 1882-83. The imports were 30·25 per cent. above the figures for 1883-84, and 67·80 per cent. over those of 1882-83, while the export traffic rose by 27·79 per cent. as compared with 1883-84, and by 60·84 per cent. as compared with 1882-83. An analysis of the figures, district by district, shows, when compared with 1883-84, an increase during the past year of 37·12 per cent. in the case of Balasore, and of 8·69 per cent. in that of Cuttack, but a decrease of 12·87 per cent. in the trade of Pooree. The rise of 36·89 per cent. in the imports into Balasore is spread over almost all the chief articles of trade, while the increase of 37·46 per cent. in the exports was mainly in specie, the figures under which rose from Rs. 6,86,335 to Rs. 16,69,730, while the value of the advance under goods traffic amounted to only Rs. 7,20,042. The following remarks are made in the report of the Collector of Sea Customs, Balasore:—

“This has resulted from the fact that while an exceptionally good harvest had filled the district stocks to overflowing, there was an exceptionally large demand for our rice from other ports of India, which offered high prices. I do not think that I need add

anything to what I have already said upon the subject, or expatiate upon the evident access of prosperity which the district is enjoying. The figures speak for themselves. I will only add that, for the first time in my life, I have heard the fullest satisfaction expressed by the people in general with their own condition and prospects."

3. In Cuttack the decrease in the value of imports amounted to 20.84 per cent. as compared with the previous year, and was chiefly due to there having been no traffic under brass and copper, and partly to short consignments of liquors, gunnies, provisions, and miscellaneous goods. In the export trade, however, there was an increase of 18.42 per cent. The following remarks are made by the Commissioner of the Orissa Division regarding the trade of Cuttack:—

"The cause of diminution in trade is to be accounted for by its deflection to Balasore and Pooree. Shippers find Chandbally a better port for shipping and landing goods, and False Point has fallen out of fashion. At times there is a heavy swell in the harbour, and the transhipment of goods is risky. While the coast export trade decreased, there was a considerable increase in the exports to foreign countries."

4. As regards Pooree, the falling off in the imports was considerable, viz. 93.57 per cent.; but in the case of exports the figures rose by 12.29 per cent. as compared with 1883-84. The decrease under imports was due partly to a decline in the imports of bags, in consequence of merchants having imported *via* Chandbally owing to facility of landing at that port, and partly to the non-import of specie for the purchase of grain as merchants made their remittances in currency notes.

5. The entire traffic of the Orissa ports registered during the past three years is shown in the following table, according to the districts which contributed to the trade:—

Imports into Orissa.

		From Calcutta.	From other Indian ports.	From Foreign ports.	Total.
		Rs.	Rs.	Rs.	Rs.
Balasore	{ 1882-83	52,41,748	31,431	52,73,179

Total	{ 1882-83	31,79,635	17,07,793	11,14,177	59,91,605
	{ 1883-84	40,30,348	12,19,893	12,60,960	65,11,201
	{ 1884-85	52,45,510	23,31,766	20,76,246	96,53,522

The foregoing figures show that 99.26 per cent. of the imports came from Calcutta, while as regards the export trade, only 54.34 per cent. of the total traffic was with Calcutta, and of the remainder, 24.15 per cent. was with other Indian ports, and 21.51 per cent. with foreign ports.

6. The chief articles of merchandise in the import traffic during the were—

Treasure	Rs.							2,83,475	9,11,030
									14,57,137

7. *Apparel*.—The total value of the imports under this head showed a decrease of Rs. 1,01,861 as compared with 1883-84, but it exceeded the figures for 1882-83 by Rs. 1,40,644. Last year the value of these goods sent to Balasore from Calcutta amounted to Rs. 3,76,321 against Rs. 4,58,814 in 1883-84.

8. *Cotton twist and yarn*.—Last year the importation of European cotton twist and yarn was much the same in quantity as in the previous year, but the increase in value was Rs. 1,19,389, or 8·06 per cent. In twist and yarn of Indian manufacture there was an advance of 4,942 maunds in quantity, and of Rs. 2,74,213 in value. The Indian twists in demand are from Nos. 10 to 40, and the English twists from No. 50 upwards. The Customs officer of Chandbally writes:—

“The trade in mule twist (English) has fallen off a little, I believe, owing to the small demand of finer kinds not being used for country manufacture of cloth, and also being somewhat dearer. The import of Indian twist is much about the same as last year (1883-84), and is in good demand for weaving, it being of coarser texture; the making of country cloth appears to be steady, and is all worked by hand-loom. The main portion of the twist goes into the Cuttack district, and some little portion is kept in the Balasore district, being stored here (Chandbally) and sold to petty traders, who take it into the interior.”

9. *Cotton piece-goods*.—The total value of these goods of European manufacture rose from Rs. 9,38,190 in 1882-83 to Rs. 10,19,400 in 1883-84, and Rs. 15,15,676 in 1884-85. On the other hand, the value of country-made piece-goods fell from Rs. 13,209 in 1882-83 to Rs. 8,942 in 1883-84, and Rs. 865 in 1884-85. The greater part of the imports registered at Chandbally go to Cuttack, only a small portion pass to Balasore. The Commissioner writes:—

“A large trade in piece-goods and twist is carried on up the Byturni river from Chandbally to Jajpore. For Cuttack the trade passes up the Brahmini and then by canal. For the interior pack bullocks are used. The want of a road from Chandbally to Bhuddruck is seriously felt. The chief port of the district having no connection with its head-quarters, causes traders great inconvenience. The Government sanctioned the construction of a road, which has been discontinued, I presume, for want of funds. I would press this want on the attention of Government.”

10. *Gunny bags*.—The total number of bags imported during the past year was 2,923,515, against 2,156,798 bags in 1883-84, and 14,92,852 bags in 1882-83; the increase is attributed to the development of the trade in rice and paddy.

11. *Metals*.—The aggregate increase under this head amounted to 9,604 maunds as compared with 1883-84, and to 18,741 maunds as compared with 1882-83. The whole of the last year's supply was sent to Balasore from Calcutta. The increase during the past year was due to the coast canal works.

12. *Oils*.—Owing to an increase in the consumption of kerosine oil, which is said to be in great favour, the import trade in oils showed an advance of 12,677 maunds and 18,382 maunds as compared with 1883-84 and 1882-83, respectively.

13. *Ghee*.—The imports of ghee were comparatively small during the year, namely 962 maunds against 1,423 maunds in 1883-84, and 1,331 maunds in 1882-83.

14. *Spices*.—This trade has largely expanded, the quantity of imports having amounted to 27,149 maunds, against 20,869 maunds in 1883-84, and 5,613 maunds in 1882-83.

15. *Betel-nuts*.—Compared with 1883-84, there was a falling off in quantity amounting to 10,708 maunds, but the money value of the trade showed a large increase of Rs. 1,32,871.

16. *Tobacco*.—The importation of tobacco showed an increase of 1,319 maunds as compared with 1883-84, and of 7,863 maunds as compared with 1882-83.

17. *Treasure*.—The value of specie imported during the past year was Rs. 14,57,137, or Rs. 5,46,107 in excess of the figures of 1883-84, and Rs. 11,73,662 in excess of those of 1882-83.

18. The quantity and value of the principal articles exported from the Orissa ports during the past three years are given below :—

The exports of rice were 2,20,191 maunds below the trade of 1883-84, but 6,37,942 maunds in excess of that of 1882-83. The money value, however,

showed a considerable advance of Rs. 4,89,710 as compared with 1883-84. In the case of paddy, the increase amounted to 4,70,195 maunds on the returns of 1883-84, and to 4,35,353 maunds on those of 1882-83. The Collector of Balasore writes—

“It is worthy of note that it is paddy and not rice which heads the list this year. The quantity of rice sold is in fact somewhat smaller than that of 1883-84, though its value is much higher. But the exports of paddy have sprung up from some 35 thousand to some 380 thousand cwt., which serves to give one an idea of the enormous dimensions of the late splendid harvest. It will be seen that notwithstanding that more than ten times as much was exported, the prices were considerably higher than in 1883-84. The value of paddy was then only Re. 1-7-2 a cwt. (a good price for Orissa), whilst it rose this year to Re. 1-12-7. The price of rice has risen from Rs. 2-6-0 to Rs. 2-13-0 a cwt.

In the case of Cuttack, too, while the quantity of food-grains exported during the year decreased, the value increased considerably. The shipment of rice to foreign countries showed an improvement, but that to coast ports, a falling off. In the former case, the countries that took larger quantities than in 1883-84 were Colombo and Galle. Regarding the trade with coast ports the Collector writes—

“Again there has been a noticeable falling off in shipment of rice to coast ports as compared with 1883-84 of about 59,865 cwt. of the value of Rs. 1,13,285, and the cause of this striking decrease is owing chiefly to the non-exportation of rice to Calcutta, Vizagapatam, Masulipatam, Bimlipatam, and Tuticorin, wherein a greater quantity of rice was shipped in the preceding year.”

The destination of the exports of rice and paddy, port by port, during the past three years was as follows:—

		TO INDIAN PORTS.						TO FOREIGN PORTS.							
		Calcutta.	Madras.	Bombay.	Laccadives.	Other ports.	Total.	Mauritius.	Colombo.	Galle.	Maldives.	Other ports.	Total.	Grand Total

20. *Hides.*—Owing chiefly to a rise in value of six annas per piece there was a satisfactory recovery last year in the export trade in hides, the number returned having been 378,669 pieces, against 341,378 pieces in 1883-84, and 375,699 pieces in 1882-83.

21. *Timber.*—This traffic rose from 38,313 maunds in 1882-83, to 57,570 maunds in 1883-84, and 68,576 maunds in 1884-85, but the value of the trade showed a decrease of Rs. 44,460 as compared with 1883-84, and of Rs. 32,774 as compared with 1882-83.

22. *Lac.*—Under this head a falling off of 2,868 maunds is observed as compared with the figures of 1883-84, and of 1,170 maunds as compared with those of 1882-83.

23. *Treasure.*—The amount of silver exported from Orissa was Rs. 16,69,730, against Rs. 6,86,335 in 1883-84, and Rs. 9,97,109 in 1882-83. The Collector of Balasore states that “the enormous increase (nearly 10 lakhs) in the export of private treasure is the natural result of the enormous increase in the import trade. It practically represents the payment of part of these imports.”

APPENDIX.

APPENDIX A.

List showing the deduction to be made on account of packing, and the valuation of all articles of trade adopted in registering traffic on trade routes, during the year 1884-85.
